LIST OF PLATES, FIGURES AND TABLES

Plate 1 Photomicrograph fatty liver: Ballooned liver cells, inflammation, Mallory bodies, pericellular fibrosis. Masson's trichrome stain, cells with megamitochondria. Fatty liver: gross appearance, autopsy specimen.

Plate 2 Sonogram of a fatty liver showing increased echotexture. Geographic fatty liver MRI image. Steatosis and Fibrosis following amiodarone therapy (unenhanced CT image). Severe fatty liver in lipodystrophy (MRI image).

Figure 1 Structure and domains of adiponectin.
Figure 2 Identification of a family of adiponectin paralogs.
Figure 3 Genomic regions, transcripts, and products.
Figure 4 Genomic context: Chromosome: 3; Location: 3q27.
Figure 5 Insulin Receptor Signaling.
Figure 6 Phenotypes of the insulin receptor (IR) and insulin receptor substrate (IRS) knockout (KO) mice. IGF-1, insulin-like growth factor-1.
Figure 7 Pathogenesis of NAFLD involves several pathways independent and cross talking and involves several proteins.
Figure 8 The agreement between WHO, EGIR and NCEP definitions.
Figure 9 Body Mass Pattern in NAFLD versus Controls.
Figure 10 ROC Curve to demonstrate a BMI of 23 as the threshold for NAFLD.
Figure 11 Comparison of ATP III and modified ATP III criteria: the number of positive criteria in NAFLD patients.
Figure 12 The analysis of the components of MS and measures of obesity using ROC curve.
Figure 13 Patient groups versus control shows significant difference in the frequency of Metabolic Syndrome.
Figure 14 Serum Adiponectin in NAFLD and Cryptogenic Cirrhosis.
Figure 15 Serum Leptin in NAFLD and Cryptogenic Cirrhosis.
Figure 16 Serum Resistin in NAFLD and Cryptogenic Cirrhosis.
Figure 17 Serum TNF-α in NAFLD and Cryptogenic Cirrhosis.
Figure 18 Serum adiponectin-lean versus over weight NAFLD patients.
Figure 19 The common SNPs in adiponectin gene.
Figure 20 Master Map Contig: Blast Hits showing Regions on APM 1PCR amplified.
Figure 21 PCR products: Gel Electrophoresis Images.
Figure 22 DNA sequence electrophorograms demonstrating SNP rs2241766
