List of Figures

Fig - 1.1 Natural Hazard prone zones of India

Fig - 1.2 The number of affected population in India due to different disasters during 1985-2001

Fig - 1.3 The number of partially or totally damaged houses or buildings in India due to different disasters during 1985-2001

Fig - 1.4 The amount of property damage/loss (Rs Crore) in India due to different disasters during 1985-2001

Fig - 1.5 Districts of West Bengal

Fig - 1.6 Physiography of West Bengal

Fig - 1.7 Rivers of West Bengal

Fig - 1.8 A composite vulnerability macro-zone map of West Bengal computed from integration of hazard distributions- earthquake, flood, wind & cyclone, landslide and subsidence along with vulnerability components represented by district-wise population density and industrial output distribution

Fig - 3.1 Schematic showing the trend of affected population due to flood in India during 1953-1980

Fig - 3.2 Schematic showing the trend of crop damage (Rs. Lakh) due to flood in India, during 1953-1980

Fig - 3.4 Flood prone areas of India

Fig - 3.5 Rivers of West Bengal

Fig - 3.6 Population distribution map of West Bengal
Fig - 3.7 Physiography of West Bengal
Fig - 3.8 Landuse of West Bengal
Fig - 3.9 Map showing the distribution of affected population due to flood over West Bengal, 1995-2005
Fig - 3.10 Map showing the distribution of agriculturally affected districts due to flood over West Bengal, 1995-2005
Fig - 4.1 Cyclone prone zone of India
Fig - 4.2 Schematic showing the brief history of most intense cyclones from 1970-2005 over Bay of Bengal
Fig - 4.3 Map shows cyclone risk zone over West Bengal
Fig - 4.4 Map shows the number of affected population over different districts of West Bengal, 1995-2005
Fig - 4.5 Schematic showing the number of affected population due to cyclone over different districts of West Bengal, during 1995-2005.
Fig - 4.6 Map shows the actual value of damaged crop over different districts of West Bengal, 1995-2005
Fig - 4.7 Schematic showing the actual value of damaged crop (in rupees) due to cyclone over different districts of West Bengal during 1995-2005.
Fig - 4.8 Schematic showing the correlation coefficient according to no. of affected population in different years.
Fig - 4.9 Schematic showing the scatter diagram of the no. of cyclonic days as Predictor & no. of affected population due to cyclone as Predictand over different districts of West Bengal, 2005.
Fig - 4.10  Schematic showing the scatter diagram of the no. of cyclonic days as Predictor & no. of affected population due to cyclone as Predictand over various districts of West Bengal, 1995.

Fig - 4.11  Schematic showing the scatter diagram of the no. of cyclonic days as Predictor & no. of affected population due to cyclone as Predictand over various districts of West Bengal, 1996.

Fig - 4.12  Schematic showing the scatter diagram of the no. of cyclonic days as Predictor & no. of affected population due to cyclone as Predictand over various districts of West Bengal, 1997.

Fig - 4.13  Schematic showing the scatter diagram of the no. of cyclonic days as Predictor & no. of affected population due to cyclone as Predictand over various districts of West Bengal, 1998.

Fig - 4.14  Schematic showing the scatter diagram of the no. of cyclonic days as Predictor & no. of affected population due to cyclone as Predictand over various districts of West Bengal, 1999.

Fig - 4.15  Schematic showing the scatter diagram of the no. of cyclonic days as Predictor & no. of affected population as Predictand over various districts of West Bengal, 2000.

Fig - 4.16  Schematic showing the scatter diagram of the no. of cyclonic days as Predictor & no. of affected population as Predictand over various districts of West Bengal, 2001.

Fig - 4.17  Schematic showing the scatter diagram of the no. of cyclonic days as Predictor & no. of affected population as Predictand over various districts of West Bengal, 2002.

