CONTENTS

Part I
1. Self-gravitating irrotational barotropic fluid in a conformally flat space.
2. Scalar meson fields in a conformally flat space.
3. Relativistic fluids in spherically symmetric space.

Part II
1. Solutions of coupled Einstein-\(SO(3)\) gauge field equations.
2. Exact solution in tensor gauge theory.

Part III
1. Exact solutions to non-linear chiral field equations.
2. Some solutions for relativistic vortices interacting through a scalar field.

Part IV
1. On the sign of \(\frac{d^2 H}{d t^2}\)

Supplement
1. Neutrino processes in the lepton era of the universe, and hot big bang cosmology.
