Acknowledgements

This thesis represents not only my work but a wholesome contribution of many people in different ways. It is a pleasant task to express my thanks to all those who made this thesis possible. First and foremost, I wish to thank my supervisor Prof. Arup Mukherjee, Professor, Department of Chemical Technology, University of Calcutta, for his valuable guidance, motivations, enthusiasm and knowledge imparts. Professor Mukherjee taught me how to question thoughts and express ideas in a rational way. He gave me freedom to explore on my own and at the same time extend his mature thoughts to recuperate in the crisis situation. His undaunted courage and passion will always inspire me and I think I can only express thanks to him through my future work.

I would like to express my deepest gratitude and respect to Dr. Sriparna Datta, Head, Department of Chemical Technology and Dr. Achintya Saha, Associate Professor, Department of Chemical Technology, University of Calcutta for their invaluable advice, knowledge-based inputs and kind cooperation at different stages of my research work. I am thankful to the honorable Vice-Chancellor and the Registrar, University of Calcutta for all liberal assistances extended to me throughout this research work. My thanks are also due to our university librarian for all the online journal facilities and the bibliographic support system that were made available so easily in my department itself. I would take this opportunity to sincerely acknowledge the financial assistance extended by the Council of Scientific and Industrial Research (CSIR), New Delhi and the Department of Biotechnology, Government of India, in form of Senior Research Fellowship. These grants bolstered comforts, freedom and an easy rolling of my work.

I gratefully acknowledge different academic inputs and laboratory facility support that were received time to time from Professor Abhay Shankar Chakrabarty, Department of Biophysics, Professor Sekhar Bhattacharya, Department of Chemical Engineering, Dr. Mohua Ghosh, Division of Oil Technology and Dr. Urmia Chatterjee, Department of Zoology in the University of Calcutta.

Most of the results described in this thesis would not have been practicable without technical collaborations with different other laboratories in the region. I must offer my profound gratitude to Prof. Ashis Kr. Sen (Jr), Indian Institute of Chemical Biology, Kolkata for his unconditional support throughout my research career. I would also like to convey my sincere thanks to Prof.
Tanmoy Bera, Head, Department of Pharmaceutical Technology, Jadavpur University, Prof. Tapan Kumar Pal, Professor, Department of Pharmaceutical Technology, Jadavpur University and Dr. Nahid Ali, Indian Institute of Chemical Biology for their guidance and meticulous intellectual inputs in different biological evaluations of this work.

I would like to thank my fellow lab-mates Mrs. Ria Pal, Mrs. Tabassum Hossain, Mr. Sumanta Kr. Ghosh, Md. Farooq Abdullah, Mr. Asim Halder, Mrs. Helen Chattopadhay, Mr. Amit Dey, Mr. Sagar Bhaya, Mr. Soumyabrata Das, Mr. Joydeep Bit, for providing a supportive and intellectually stimulating environment. A bouquet of thanks goes to my dearest seniors Dr. Md. Ataul Islam for his distinguished helping nature, Dr. Runa Ghosh Auddy and Dr. Shuchi Nagar for their friendship and encouragements. I owe a special note of thankfulness to Mr. Subodh Giri and Mr. Amit Chatterjee, Laboratory Technical Staffs, Department of Chemical Technology, University of Calcutta for their always unfailing assistance.

Finally and most importantly I would like to thank my beloved husband Dr. Partha Roy who always exchanged my tears with his smiles. His thoughtful tit-bits, quite patience and unwavering love were undeniably a great support in all my struggles and frustrations. I thank my parents Dr. Mrs. Ashima Das and Dr. Ganapati Das for their unconditional love, concern, support and continuous inspiration. Their approach to my career building and their sacrifice as and when required eased my rise to this uphill phase of my life. My success in research is my worship to my parents in the sacred altar of my heart. I feel proud to shower my love for my little brother and my best buddy Jyotirmoy Das, who always danced in my happy moments and constantly ventured to blow my miseries away. I am also thankful to my in-laws who supported me in their best possible ways for a successful completion of my work.

I also like to acknowledge the contribution of all who have assisted and taught me during my research tenure but whose names have been missed out on account of my mistake.

Above all, I owe it all to Almighty God for empowering me with wisdom, health and mental strength to undertake and logically conclude this research studies.
