Chapter 1: Introduction	
1.1 General Introduction.....	1
1.2 Basic Terminology & Definition.....	8
1.3 Literature Review.....	16
1.4 Overview of Thesis.....	18
Chapter 2: Construction of Group Divisible Designs	
2.1 Introduction.....	21
2.2 Methods of Constructions.....	25
2.2.1 Regular and Semi-regular GD using SBIB design and difference sets of BIB designs.....	25
2.2.2 Semi-regular GD design using resolvable BIB design.....	44
2.2.3 Singular GD designs from another singular GD design.....	46
Chapter 3: Construction of Three-Associate-Class PBIB Designs	
3.1 Introduction.....	49
3.2 Methods of Construction.....	50
3.2.1 Rectangular PBIB design using difference sets of BIB designs.....	51
3.2.2 Rectangular PBIB design using SBIB design.....	63

Chapter 4: Construction of Partially Balanced Residual Treatment Effects Designs

4.1 Introduction.....	66
4.2 Mathematical Model.....	69
4.3 Methods of Construction.....	70
4.3.1 PBRTED is obtained using group (m, n) of GD design where n is even.....	71
4.3.2 PBRTED using group (m, n) of GD design where n is odd.....	73
4.3.2.1 Group (m,n) with $m \leq n$	73
4.3.2.2 Group (m,n) with $m > n$	75
4.3.3 PBRTED using odd set of blocks.....	77
4.3.4 PBRTED using even set of blocks.....	78
4.3.5 PBRTED using GD design where k^* is even.....	80
4.3.5.1 PBRTED with v treatments in k^* plots.....	81
4.3.5.2 PBRTED using v treatments in $(k^* + 1)$ plots.....	83
4.3.6 PBRTED using GD design where k^* is odd.....	84

Chapter 5: Construction of Partially Balanced Residual Treatment Effects

Designs for Comparing Test Treatment with Control

5.1 Introduction.....	86
5.2 Preliminary.....	88
5.3 Mathematical Model.....	90
5.4 Methods of Construction.....	90
5.4.1 CPBRTED using Singular GD designs.....	90
5.4.1.1 Singular GD design when k^* is odd.....	91

5.4.1.2 Singular GD design when k^* is even.....	93
5.4.2 CPBRTED using Semi-regular GD designs.....	95
5.4.2.1 Singular GD design when k^* is odd.....	95
5.4.2.2 Singular GD design when k^* is even.....	96
5.4.3 CPBRTED using Regular GD designs.....	98
5.4.3.1 Singular GD design when k^* is odd.....	98
5.4.3.2 Singular GD design when k^* is even.....	100

Chapter 6: Application for Diallel Crosses in Tournament Designs

6.1 Introduction.....	103
6.2 Mathematical Model.....	106
6.3 Methods of Construction.....	107
6.3.1 Complete Diallel Crosses using LSD after deleting one column where the size of LSD is odd.....	107
6.3.1.1 Generalization.....	108
6.3.2 Complete Diallel Crosses using LSD after deleting one row which is repeated in crossing plan where the size of LSD is even.....	111
6.3.2.1 Generalization.....	112
References.....	115