Fig - 4.18  Schematic showing the scatter diagram of the no. of cyclonic days as Predictor & no. of affected population due to cyclone as Predictand over various districts of West Bengal, 2003.
Fig - 4.19 Schematic showing the scatter diagram of the no. of cyclonic days as Predictor & no. of affected population due to cyclone as Predictend over various districts of West Bengal, 2004.

Fig - 4.20 Schematic showing the variation of the actual no. of affected population and the predicted no. of affected population due to cyclone during 1995.

Fig - 4.21 Schematic showing the variation of the actual no. of affected population and the predictand no. of affected population due to cyclone during 1996.

Fig - 4.22 Schematic showing the variation of the actual no. affected population and the predicted no. of affected population due to cyclone during 1997.

Fig - 4.23 Schematic showing the variation of the actual no.; of affected population and the predictand no. of affected population due to cyclone during 1998.

Fig - 4.24 Schematic showing the variation of the actual no. of affected population and the predicted no. of affected population due to cyclone during 1999.

Fig - 4.25 Schematic showing the variation of the actual no. of affected population & the predicted no. of affected population due to cyclone during 2000.

Fig - 4.26 Schematic showing the variation of the actual no. affected population & the predicted no. of affected population due to cyclone during 2001.

Fig - 4.27 Schematic showing the variations of the actual no. of affected population & predicted no. of affected no. of affected population due to cyclone during 2002.

Fig - 4.28 Schematic showing the variation of the actual no. of affected people and the predicted no. of affected people due to cyclone during 2003.

Fig - 4.29 Schematic showing the variation of actual no. of affected people & predicted no. of affected people due to cyclone during 2004.

Fig - 4.30 Schematic showing the variation of the actual no. of affected population and the predicted no. of affected population due to cyclone during 2005.

Fig - 4.31 Schematic showing the variation of % errors between actual & predicted no. of affected population in 1995.
Schematic showing the variation of % errors between actual & predicted no. of affected population in 1996.

Schematic showing the variation of errors between actual & predicted no. of affected population in 1997.

Schematic showing the variation of % errors between actual & predicted no. of affected population in 1998.

Schematic showing the variation of % errors between actual & predicted no. of affected population in 1999.

Schematic showing the variation of % errors between actual & predicted no. of affected population in 2000.

Schematic showing the variation of % errors between actual & predicted no. of affected population in 2001.

Schematic showing the variation of % errors between actual & predicted no. of affected population in 2002.

Schematic showing the variation of % errors between actual & predicted no. of affected population in 2003.

Schematic showing the variation of % errors between actual & predicted no. of affected population in 2004.

Schematic showing the variation of % errors between actual & predicted no. of affected population in 2005.

Schematic showing the correlation coefficient according to actual value of damaged crop (in rupees) in different years (1995-2005).

Schematic showing the scatter diagram of the no. of cyclonic days as Predictor & actual value of damaged crop as Predictand over various districts of West Bengal, 2003.

Schematic showing the scatter diagram of the no. of cyclonic days as Predictor & actual value of damaged crop (in rupees) as Predictand over various districts of West Bengal, 1995.
Fig - 4.45  Schematic showing the scatter diagram of the no. of cyclonic days as Predictor & actual value of damaged crop (in rupees) as Predictand over various districts of West Bengal, 1996.

Fig - 4.46  Schematic showing the scatter diagram of the no. of cyclonic days as Predictor & actual value of damaged crop (in rupees) as Predictand over various districts of West Bengal, 1997.

Fig - 4.47  Schematic showing the scatter diagram of the no. of cyclonic days as Predictor & actual value of damaged crop (in rupees) as predictand over various districts of West Bengal, 1998.

Fig - 4.48  Schematic showing the scatter diagram of the no. of cyclonic days as Predictor & actual value of damaged crop as Predictand over various districts of West Bengal, 1999.

Fig - 4.49  Schematic showing the scatter diagram of the no. of cyclonic days as Predictor & actual value of damaged crop as Predictand over various districts of West Bengal, 2000.

