Acknowledgements

First of all, I would like to express my sincere gratitude to my respected supervisors, Professor (Dr.) Samarjit Sengupta and Professor (Dr.) Abhijit Chakrabarti, for their inspirational and affectionate guidance, endless encouragement and help without which it would have been impossible to complete this entire work.

I express my sincere thanks to all respected faculty members of the Applied Physics Department, especially Professor (Dr.) Goutam Sarkar for continuous encouragement, Professor (Dr.) Anish Deb for his continual support, Dr. Jitendranath Bera for his unending endorsement and Dr. Madhuchhanda Mitra and Dr. Sumana Choudhury for their everlasting help.

My thanks also go to Dr. Surajit Chattopadhyay, Dr. Arghya Sarkar and Ms. Priyanka Roy for their assistance in my research work.

I would like to acknowledge the encouraging support of Management of Techno India, Salt Lake, West Bengal, India for completing my research work. I am indebted to Professor (Dr.) S. Bhattacharya, Principal, Techno India for his continuous motivation during the tenure of my research. My thanks and appreciations also go to my colleagues for their unconditional help and people who have willingly helped me out with their abilities.

I am indebted to Mr. Sandip Chanda for his useful timely suggestions to implement his works, which were helpful to develop the new algorithms and establish the novelty of the presented works. I also extend my heartfelt thanks to Sandip for conferring his valuable time to complete this work.

All I should never forget about the best wishes and blessings of my parents, Smt. Gita Sen and Sri Samar Sen, concerning this venture of pursuing Ph.D. work at this juncture of my career.

Last, but certainly not the least, that matters most pursuit of my Ph.D. work are my aunty, Nupur-pisi for her cordial encouragement and cooperation and Monaj for allowing me to devote time for the completion of this work when he needed me most.
