ACKNOWLEDGEMENT

I look upon gratitude as one of the noblest human attributes. Hence for me thanks given is not a mere formality but an exception of grateful heart. For this reason, I express my heart felt thankfulness to all those who have helped me in various ways. I lack words, appropriate and adequate, to express my high sense of gratitude to Prof. S.A. Sonawane, who was gracious enough to accommodate me under his able guidance. I have benefited immensely from his rich experience and profound knowledge of the subject. The success and achievement of the research work is purely the result of his dedicated efforts.

I am also deeply indebted to all the experts who enriched the research work with their valuable expertise. Without their incredible tireless participation in the process, the mission would have been impossible to accomplish. The support and guidance provided by Prof. P. K Sahoo, Prof. V.R Shirgudkar, Principal C.G Vaidya, Prof. Harichandran, Dr. Kavita Sallunke, Prof. V. Sudhakar, Mrs. Uttara Jadhav, Dr. Padmini, Dr. Gopal Pradhan, and Dr. N. Pradhan to name a few, made the whole process smooth. Howsoever the ceremony of naming just a few, by any means does not tend to over shadow the courtesy and gesture shown by all those who contributed in my success. I take this much awaited opportunity today to pay off my most sincere regards to all renowned personalities.

The work could not have been completed without the tireless and voluntary contributions by the experts, Mrs. Shantala, Mrs. Rohini Vacher, Dr. Shilpi Singh, Dr. Usha Bhatnagar, Dr. Richa Mohan Gobburu, Dr. Vinod Kabra, Mrs. Beena Bhatnagar, Mr. Ashutosh Pathak, Mrs. Rinku Nangia and Dr. Sweta Kamat in assessing the schools. At the same time I also would like to take the privilege of thanking the schools for their generous help in the facilitation of my research work. Though revealing the names of the schools would be against the research ethics, but I would like to convey my most sincere gratitude to all for having being so supportive and understanding.

I am herewith grateful to all the senior leaders, teachers, students and parents for participating and providing good assistance to complete assigned research activities on time. The precious time devoted from their compact schedule definitely certifies their generous attitude towards the education community.
The submission of the thesis would have been a highly tedious process without the abundant cooperation and help extended by Dr Megha Uplane, Ms. Gita Kamble, Ms. Smita, Mr. Digge and Mr. Amol. I thank them for their precious time and consideration.

I would also like to acknowledge the Malcolm Baldrige Education Criteria for Performance Excellence (2007-2008 & 2008-2009) that has been referred and consulted for the present research work undertaken. (www.Baldrige.nist.gov/PDF_files_2009_2010_Education_criteria.pdf)

My utmost sincere concern to my husband Dr. Upendra Bhatnagar, father-in-law Surendra Bhatnagar and mother-in-law Kiran Bhatnagar, who extended ungrudging help and whole hearted co-operation in the course of my entire study, and my son Sanskar, who shared with me the rigors and tedium of the whole process of research, for which I feel more than I say.

My thesis is really the labor of love entirely because of the care and concern; I shared with my parents Ajit Kumar Bhatnagar and Veena Bhatnagar. They stood by me and inspired me during all stress and strains, ups and downs. My key family member Rajiv, Shilpi, Amulya, Deepika, Sankalp Pratibha, Achindra, Shweta, along with Palash, Kunal, Nikita and Shradha behaved and sweetened my labor.

(ANJALI BHATNAGAR)
