LIST OF TABLES

Tables

1. *V. cholerae* strains
2. Cholera bacteriophages
3. Ultraviolet inactivation parameters of *V. cholerae* and *V. eltor* strains
4. Ultraviolet sensitivity of *V. cholerae* cells collected from various phases of growth
5. Dark repair and photoreactivation sectors of *V. cholerae* and *V. eltor* cells
6. Toxigenicity of *V. cholerae* whole cell lysates before and after animal passage
7. Changes in APase activity during holding
8. Ultraviolet inactivation parameters of cholera bacteriophages
9. Reactivation of ultraviolet irradiated cholera bacteriophages Ø 138
10. W-reactivation of UV irradiated bacteriophage Ø 138
11. Summary of dark repair mechanism operative in *V. cholerae*
12. Summary of changes of *in vivo* properties of *V. cholerae* cells by animal passage
