Trough : The Guide Prof. Dr. A.P. Deshpande, Ph.D., Pune.

Sub : Application for Admission to Ph.D. Course.

Respected Sir,

I would like to bring to your kind consideration that I have selected the following topic for my Ph.D. work. The abstract of the Research is furnished below:

Title of Dissertation: Evaluation of Antipeptic ulcer action of 'Glycerrhiza Glabra -Linn' - YESTIMADHU.

Name of the guide: Prof. Dr. A.P. Deshpande, Ph.D.
Name of the student: Dr. K. Pushpalatha, M.D.

Abstract of the Research Work:

Introduction:- Peptic Ulcer disease is a disorder of the digestive system with a specific type of pain during the process of digestion. It is a fairly common disease presenting mild to severe abdominal pain related with food caused by increase of stress and tension and irregular food habits. The rate of occurrence of Peptic Ulcer is increasing day by day. Increase in the number of peptic ulcer disease demand an effective, economical, easily accessible drug, to the common man who...
cannot afford to take the expensive modern medicines available in the market.

Though the treatment adopted at present in modern medicine is usually conservative in case of any complication, surgery is the only answer. Recurrence and post surgical complications are not uncommon following surgery. The drug chosen for the present study is the root of Gycerrhiza glabra Linn in the form of Ksheerapaka which acts on Amashayavrana. Detailed study of the drug will be made with standard parameters.

**REVIEW OF LITERATURE:**

The review contains relevant information regarding the drug. The relevant information of the disease peptic ulcer with literature on 'PARTNANASHOOLA' which may be equated to peptic ulcer is also reviewed.

**IMPORTANCE AND IMPLICATIONS:**

This study is intended to be of great importance as it may suggest a suitable, safe, economical Medical treatment on the disease peptic ulcer which is in one of challenges to the field of medicine.

Yours faithfully,

(Dr. R. Pushpalatha)

(Dr. A.P. DESHPANDE)
