## LIST OF TABLES

<b>Table No.</b>	<b>Title</b>
1.1	Regimes of Bubble Column operation- Definition
2.1	Dimension of bubble columns
2.2	Physical properties of the liquids
2.3	Range of variables investigated
3.1	Comparison the holdup data with other correlations
3.2	Comparison the total pressure drop data with other correlation
4.1	Different activation function
4.2	Performance of best neural network for testing in gas holdup
4.3	Performance of best neural network for testing in pressure drop
5.1	Physical properties of water and NaCl solutions of different concentration
A2.1	Experimental data for air non-Newtonian liquids
A3.1	Experimental data for air-Electrolyte
