<b>List of Abbreviation</b>	I-II
<b>Acknowledgement</b>	III-IV
<b>General Remarks</b>	V-VI
<b>Part 1: Palladium Catalyzed Intramolecular Arylamination Reactions: Efficient Synthetic Route to Dibenzoxazocine Derivatives.</b>	
<b>Chapter 1: A Short Review</b>	1
1.1.1. Introduction	2
1.1.2. Review of Earlier Literature	3
1.1.2.a. Palladium Catalyzed Intermolecular C-N Bond Formations	4
1.1.2.b. Palladium-Catalyzed Intramolecular C-N Bond Formation	10
1.1.2.c. Mechanism of C-N Bond Formation Reactions with Chelating Phosphine Ligands	13
1.1.2.d. Mechanism of C-N Bond Formation Reactions with Monodentate Phosphine Ligands	14
1.1.2.e. Supremacy of Chelated Phosphine Ligands over Monodentate Phosphine Ligands	16
1.1.3. Biological Activities of Dibenzoxazocine and Analogous Compounds	18
<b>Chapter 2: Synthesis of Dibenzofused Oxazocines Using Buchwald-Hartwig Intramolecular C-N Bond Formation Reaction</b>	
1.2.1. Background of the Present Work	21

<b>1.2.2. Results and Discussion</b>	
1.2.2.a. Benzylation of Salicylaldehydes	22
1.2.2.b. Synthesis of Precyclization Amine Precursors	23
1.2.2.c. Synthesis of Dibenzannulated Oxazocine Derivatives	24
1.2.2.d. Binding Studies Using Dibenzannulated Oxazocine Derivatives	28
<b>1.2.3. Conclusions</b>	<b>30</b>
<b>1.2.4. Experimental Section</b>	<b>31</b>
<b>1.2.5. References</b>	<b>42</b>
<b>Chapter 3: Supporting Information Section</b>	<b>49</b>
(Some important spectra of the compounds described in this part)	

**Part 2: Copper Catalyzed Intramolecular C-N Bond Formation Reactions: Efficient Synthesis of Benzimidazole Fused Dibenzodiazepines**

**Chapter 1: A Short Review**

<b>2.1.1. Introduction</b>	<b>63</b>
<b>2.1.2. Review of Earlier Literature</b>	<b>64</b>
2.1.2.a. Copper-Catalyzed Intermolecular Arylamination Reaction	65
2.1.2.b. Copper-Catalyzed Intramolecular Arylamination Reaction	70
<b>2.1.3. Biological Activities of Dibenzodiazepines and Analogous compounds</b>	<b>75</b>

**Chapter 2: Copper Catalyzed Intramolecular Ullmann Amination Reaction: Synthesis and Photophysical Study of Benzimidazole Fused Dibenzodiazepines**

<b>2.2.1. Background of the Present work</b>	<b>77</b>
<b>2.2.2. Results and Discussion</b>	
2.2.2.a. Synthesis of <i>N</i> -(2-nitro) Arylated Benzimidazoles	78
2.2.2.b. Synthesis of <i>N</i> -(2-amino) Arylated Benzimidazoles	79
2.2.2.c. Synthesis of Benzimidazole Fused Dibenzodiazepines	80

2.2.2.d. Photophysical Study of Benzimidazodibenzodiazepine Derivatives	82
2.2.2.e. Electrochemical Measurements of Some Selected Benzimidazodibenzodiazepine Derivatives	87
<b>2.2.3. Conclusion</b>	88
<b>2.2.4. Experimental Section</b>	89
<b>2.2.5. References</b>	105
<b>Chapter 3: Supporting Information Section</b> (Some important spectra of the compounds described in this part)	111
<b>Part3: Synthesis of Imidaole fused Benzodiazepines Using Palladium Catalyzed Intramolecular Arylamination Reaction</b>	
<b>Chapter 1: A Short Review</b>	
<b>3.1.1. Introduction</b>	137
<b>3.1.2. Review of Earlier Literature</b>	138
<b>3.1.3. Biological Activities of Imidazobenzodiazepines and Analogous Compounds</b>	140
<b>Chapter 2: Efficient Synthesis of Imidazole Fused Benzodiazepine Using Buchwald- Hartwig Intramolecular C-N Bond Formation</b>	
<b>3.2.1. Background of the Present work</b>	142
<b>3.2.2. Results and Discussion</b>	
3.2.2.a. Synthesis of <i>N</i> -benzylimidazo-2-carbaldehyde	143
3.2.2.b. Synthesis of Imidazo <i>N</i> -alkylated Amines	143
3.2.2.c. Synthesis of Imidazobenzodiazepines	145

<b>3.2.3. Conclusion</b>	149
<b>3.2.4. Experimental Section</b>	150
<b>3.2.5. References</b>	167
<b>Chapter 3: Supporting Information Section</b>	173
(Some important spectra of the compounds described in this part)	
<b>Part4: Lewis Acid Catalyzed One-Pot Multicomponent Reaction: Synthesis of Aminobenzofurans</b>	
<b>Chapter 1: A Short Review</b>	
<b>4.1.1. Introduction</b>	202
<b>4.1.2. Review of Earlier Literature</b>	203
<b>4.1.3. Biological Activities of Imidazobenzodiazepines and Analogous Compounds</b>	207
<b>Chapter 2: Lewis Acid Catalyzed One-Pot Selective Synthesis of Aminobenzofurans and <i>N</i>-alkyl acetamide Derivatives: Product Dependence On the Nature of Substituents in Aniline</b>	
<b>4.2.1. Background of the Present work</b>	209
<b>4.2.2. Results and Discussion</b>	
4.2.2.a. Synthesis of Aminobenzofurans	210
4.2.2.b. Formation of <i>N</i> -alkyl-2-aryl-2-(arylimino)acetamide Derivatives	211
<b>4.2.3. Conclusion</b>	216
<b>4.2.4. Experimental Section</b>	217
<b>4.2.5. References</b>	225
<b>Chapter 3: Supporting Information Section</b>	231
<b>List of Publications</b>	242
