

ACKNOWLEDGEMENT

I wish to express my profound sense of gratitude to Dr. T.A. Abraham, Reader, Department of Botany, University of Kerala, for suggesting the research problem, and for his unstinted guidance and advice during the course of this work and the preparation of the manuscript.

I am indebted to Dr. C.A. Ninan, former Professor and Head and Dr. (Mrs) Susan Abraham, Professor and Head of the Department of Botany for encouragement and providing necessary facilities for conducting the studies.

I am thankful to Professor and Head of the Department of Microbiology and Plant Pathology, Faculty of Agriculture, Annamalai University, Annamalai Nagar, Professor and Head of the Department of Plant Pathology, Tamil Nadu Agricultural University, Coimbatore, and Professor and Head of the Department of Mycology and Plant Pathology, Indian Agricultural Research Institute, New Delhi for providing fungal cultures used as test pathogens.

I record my thanks to Dr. A.D. Rovira, CSIRO, Australia and to The Waksman Institute of Microbiology, U.S.A. for providing useful literature on the topic of research. I also thank Dr. John Lacey, Rothamsted Experimental Station, U.K. and Dr. C.V. Subramanian, Emeritus Scientist, Central Institute of Medicinal and Aromatic Plants, Lucknow for useful discussions. I am grateful to Dr. K.M. Alexander, former Professor and Head of the Department of Zoology, University of Kerala, for permission to use the Electron Microscope and to Mr. T.I. Jacob for the help in the Electron Microscopic studies. Thanks are also due to Dr. K. Jayaraman, Division of Statistics, Kerala Forest Research Institute and Mr. V.K.G. Unnithan, Department of Statistics, Kerala Agricultural University, Trichur, for advice in statistical analysis of the data.
