Acknowledgements

In this auspicious moment, I praise and thank The God Almighty for His blessing and guidance throughout the period of my research and for initiating new thoughts and never emptied courage in all my attempts towards my research activities.

I am profoundly grateful to my excellent advisor Dr. T. Kathirvalavakumar, Associate Professor and Head, Research Department of Computer Science, V.H.N. Senthikumara Nadar College, ViruduNagar. He is an endless source of inspiration and knowledge, and has provided invaluable guidance, counsel and encouragement. He is brilliant and visionary, yet humble and very accessible, and always willing to answer my doubts. He provides me the ideal balance of freedom to pursue my own ideas, and guidance to steer me in the right direction all through this research.

I also express my heartful thanks to Prof. Dr. Hepzibah Jeyakumar, Associate Professor and Head in Mathematics Department, Sarah Tucker College, Tirunelveli for her intellectual support and guidance in the field of Mathematics, especially in statistical analysis. Also I wish to put on record the enormous debt of gratitude to Dr. R. Rajendra Prasath, Indian Institute of Technology, Kharagpur, who shared the refereed articles and tools related to this research, which gave me a better insight on acquiring my own results. I owe to several anonymous referees of our research papers that were appeared in various international Journals, who provided me invaluable feedback concerning the convergence of our proposed technical aspects.

In this unique opportunity, I would like to express my sincere thanks to our
Principal, Sarah Tucker College, Tirunelvei, who allowed me to do the Ph.D and showed her keen interests on me. Also I feel pleasure in expressing gratitude to my colleagues for their constant love and encouragement to carry out the research. Particularly I wish I would never forget the company and memorable time I had from my fellow research scholar and friend Mrs.Princy SuganthiBai. Also I would like to thank all the Staff of Department of Computer Science, V.H.N. Senthikumara Nadar College, ViruduNagar, who helped me directly or indirectly to undertake this research work.

Most importantly, I would like to dedicate my whole hearted gratitude to my beloved husband Mr.Glady Eswararaj for all his positive encouragement during the long period of my research work. He pushed me when it was important but also had an understanding to let me relax. Without his love, patience, motivation and support, I would not have been able to accomplish my goals in my research. Especially I owe to my children Master Gaius and Miss Genis who really allowed me to do what I want during the research period.

I am especially indebted to my only brother Mr.Daniel Masilamani for his constant support and appreciating words, which are effective stimulus to this research programme. I would like to thank my parent and parent-in-law for all their love, support, prayer and for their unwaxing encouragement over the years to carry out the research.
