Acknowledgements

I have immense pleasure in expressing my sincere and profound gratitude to my supervisor, Dr. Veena K. Parnaik for her able guidance and constant encouragement throughout the course of this study. I am particularly thankful to her for her understanding, patience and unwavering support which enabled me to complete my work comfortably.

I thank the Director, Dr. Lalji Singh for extending his kind support and cooperation and for striving to maintain high standards of excellence in CCMB. I am also grateful to the former Director, Prof. D. Balasubramanian, who evinced keen interest in the progress of my work.

I would like to acknowledge Muralikrishna’s help in standardising the transfection assays, which form a critical part of this thesis.

Working in the lab has been a wonderful experience, largely due to the pleasant company of my labmates and friends. I have enjoyed interacting with Radhika, Kumaran, Puneeta, Thanu and Abhijit, who in their own inimitable styles, lent a very lively and congenial atmosphere to the lab with their cheer and enthusiasm. I am extremely thankful to them for all their help and cooperation.

I am thankful to Vidyasagar for keeping up a constant supply of clean glassware that was crucial for my experiments.

I am grateful to the staff of the photography section and to Rehman and Nageshwar Rao in particular, who met my exacting requirements with great expertise and patience and furnished good quality photographs of my work.

I am thankful to Bhaskar and Prakash for taking great care in photocopying the thesis.

I thank the staff of the animal house, especially Rajshekar and Jayaraman for their expert assistance.
The services rendered by the instrumentation and fine biochemicals groups are acknowledged.

I thank Hamid, Vidya, Soghra, Kennady, Jagatheesan, Srikant, Nambi, Viji, Rita Shivakrupa, Uma, Satyajit, Sanjeev, Pritha, and all the other members of the East Wing First Floor, present and past, for their help and cooperation. Laxmi and Kakoli were very supportive throughout and Jagreet and Ajay were wonderful company. I have had the pleasure of interacting with numerous students and post-docs in CCMB and am grateful for their support, help and goodwishes.

Kulwant, Velvizhi, Shubhangi and Puneeta were good companions and I cherish my friendship with them.

I thank Mohan Kumar for efficient typing of the thesis which was a great help, and Radhika and Puneeta for proof-reading it.

I have been blessed with a very warm and loving family. Had it not been for their tremendous support, this work would never have been possible. It is impossible to find words to express my feelings for them.

The financial support provided by CSIR is duly acknowledged.
