ACKNOWLEDGEMENT

It will be a pleasure to thank the many people who made this thesis possible.

First, of all, I would like to convey my heartfelt gratitude to my parents Mr. Swapan Kumar Raha and Mrs. Nila Raha, who have always encouraged me to pursue my aspirations and have stood by me unconditionally. They’ve raised me, loved me, taught me and made me worthy of my contribution today - I owe it to them.

I feel most privileged to have had the opportunity to work with Prof. Siddhartha Roy, my supervisor, a great scientist and a great person. Prof. Roy’s immense patience and constant encouragement kept me going through the many phases of desperation at failed experiments. No roadblock is too bad for him and no question is too silly to ask him. I respect him a lot for his erudition, reasoning and breadth of knowledge, from which I have tried to learn as much as possible. I thank him for all I could take away from him.

I would like to thank all my teachers who taught me Chemistry in College and later the chemical foundations of Biological Systems. I would like to thank all my teachers at Ballygunge Science College, everyone of who have influenced my thoughts in some way. I must specifically mention Prof. Dhruvajoti Chattopadhyay to whom I feel indebted in many ways. He instilled a sense of faith in my own strengths and has been a constant support, encouraging and guiding me whenever I’ve needed professional advice. He was also instrumental in inculcating the desire for research. Thanks for being such a great mentor, Prof. Chattopadhyay.

Here I must also mention the scientists at Bose Institute and Indian Institute of Chemical Biology, especially Dr. Sujoy Dasgupta, Prof. B. Bhattacharya, Dr. Gautam Basu, Dr. Subrata Majumdar, Dr. Bikash Pal, Prof. Santu Bandopadhyay, Dr. Suresh
Kumar, Dr. Krishnananda Chattopadhyay, Dr. Ruxana Choudhury, who have helped me both with generous scientific advice and use of their laboratory facilities. I should also mention the help from experts like Mr. Jaganmoy Guin, Mr. Asim Banerjee, Mr. Mohanlal Jana, Prabirda, Samirda, and Kalyanda.

I feel I have had the best lab-colleagues - my first lifeline in crisis and the first to share my joys at work. To begin with there were my seniors Ruchiradi, Rajatda, Sancharidi (both), Sumonadi, Suranjanadi, Soumidi, Smarajitda, Shampadi, Tanayadi, Rajeshda, Amitavada, Amlanda, Atanuda, Archanadi, Twishadi, Nabanita, Surojitda, Somadi and Srijatadi, from whom I learned a lot; and then Subrata, Asit, Neeladri, Koushik, Israr, Abhishek, Piya, Gitashi, Ranendu, Prasenjit and Jishu, who were always ready to help.

I wish to extend my sincere gratitude to my extended family, my parents-in-law Mr. Ashish Baran Roy and Mrs. Jhara Roy, for constantly encouraging me to complete my work. Without their wholehearted co-operation and support this would not have been possible. I would like to thank my sister Sudeshna Mitra, who always believed in me and also my sister-in-law Ananya Roy whose teasing about the never ending work has in a way helped me finish it.

Lastly, I am most thankful to my husband Mr. Anindya Roy, who has been my rock. In our last few years together, he has taught me to be focused in my work, persuasive in my plans, take failures in stride and enjoy the little successes well. It would've been a very different journey without you on my side. Thank you.

Paromita Raha
