LIST OF ABBREVIATIONS

1. INTRODUCTION	1
1.1 GENERAL	1
1.2 NATIONAL COASTAL GROUNDWATER SCENARIO	3
1.3 STUDY AREA	4
1.4 IMPORTANCE OF PRESENT STUDY	5
1.5 ORGANISATION OF THE THESIS	5
2. LITERATURE REVIEW	8
2.1 GENERAL	8
2.2 GAP AREAS	17
2.3 OBJECTIVES OF THE PRESENT STUDY	19
2.4 METHODOLOGY	20
3. HYDROGEOCHEMISTRY	21
3.1 GENERAL	21
3.2 METHODOLOGY	22
3.2.1 Water Quality Analysis	22
3.2.2 Graphical Representation of Hydrochemical Data	24
3.2.3 Multivariate Statistical Analysis	26
i. Factor Analysis	26
3.3 RESULTS AND DISCUSSIONS	29
3.3.1 Water Quality Analysis	29

i. pH	29
ii. Total Dissolves Solids	30
iii. Electrical Conductivity	30
iv. Salinity	33
v. Chloride	33
vi. Sulphate	34
vii. Total hardness	35
viii. Alkalinity	36
ix. Sodium	36
x. Potassium	37
xi. Magnesium	37
xii. Calcium	38
3.3.2 Graphical Representation of Ground Water Quality	38
3.3.3 Multivariate Statistical Approach	44
i. Factor Analysis	45
a. R- Mode Analysis - Pre monsoon Season	45
b. Q- Mode Analysis – Pre monsoon Season	48
c. R- Mode Analysis – Post monsoon Season	50
d. Q- Mode Analysis – Post monsoon season	51
3.3.4 Spatial Variation of Salinisation Factor	54
3.4 CONCLUDING REMARKS	56
4. HYDROGEOLOGY	58
4.1 GENERAL	58
4.2 GEOLOGY AND GEOMORPHOLOGY	59
4.3 ASSESSMENT OF LANDUSE/ LANDCOVER CHANGE	60
4.4 HYDROMETEOROLOGY	63
4.5 BEHAVIOUR OF GROUND WATER SYSTEM	64
4.6 WATER LEVEL CONFIGURATION	65
4.7 WATER TABLE FLUCTUATIONS	71
4.8 CONCLUDING REMARKS	73

5. DELINEATION OF AREAS SUSCEPTIBLE TO SALT WATER	
INTRUSION	74
5.1 GENERAL	74
5.2 FIELD STUDY AND DATA COLLECTION	74
5.3 METHODOLOGY	75
5.3.1 Assessment of Aquifer Vulnerability to Contamination	75
5.3.1.1 GALDIT Model	75
a. Estimation of GALDIT parameters	76
i. Groundwater Occurrence (Aquifer type)	76
ii. Aquifer Hydraulic Conductivity	77
iii. Height of Groundwater Level above Sea Level	77
iv. Distance from the Shore	78
v. Impact of Existing Status of Seawater Intrusion	78
vi. Thickness of Aquifer being Mapped	79
b. Estimation of GALDIT Index	79
c. Mapping of GALDIT Index	81
5.3.1.2 Indicators of Seawater Intrusion	81
a. Sodium / Chloride Ratio	82
b. Chloride to Carbonate – Bicarbonate Ratio	82
5.4 RESULTS AND DISCUSSIONS	83
5.4.1 Vulnerability Analysis and Vulnerability Zoning	83
i. GALDIT Model	83
ii. Indicators of Sea Water Intrusion	89
5.5 LATERAL EXTENT OF SALTWATER INTRUSION	101
5.6 CONCLUDING REMARKS	105
6. GEOPHYSICAL INVESTIGATIONS	107
6.1 GENERAL	107
6.2 ELECTRICAL RESISTIVITY METHODS	110
6.3 BASIC PRINCIPLES	111
6.4 ELECTRODE CONFIGURATIONS	111
6.5 RESISTIVITY OF GEOLOGICAL FORMATIONS	113
6.6 FIELD WORK FOR DATA ACQUISITION	113
6.7 RESULTS AND DISCUSSIONS	115

6.7.1 Preparation of Isoresistivity Map	115
6.7.2 Lateral and Vertical Extent of Saltwater Intrusion	119
6.8 CONCLUDING REMARKS	124
7. MODELLING OF GROUNDWATER FLOW AND CONTAMINANT TRANSPORT	126
7.1 GENERAL	126
7.2 STEPS IN MODELLING	127
i. Concept Development	127
ii. Selection of Computer Code for Simulation	127
iii. Definition of Model Geometry	128
iv. Definition of Cell Types	128
v. Input of Hydrogeological Parameters	128
vi. Definition of Boundary Conditions	128
vii. Definition of Initial Head	128
viii. Definition of Stresses acting upon System	128
ix. Model Run	129
x. Calibration and Sensitivity Analysis	129
xi. Verification of Model Validity	129
xii. Prediction	129
xiii. Presentation of Results	129
7.3 DEVELOPMENT OF GROUNDWATER FLOW MODEL	129
7.4 DEVELOPMENT OF CONTAMINANT TRANSPORT MODEL	130
7.5 APPLICATION OF FLOW AND CONTAMINANT TRANSPORT MODELLING	131
7.5.1 Data Used	131
7.5.2 Discretisation of Study Area	135
7.5.3 Boundary Conditions	137
7.5.4 Model Calibration	139
7.6 RESULTS AND DISCUSSION	139

7.6.1 Calibration	139
7.6.2 Simulation of Groundwater Head	141
7.6.3 Development of Water Table Contours	142
7.6.4 Prediction of Groundwater Heads	143
7.7 CONTAMINANT TRANSPORT MODELLING	144
7.7.1 Calibration	144
7.7.2 Simulation and Prediction of Seawater Intrusion	146
7.8 IMPACT OF URBANISATION ON GROUNDWATER HEADS AND SEAWATER INTRUSION	151
7.8.1 Scenario I - Increase in Pumping Rate for Every Year by 1%	151
7.8.2 Scenario II- Reduction in Recharge	151
7.8.3 Scenario III- Effect of Sea Level Rise on Seawater Intrusion	152
7.8.4 Study on the Effect of Urbanisation	152
7.9 CONCLUDING REMARKS	163
8. MANAGEMENT OF COASTAL AQUIFERS BY OPTIMISATION MODEL	165
8.1 GENERAL	165
8.2 SIMULATION-OPTIMISATION APPROACH	165
8.3 OPTIMISATION	166
8.3.1 Steps in Optimisation	166
8.4 GENETIC ALGORITHM	167
i. Parameter Encoding	169
ii. Generation of the Initial Population	169
iii. Evaluation of the Strings	170
iv. Selection of the Strings for Reproduction	170

v. Crossover of the Selected Strings	171
vi. Mutation of the Strings	171
8.5 DEVELOPMENT OF OPTIMISATION MODEL	172
8.6 RESULTS AND DISCUSSION	177
8.7 CONCLUDING REMARKS	182
9. SUMMARY AND CONCLUSIONS	183
9.1 SUMMARY	183
9.2 CONCLUSIONS	184
9.3 CONTRIBUTIONS FROM THE PRESENT RESEARCH WORK	186
9.4 SCOPE FOR FURTHER STUDIES	187
REFERENCES	188
APPENDIX A1	i
APPENDIX A2	v
APPENDIX B	ix
APPENDIX C	xv
LIST OF PUBLICATIONS BASED ON THE RESEARCH WORK	xix
