ACKNOWLEDGEMENT

Ph. D. thesis is a long, grueling, uphill journey and it is always a pleasure to acknowledge all those who have helped me to overcome this journey in a pleasant and smooth manner. It is impossible to name every individual of this well knit family whose association I will cherish and long for years to come.

First of all I would like to express my deep sense of gratitude to my revered teacher and guide, Prof. Dhrubajyoti Chattopadhyay, F. N. A. Sc, Guha Professor and Coordinator of the Dr. B. C. Guha Centre for Genetic Engineering and Biotechnology, Department of Biochemistry, for his invaluable guidance all throughout the course of this work. I am indebted to him for his keen interest, constant encouragement, valuable suggestions and affectionate help that has helped me to overcome many a hurdle during the long course of this work. But above all I am grateful for the unearthly affection that he bestowed on me, time and often, on every trivial matter, which I will remember forever.

I am equally indebted to Dr. Pradip Das, Assistant Director N. I. C. E. D. Calcutta, for his deep interest and active participation in this work. His constructive criticism and timely advice was of immense help during the critical phases of this work. I would like to tender my sincere thanks to him for allowing me to work in his lab. Without mention, it would have been virtually impossible for me to complete this work without his help.

I express my sincere thanks to Prof. Amalendu Mandal, Prof. Diptis Sengupta, former Heads and to Prof. Sudip K. Banerjee, present Head of the Department of Biochemistry for providing me all possible facilities in carrying out this work.

My heartiest regards goes to Prof. I. B. Chatterjee for helping me whenever required.

I also express my gratitude to all the faculty members of the Department of Biochemistry for their help and guidance whenever required. I extend my thanks to all the staff members and scholars of the Department of Biochemistry for helping me in whatever ways they could.

I consider myself lucky to get some brotherly labmates in Susantada, Debasista, Mrinalda, Koustubhda my senior colleagues, Arun and Jamal my contemporaries as well as
Dipadi, Ranajoy, Amitabha, Soumen and Santunu my present co-workers. I express my sincere thanks to all of them for their constant moral support and help.

It is a pleasure to acknowledge the hearty cooperation of Dr Supriti Sarkar, Dr (Mrs) Eliza Chakraborty, Dr Sanjib Bhattacharya, Mr Partha Mukhopadhyay, Mr. Sadhab Sengupta, Mr. Anjan Debnath, Mrs. Susmita Das, Mr. Md. Ali Akbar, and Mr. Sandipan Ganguly for their constant assistance and help in maintenance of Giardia lamblia culture.

I am also thankful to Mr. N. Mukhopadhyay and Mr. J. N. Boral, N. I. C. E. D. Calcutta for their help whenever required.

I am grateful to the Director N. I. C. E. D, Calcutta, Dr. S. Bhattacharya for allowing me to work in his Institute.

My thanks are due to Prof C. Dasgupta and his group, Department of Biophysics and Molecular Biology for their help during this work.

Words are indeed inadequate to express my indebtedness to my family members, not only for bearing all the failures in commitment on my part during these years but also for the constant support they have provided me in achieving my goal.

Lastly, I would like to acknowledge the Dr. B. C. Guha Centre for Genetic Engineering and Biotechnology, Calcutta University for providing me the infrastructural help and University Grant Commission for granting me fellowship during this period of work.
