ACKNOWLEDGEMENT

I express my sincere thanks to Dr. L.N. Hazra, Reader Department of Applied Physics, Calcutta University who suggested this topic and has taken a keen interest at all the subsequent stages of the work. It would have been very difficult indeed to complete this thesis without his untiring perseverance, friendly discussions, expert guidance and the laboratory facilities that he provided.

I thank the University Grants Commission (UGC), India for sponsoring me with a Fellowship extending over five years during which period this thesis is made.

I like to thank Mrs. T. Banerjee, Ex-librarian, Mr. B. Ghosh, the current librarian and all the supporting staff at the library of the Department of Applied Physics, Calcutta University for their assistance in procuring the right book at the right moment. Thanks are due also to Dr. Jaya Basu, Research Associate, Department of Applied Physics, Calcutta University for her help at different stages of the work. I also intend to thank all the members of the teaching faculty of the Department of Applied Physics, Calcutta University for their cooperation when the need arose.

My sincere thanks go to my friends and my family who shared my moments of joy as well as those of sadness. These are the people who never lost their faith in my abilities and never allowed letting down my spirits. A very special thanks goes to my mother who did not live up to see the making of this thesis, for all the love, care and support she extended to me.

May, 2000
