Acknowledgements

This research work would have been not possible without the support of many researchers and friends. Financial support (Office Order No DS/JPH-DH-0005F) was provided by Indian Statistical Institute, Kolkata.

First of all, I would like to express my deepest gratitude to my supervisor Prof. B. S. Dandapat for his continuous support and guidance throughout period of this work. Without his unconditional support this thesis would have never seen in light of day.

I would like to thank faculty members, research scholars and staffs of Physics and Applied Mathematics Unit for their kind help and support in various aspects. Specially, I am thankful to Dr. Bidyut Santra, Mr. Arghya Samanta, Mr. Susanta Maity and Dr. Satya Prakash Ojha for valuable discussions.

It is important to mention researchers who directly and indirectly helped me throughout my research: Prof. B. G. Higgins from University of California, Davice, Prof. Victor Starov from Loughborough University, Lecestershire, UK, Prof. Rafeal Tadmor from Lamar University, Beaumont, USA, Prof. B. N. Mondal, Indian Statistical Institute, Kolkata, and Prof. Uma Basu, University of Calcutta, Kolkata. I want to thank Prof. Sk. A. Rauf, Sikkim Manipal Institute of Technology, Majitar for his help in proofreading.

I would like to express love and gratitude to my beloved family and friends: To my parents for their endless support, to brothers, brother in law and sister for their continuous unconditional support and finally to my friends Bandhu, Nilesh, Sarvesh, Anuj, Krishnapada, Vinay and Vikas for their constant encouragements.
