# Table of Contents

Acknowledgement ........................................................................................................ I
Abstract ......................................................................................................................... IV
Table of Contents ........................................................................................................... VII
List of Figures ............................................................................................................... XI
List of Tables ............................................................................................................... XIII
List of Abbreviations .................................................................................................. XV

## Chapter I Introduction

1.1 e-Learning overview .............................................................................................. 1
   1.1.1 Different e-Learning service approach......................................................... 2
   1.1.2 Computer System Based Learning (CBL) ............................................... 2
   1.1.3 Computer System Based Training (CBT) .................................................. 3
   1.1.4 Computer System Supported Collaborative Learning (CSCL)............... 4
   1.1.5 e-Learning Outcomes ............................................................................... 7
   1.1.6 Supportive Points of e-Learning to the Trainer or Organization.............. 9
1.2 A University Teaching and Learning System ..................................................... 10
1.3 Adaptive e-Learning and its Adaptability ......................................................... 11
1.4 Virtual Environments to Facilitate Adaptive e-Learning .................................. 13
   1.4.1 Existing Virtual Learning Environments ................................................. 14
1.5 Current status of adaptive e-Learning ................................................................. 18

## Chapter II Literature Review and Related Work

2.1 Literature Survey .................................................................................................. 23
2.2 Related Work ....................................................................................................... 28
   2.2.1 Review of Related Work .......................................................................... 29
   2.2.2 Basics of Learning and e-Learning .......................................................... 30
   2.2.3 Challenges Encountered in Previous Research ........................................ 36
2.3 Observations Inferred from the Survey ............................................................... 40
Chapter III Adaptive e-Learning under Virtual Environment: Current Status

3.1 National and International status of adaptive e-Learning ................. 48
  3.1.1 e-Learning’s Rapid Growth ............................................ 49
  3.1.2 Types of e-Learning Organizations ................................ 50
3.2 Barriers to effective use of e-Learning ....................................... 58
  3.2.1 Promise for Development ............................................. 58
3.3 International use of e-Learning ............................................... 63
  3.3.1 International efforts in e-Learning ................................... 63
3.4 National Development and status .............................................. 72

Chapter IV Existing e-Learning Environments Analysis

4.1 Existing e-Learning Environment Analysis .................................. 75
  4.1.1 Current e-Learning standards ....................................... 76
  4.1.2 Prospects of e-Learning using Experts System (ES) ................. 76
  4.1.3 The e-Learning literature deals ...................................... 78
  4.1.4 Basics of learning and e-Learning research .......................... 79
4.2 The potential of e-Learning technologies ................................... 79
  4.2.1 Adoption of e-Learning facilities in Korean Universities – A Case Study ... 80
  4.2.2 Basic directions for e-Learning facilities in Korean higher education ... 82
4.3 A Survey on the Current Status of e-Learning in Higher Education ....... 84
  4.3.1 Existing methods and Procedure ................................... 84
  4.3.2 Survey Response Matrices .......................................... 85
  4.3.3 Complete Status of e-learning in Universities ....................... 86
  4.3.4 Collaboration with other Universities or Institutions ............... 86
4.4 Adaptive e-Learning Architecture .........................................................88
  4.4.1 Student Modeling Server and its Implementation .......................... 88
  4.4.2 The Activity servers and the services ........................................ 93
  4.4.3 The student model server CUMULATE ........................................ 96
4.5 Case Study of University of North South Wales ............................... 101
4.6 Comparative analysis of e-Learning Techniques .................................102
4.7 Research problem formulation ......................................................... 105

Chapter V Framework Design for Proposed e-Learning Environments,
Proposed Model and Methodology

5.1 Framework Study .............................................................................106
  5.1.1 e-learning platforms and the options for adaptation .................... 107
  5.1.2 Adaptive e-learning systems and technologies ......................... 108
  5.1.3 ALFanet perspective and architecture ..................................... 109
  5.1.4 Validation : A First Prototype to validate the approach .............. 110
5.2 Detailed Analysis of Responses Recorded from Students ..................125

Chapter VI Prototyping and Implementation of adaptive e-Learning
Environment

6.1 Prototype of Conceptual Framework .................................................134
6.2 Analysis of Awareness and Effectiveness of Internet and e-Learning ......138
6.3 Existing virtual environments for adaptive e-Learning : Comparative study.....159
  6.3.1 Limitations of Model 1: PENTHA MODEL ................................. 159
  6.3.2 Findings of Model 1 .................................................................... 161
  6.3.3 Limitations of Model 2: “Standard Ready” Architecture / Model .... 161
  6.3.4 Findings of Model 2 .................................................................... 162
6.4 Proposed Framework for Adaptive e-Learning .................................164
  6.4.1 Adoption through eye tracking .................................................... 165
  6.4.2 Model justification with data analysis ....................................... 168
  6.4.3 Model Validation ................................................................. 168
6.5 Simulation of Proposed Framework Through Existing Tool ..............169
6.6 Expected Outcomes ........................................................................180

Chapter VII Conclusion and Possible Future Expansion

7.1 Conclusion .......................................................................................181
7.2 Future Scope and Expansion ..............................................................182
