Acknowledgements

First of all, I would like to express my deepest gratitude to my supervisor, Professor C. A. Murthy, Professor of Machine Intelligence Unit of Indian Statistical Institute, for his guidance and encouragement which have been central to the completion of this research work. He broadened my views and taught me how to focus on research problems and how to arrive at solutions.

I am grateful to the members of the Ph. D committee of the Department of Computer Science and Engineering, University of Calcutta, who after my formal seminar presentation, have kindly recommended the submission of the research work for the award of the Ph.D. (Tech) degree of the University of Calcutta.

Special thanks are due to the creators and providers of the several color, IR, and gray level image datasets, which helped me a lot in designing experiments.

My thanks also to the Director and other colleagues of Academic Staff College, University of Calcutta for their encouragements and for providing facilities of creating live face dataset.

Special thanks to all my friends for their whole hearted supports and for all enjoyable moments they have shared with me.
