

LIST OF FIGURES

Fig. No.	Contents	Page No.
1	An authenticated protocol for quality control of raw material for the finished product	9
2	An authenticated and standard protocol for production of herbal drug	11
3	Schematic drawing of a molecular segment of a cross-linked polyacrylic acid polymer	40
4	Absorption maxima of embelin in phosphate buffer (pH 7.4)	84
5	Calibration curve of embelin in phosphate buffer (pH 7.4)	85
6	TLC of Vidang extract	87
7	Image of HPTLC plate fingerprinting	88
8	HPTLC chromatograph of standard embelin	88
9	HPTLC chromatograph of Vidang extract	89
10	HPTLC chromatograph of calibration curve of embelin	89
11	Calibration curve of embelin by HPTLC method	90
12	<i>In vitro</i> diffusion study of Vidang topical gel formulations F1-F3	94
13	<i>In vitro</i> diffusion study of Vidang topical gel formulations F4-F6	95
14	<i>In vitro</i> diffusion study of Vidang topical gel formulations F7-F9	95
15	Comparison between experimental & predicted values of Viscosity	98
16	Surface plot of Viscosity	100
17	Contour plot of Viscosity	101
18	Surface plot of % similarity for Viscosity	101
19	Contour plot of % similarity for Viscosity	102
20	Comparison between experimental and predicted values of T _{50%}	105

Fig. No.	Contents	Page No.
21	Surface plot of T _{50%}	107
22	Contour plot of T _{50%}	108
23	Surface plot of % similarity for T _{50%}	108
24	Contour plot of % similarity for T _{50%}	109
25	Comparison between experimental & predicted values of DR ₁	112
26	Surface plot of DR ₁	114
27	Contour plot of DR ₁	115
28	Surface plot of % similarity for DR ₁	115
29	Contour plot of % similarity for DR ₁	116
30	Photograph of optimized vidang gel formulation	118
31	<i>In vitro</i> antifungal study of optimized formulation against <i>Candida Albicans</i>	120
32	<i>In vitro</i> antifungal study of optimized formulation against <i>Trychophyton Rubrum</i>	120
33	<i>In vitro</i> antifungal study of optimized formulation against <i>Microsporum Canis</i>	121
34	<i>In vitro</i> diffusion profiles of optimized formulation before and after stability study	123
35	<i>In vitro</i> diffusion study of Vidang topical cream formulations C1-C3	127
36	<i>In vitro</i> diffusion study of Vidang topical cream formulations C4-C6	128
37	<i>In vitro</i> diffusion study of Vidang topical cream formulations C7-C9	128
38	Comparison between experimental & predicted values of Viscosity	131
39	Surface plot of Viscosity (cps)	133
40	Contour plot of Viscosity (cps)	134

Fig. No.	Contents	Page No.
41	Surface plot of % similarity for Viscosity (cps)	134
42	Contour plot of % similarity for Viscosity (cps)	135
43	Comparison between experimental and predicted values of T _{50%}	138
44	Surface plot of T _{50%}	140
45	Contour plot of T _{50%}	141
46	Surface plot of % similarity for T _{50%}	141
47	Contour plot of % similarity for T _{50%}	142
48	Comparison between experimental & predicted values of DR ₁	145
49	Surface plot of DR ₁	147
50	Contour plot of DR ₁	148
51	Surface plot of % similarity for DR ₁	148
52	Contour plot of % similarity for DR ₁	149
53	Photograph of optimized Vidang cream formulation	151
54	<i>In vitro</i> antifungal study of optimized formulation against <i>Candida Albicans</i>	153
55	<i>In vitro</i> antifungal study of optimized formulation against <i>Trychophyton Rubrum</i>	153
56	<i>In vitro</i> antifungal study of optimized formulation against <i>Microsporium Canis</i>	154
57	<i>In vitro</i> diffusion profiles of optimized formulation before and after stability study	156
