Acknowledgements

With much pleasure I do hereby introduce my thesis which is the partial outcome of my research work. In this connection, I take the opportunity to acknowledge all the persons who have accompanied and supported me in this journey.

To begin, I express my sincere gratitude to my supervisor, Dr. Gautam Gangopadhyay without whose limitless support and proper guidance this work would not have been materialized. He encouraged me to think and work independently, allowed enough space to approach a problem from my viewpoint and gave fruitful suggestions to guide my thoughts.

I feel myself lucky to have some good friends, seniors and juniors throughout my tenure at the S. N. Bose National Centre for Basic Sciences. I particularly mention Biswajit Guchait, Kinshuk Banerjee, Amit Das, Ambika Prasad Jena, Prashant Singh, Arghya Dutta, Sreemoyee Mukherjee, Anirban Karmakar and Krishnendu Pal. They have helped me in various occasions both academic and non-academic needs. I am specially grateful to my senior Kinshuk Banerjee whose collaboration has helped me very much in this thesis.

I thank Professor Arup Kumar Raychaudhuri, Director, S. N. Bose National Centre for Basic Sciences, Kolkata for providing a vibrant research atmosphere. I express my gratitude to all the Deans and Registrars who held the chair during this period. I also thank all the academic and non-academic staff members of this centre for their assistance and active co-operation.

My family is the source of all my strength and inspiration. My parents, my elder sister and brother-in-law always helped to proceed with my studies protecting me from external perturbations. I am also grateful to my girl friend Anupa who has encouraged me always in my research and give me the mental support.

I have learnt a lot from my beloved teachers during my entire student life. Here I want to particularly mention my University teacher, Professor Ashok Kumar Mukherjee who arouse my love and interest for chemistry. I am also thankful to the faculties of the department of chemistry, University of Burdwan and Hooghly Mohsin College whose wonderful teaching helped to shape my thoughts and future plans.

Finally, I acknowledge the Department of Science and Technology, Government of India and S. N. Bose National Centre for Basic Sciences for the financial support to carry out my research and related activities.