Fig - 4.50  Schematic showing the scatter diagram of the no. of cyclonic days as Predictor & actual value of damaged crop as Predictand over various districts of West Bengal, 2001.

Fig - 4.51  Schematic showing the scatter diagram of the no. of cyclonic days as Predictor & actual value of damaged crop as Predictand over various districts of West Bengal, 2002.

Fig - 4.52  Schematic showing the scatter diagram of the no. of cyclonic days as Predictor & actual value of damaged crop (in rupees) as Predictand over various districts of West Bengal, 2004.

Fig - 4.53  Schematic showing the scatter diagram of the no. of cyclonic days as Predictor & actual value of damaged crop (in rupees) as Predictand over various districts of West Bengal, 2005.
Fig - 4.54 Schematic showing the variation of the actual value of damaged crop (in rupees) and the predicted value of damaged crop due to cyclone during 1995.

Fig - 4.55 Schematic showing the variation of the actual value of damaged crop (in rupees) and the predicted value of damaged crop due to cyclone during 1996.

Fig - 4.56 Schematic showing the variation of the actual value of damaged crop (in rupees) and the predicted value of damaged crop due to cyclone during 1997.

Fig - 4.57 Schematic showing the variation of the actual value of damaged crop (in rupees) and the predicted value of damaged crop due to cyclone during 1998.

Fig - 4.58 Schematic showing the variation of the actual value of damaged crop (in rupees) and the predicted value of damaged crop due to cyclone during 1999.

Fig - 4.59 Schematic showing the variation of the actual value of damaged crop (in rupees) and the predicted value of damaged crop due to cyclone during 2000.

Fig - 4.60 Schematic showing the variation of the actual value of damaged crop (in rupees) and the predicted value of damaged crop due to cyclone during 2001.

Fig - 4.61 Schematic showing the variation of the actual value of damaged crop (in rupees) and the predicted value of damaged crop due to cyclone during 2002.

Fig - 4.62 Schematic showing the variation of the actual value of damaged crop (in rupees) and the predicted value of damaged crop due to cyclone during 2003.
Fig - 4.63  Schematic showing the variation of the actual value of damaged crop (in rupees) and the predicted value of damaged crop due to cyclone during 2004.

Fig - 4.64  Schematic showing the variation of the actual value of damaged crop (in rupees) and the predicted value of damaged crop due to cyclone during 2005.

Fig - 4.65  Schematic showing the variation of % errors between actual & predicted value of damaged crop (in rupees) due to cyclone in 1995.

Fig - 4.66  Schematic showing the variation of % errors between actual & predicted value of damaged crop (in rupees) due to cyclone in 1996.

Fig - 4.67  Schematic showing the variation of % errors between actual & predicted value of damaged crop (in rupees) due to cyclone in 1997.

Fig - 4.68  Schematic showing the variation of % errors between actual & predicted value of damaged crop (in rupees) due to cyclone in 1998.

Fig - 4.69  Schematic showing the variation of % errors between actual & predicted value of damaged crop (in rupees) due to cyclone in 1999.

Fig - 4.70  Schematic showing the variation of % errors between actual & predicted value of damaged crop (in rupees) due to cyclone, 2000.

Fig - 4.71  Schematic showing the variation of % errors between actual & predicted value of damaged crop (in rupees) due to cyclone, 2001.

Fig - 4.72  Schematic showing the variation of % errors between actual & predicted value of damaged crop (in rupees) due to cyclone, 2002.

Fig - 4.73  Schematic showing the variation of % errors between actual & predicted value of damaged crop (in rupees) due to cyclone, 2003.

Fig - 4.74  Schematic showing the variation of % errors between actual & predicted value of damaged crop (in rupees) due to cyclone, 2004.

Fig - 4.75  Schematic showing the variation of % errors between actual & predicted value of damaged crop (in rupees) due to cyclone, 2005.
