Acknowledgements

The satisfaction and euphoria in the successful completion of any task would be incomplete, without The Almighty whose benevolence and blessings have helped me to complete this task with success.

I wish to record my sincere thanks with profound sense of gratitude to my guide Dr. Suman Pant, Reader, Department of clothing and textile, Faculty of Home Science, Banasthali University for guiding me under the aura of her academic excellence. I have been very much enlightened by her constructive criticism and concrete suggestions throughout the course investigation and preparation of this thesis.

I do express my thanks to Prof. Chitra Purohit, Secretary, Banasthali University and Prof. Aditya Shastri, Vice Chancellor, Banasthali University for encouraging and granting me permission to pursue my research work.

I am grateful to Dr. Indu Bansal, Dean, Faculty of Home Science, Banasthali University for providing the necessary facilities for this work.

I wish to express my sincere thanks to the head and members of Textile Division, IIT Delhi for providing me testing facility.

Cordial thanks are also expressed to the Indofil Chemicals Company, Resil Chemicals Pvt. Ltd. and Navdeep Chemicals Pvt. Ltd. for providing me chemicals.

The words in my knowledge are not adequate to express my heartfelt gratitude to my parents Sh. Ramesh Chandra Sen and Smt. Kalawati Devi and in-laws Sh. Jugal Kishore Milind and Smt. Parvati Milind for their love, affection, blessings and encouragement. It is indeed a pleasure to acknowledge the help, affection and support rendered by my brothers and sisters and brother in law and sister in law.
I express my deepest gratitude and heartfelt thanks to my husband Sh. Deepak Milind and my daughter Ishangi for their selfless help, patience, constant encouragement, inspiration and cheerful company throughout the course of study. 

Warmest thanks to all teaching and non-teaching staff members of the Department of Clothing and Textile, Banasthali University for their help and co-operation.

Last but not the least: I express my deep felt thanks to all who helped me either directly or indirectly during my Ph.D.

Date : Meena Milind
# Content

1. Introduction 1-5
2. Review of Literature 6-47
3. Statement of The Problem 48-50
4. Methodology 51-78
5. Result and Discussion 79-166
6. Summary and Conclusion 167-171
7. Bibliography 172-180
8. Appendix
# List of Tables

1. Particulars of the Fabrics 52
2. Preliminary data of fabrics used 80
3. Data of percent add on of Acrylic Emulsion on knitted fabrics 81
4. Data of percent add on of Silicone on knitted fabrics 82
5. Data of percent add on of DMDHEU on knitted fabrics 83
6. Effect of Acrylic Emulsion on pilling of knitted fabrics 84
7. Effect of Silicone on pilling of knitted fabrics 85
8. Effect of DMDHEU on pilling of knitted fabrics 86
9. Effect of Acrylic Emulsion on shrinkage of knitted fabrics 90
10. Effect of Silicone on shrinkage of knitted fabrics 91
11. Effect of DMDHEU on shrinkage of knitted fabrics 92
12. Effect of Acrylic Emulsion on elongation of knitted fabrics 100
13. Effect of Acrylic Emulsion on elastic recovery of knitted fabrics 101
14. Effect of Silicone on elongation of knitted fabrics 102
15. Effect of Silicone on elastic recovery of knitted fabrics 103
16. Effect of DMDHEU on elongation of knitted fabrics 104
17. Effect of DMDHEU on elastic recovery of knitted fabrics 105
18. Effect of Acrylic Emulsion on stiffness of knitted fabrics 120
19. Effect of Silicone on stiffness of knitted fabrics 121
20. Effect of DMDHEU on stiffness of knitted fabrics 122
21. Effect of Acrylic Emulsion on Drapability of knitted fabrics 127
22. Effect of Silicone on Drapability of knitted fabrics 128
23. Effect of DMDHEU on Drapability of knitted fabrics 129
24. Effect of Acrylic Emulsion on bursting strength of knitted fabrics 133
25. Effect of Silicone on bursting strength of knitted fabrics 134
26. Effect of DMDHEU on bursting strength of knitted fabrics 135
27. Drape characteristics of skirts with angular panel 141
28. Drape characteristics of semicircular skirts 141
29. Effect of Acrylic Emulsion on drape coefficient of knitted skirts 143
30. Effect of Acrylic Emulsion on drape co-efficient of circular knitted skirts 145
31. Effect of Silicone on drape co-efficient of circular knitted skirts 146
32. Effect of DMDHEU on drape co-efficient of circular knitted skirts 146
33. Aesthetic appeal as judged by respondents 163
# List of Figures

