Contents

Chapter 1: Introduction 1

Chapter 2: Basic Equations 21

2.1 Classical Elasticity 21
2.2 Classical Thermoelasticity (CTE) 22
2.3 Classical Coupled Thermoelasticity (CCTE) 23
2.4 Lord-Shulman Model (ETE) 24
2.5 Green-Lindsay Model (TRDTE) 25
2.6 Green-Naghdi Model II (Thermoelasticity of type II) 26
2.7 Green-Naghdi Model III (Thermoelasticity of type III) 26
2.8 Three-phase-lag Model 27
2.9 Two Temperature Thermoelasticity (2TT) 28
2.10 Two Temperature Green-Naghdi Model II (2TGNII) 29
2.11 Two Temperature Green-Naghdi Model III (2TGNIII) 29
2.12 Two Temperature Three-phase-lag Model (2T3P) 30
2.13 Magneto-Themoelasticity 31
2.14 Lord-Shulman Model of Magneto-Thermoelasticity (EMTE) 32
2.15 Green-Naghdi Model II of Magneto-Thermoelasticity 32
2.16 Green-Naghdi Model III of Magneto-Thermoelasticity 33
2.17 Three-phase-lag Model of Magneto-Thermoelasticity 33
2.18 Two Temperature Magneto-Thermoelasticity 34
## Contents

2.19 Two Temperature Magneto-Thermoelasticity Based on Green-Naghdi Model II 35
2.20 Two Temperature Magneto-Thermoelasticity Based on Green-Naghdi Model III 36
2.21 Two Temperature Magneto-Thermoelasticity Based on Three-phase-lag Model 36
2.22 Rotating Medium 37
2.23 Boundary Conditions 38

Chapter 3: Magneto-thermo-elastic waves in an infinite perfectly conducting elastic solid with energy dissipation 42

3.1 Introduction 42
3.2 Fundamental Equations 43
3.3 Case of Perfect Electrical Conductivity 45
3.4 Plane Wave Solution 46
3.5 Numerical Results and Discussions 48
3.5 Conclusions 50

Chapter 4: Magneto-thermoelastic response in a functionally graded isotropic unbounded medium under a periodically varying heat source 52

4.1 Introduction 52
4.2 Basic Equations 55
4.3 Formulation of the Problem 56
4.4 Method of Solution 60
4.5 Numerical Results and Discussions 65
4.6 Conclusions 76
Chapter 5: Magneto-thermo-elastic response in a perfectly conducting medium with three-phase-lag effect

5.1 Introduction 77
5.2 Basic Equations 78
5.3 Formulation of the Problem 79
5.4 Method of Solution 83
5.5 Numerical Results and Discussions 86

Chapter 6: Two-temperature magneto-thermo-elastic response in a perfectly conducting medium based on GN III model

6.1 Introduction 100
6.2 Basic Equations 101
6.3 Formulation of the Problem 102
6.4 Method of Solution 106
6.5 Numerical Results and Discussions 111
6.6 Conclusions 124

Chapter 7: Analysis of magneto-thermoelastic response in a transversely isotropic hollow cylinder under thermal shock with three-phase-lag effect

7.1 Introduction 126
7.2 Formulation of the Problem and the Fundamental Equations 128
7.3 Method of Solution 132
7.4 Finite Element Analysis 133
7.5 Numerical Results and Discussions 136
7.6 Conclusions 143
Chapter 8: Study of finite thermal waves in a magneto-thermoelastic rotating medium

8.1 Introduction 145
8.2 Formulation of the Problem 147
8.3 Method of Solution 152
8.4 Numerical Results and Discussions 156
8.5 Conclusions 168

Chapter 9: Two-temperature magneto thermoelastic response in a perfectly conducting medium with finite wave speed

9.1 Introduction 170
9.2 Basic Equations 171
9.3 Formulation of the Problem 172
9.4 Method of Solution 176
9.5 Numerical Results and Discussions 181

Chapter 10: Summary 191

Appendix 194
List of Publications 199
Bibliography 200
