Abstract i  
Acknowledgement iii  
List of Publications v  
List of Figures x  
List of Tables xii  

1 Introduction 1  
1.1 Knowledge Discovery 1  
1.2 Classification 3  
1.3 Data Preprocessing 5  
1.3.1 Data Discretization 5  
1.3.2 Discretization Methods 7  
1.4 Neural Networks 8  
1.4.1 Basics of ANN 9  
1.4.2 Topology 11  
1.4.3 Training Data Selection 12  
1.4.4 Neural Networks Learning 13  
1.5 Neural Networks Pruning 15
### 1.6 Rule Extraction

1.7 Related Works

- 1.7.1 Discretization Algorithms
- 1.7.2 Pruning Algorithms
- 1.7.3 Rule Extraction Algorithms

1.8 Present Work

### 2 A New Discretization and Pattern Selection Method for Classification in Data Mining using Feedforward Neural Networks

#### 2.1 Introduction

#### 2.2 Discretization Method - MDC

#### 2.3 Pattern Selection (PS) Method

#### 2.4 Experimental Evaluations

- 2.4.1 Datasets
- 2.4.2 Results
- 2.4.3 Comparison of Discretization Schemes

#### 2.5 Conclusions

### 3 A New Discretization Algorithm based on Range Coefficient of Dispersion and Skewness for Neural Networks Classifier

#### 3.1 Introduction

#### 3.2 DRDS Discretization Method

- 3.2.1 Initial Discretization Scheme (IDS)
- 3.2.2 Final Discretization Scheme (FDS)

#### 3.3 DRDS Discretization Algorithm

#### 3.4 Experimental Evaluation

- 3.4.1 Results
- 3.4.2 Comparison of Discretization Schemes

vii
6.2.1 Phase - I ................................. 122
6.2.2 Phase - II ................................. 126
6.3 The Proposed Algorithm .................... 132
   6.3.1 The RxREN Algorithm .................. 132
   6.3.2 Evaluation Criteria ..................... 135
6.4 Results & Discussions ..................... 136
   6.4.1 More Experimental Results ............. 142
   6.4.2 Comparison of Rule Extraction Methods .... 147
6.5 Conclusions ................................ 151

7 Conclusions & Future Work .......................... 153

Bibliography ................................. 159