1. Structure of DMDHEU  
2. Structure of ACRYLATES  
3. Structure of Amino Silicone  
4. Marking of sample for shrinkage test  
5. Diagram of elongation testing  
6. Front view of drape meter  
7. Side view of drape meter  
8. Circular specimen Drapes over circular support  
9. Projected outline of draped specimen  
10. Formation of X for preparing dummy  
11. Giving shape to dummy by filling the gaps  
12. Final view of dummy  
13. Drafting of skirt with modified instruction  
14. Placement of panel in skirt  
15. Placement of panels on skirt at different level  
16. Finish application on waist length panel  
17. Finish application on mid thigh length panel  
18. Finish application on knee length panel  
19. Finish application on whole skirt  
20. Effect of Acrylic Emulsion on pilling of knitted fabrics  
21. Effect of Silicone on pilling of knitted fabrics  
22. Effect of DMDHEU on pilling of knitted fabrics
23. Effect of Acrylic Emulsion on shrinkage of knitted fabrics  90  
24. Effect of Silicone on shrinkage of knitted fabrics  91  
25. Effect of DMDHEU on shrinkage of knitted fabrics  92  
26. Effect of Acrylic Emulsion on stiffness of knitted fabrics  120  
27. Effect of Silicone on stiffness of knitted fabrics  121  
28. Effect of DMDHEU on stiffness of knitted fabrics  122  
29. Effect of Acrylic Emulsion on drapability of knitted fabrics  127  
30. Effect of Silicone on drapability of knitted fabrics  128  
31. Effect of DMDHEU on drapability of knitted fabrics  129  
32. Effect of Acrylic Emulsion on bursting strength of knitted fabrics  133  
33. Effect of Silicone on bursting strength of knitted fabrics  134  
34. Effect of DMDHEU on bursting strength of knitted fabrics  135
List of Photograph

1,3,5  Photographs of unfinished skirts of cotton polyester fabric with varying length of angular panels
2,4,6  Photographs of finished skirts of cotton polyester fabric with varying length of angular panels
7,9,11 Photographs of unfinished skirts of cotton/viscose fabric with varying length of angular panels
8,10,12 Photographs of finished skirts of cotton/viscose fabric with varying length of angular panels
13,15,17 Photographs of unfinished skirts of viscose with varying length of angular panels
14,16,18 Photographs of finished skirts of viscose fabric with varying length of angular panels
19,21,23 Photographs of unfinished skirts of cotton/nylon fabric with varying length of angular panels
20,22,24 Photographs of finished skirts of cotton/nylon fabric with varying length of angular panels
25,27,29 Photographs of unfinished skirts of nylon fabric with varying length of angular panels
26,28,30 Photographs of finished skirts of nylon fabric with varying length of angular panels
31,33,35 Photographs of unfinished circular skirts of cotton/polyester fabric
32,34,36 Photographs of finished circular skirts of cotton/polyester fabric with DMDHEU, Silicone and Acrylic Emulsion
37,39,41 Photographs of unfinished circular skirts of cotton/viscose fabric
38,40,42 Photographs of finished circular skirts of cotton/viscose fabric with DMDHEU, Silicone and Acrylic Emulsion
43,45,47 Photographs of unfinished circular skirts of viscose fabric
44,46,48 Photographs of finished circular skirts of viscose fabric with DMDHEU, Silicone and Acrylic Emulsion
49,51,53 Photographs of unfinished circular skirts of cotton/nylon fabric
50,52,54 Photographs of finished circular skirts of cotton/nylon fabric
with DMDHEU, Silicone and Acrylic Emulsion

55,57,59 Photographs of unfinished circular skirts of nylon fabric

56,58,60 Photographs of finished circular skirts of nylon fabric with DMDHEU, Silicone and Acrylic Emulsion
