Appendix-II

Questions asked to the Administrators, Doctors, Health Activists, Nurses, Receptionists, Managers, Owners and Attendants of various Nursing Homes and Private Hospitals.

History :

Who established this nursing home / hospital?

1. When was it established?
2. Who/Which body are now the present owners?
3. Why did he/ they invest on healthcare?
4. Was the doctor/group of doctors who established the nursing homes trained abroad?

Source of Funds:

5. What is the source of funds behind the establishment of this Nursing Home or Hospital?
6. Is the organization entirely private or does the government give any grant to it?
7. Do you get any subsidy from the Government for buying instruments or machineries for your hospital?

Spatial Allocation:

8. Does the building belong to the Nursing Home / Hospital authority? Who gave the land? If it is rented, who are the owners? What is the rent?
9. Is there any further construction to the building over time?
10. What are the various departments in this nursing home / hospital? Were there any addition / reduction to it over time?
11. How many rooms are there?

Bed Strength and Distribution of Beds:

12. How is the distribution of beds?
13. How many beds are there? Was there any change to it over time? (Increase or decrease in bed number.)
14. How many beds are there in ICCU/ITU?

Services and Rates:

15. What kinds of services are provided? (Ambulance, pharmacy, 24 hrs. emergency, canteen or restaurants for patient parties' libraries).
16. Does this nursing home / hospital provide any kind of specialized treatment? (Heart, Kidney, Eye, etc.)
17. Generally, which types of cases come very often in inpatient department?
18. Is there any special section for treating the gynecological problems?
19. Do you have an ICCU / ITU?
20. Is there any Out Patient Department (O.P.D.)?
21. With what type of diseases do the patients generally come in the O.P.D.?
22. Patients those who are coming in O.P.D / I.P.D. Where do they go for diagnostic services?
23. What do you serve in food? How many times are they given to the patients in a day?
24. Is there any research section? Was it there from the inception or a later addition?
25. What are the companies attached to your nursing home / hospitals for the treatment of their members / staff?
26. Do you have any plan / Scheme for the poor people?
27. Can you provide a rate chart for all the services (O.T., diagnostic I.P.D., O.P.D., I.C.U., I.T.T.U. etc?)
28. How do the services vary in respect with the bed charges?
29. What is the minimum charge for a general surgery?
30. What are the fees of the doctors in the O.P.D? Is there any card system?
31. Is there any package system?
32. Are the rates fixed? Or are the rates negotiable?

Staffing Pattern:

33. How many staffs are there (Nurses-mid wives, attendant, doctors, R.M.O. Ward boy, office staffs, receptionists, electrician, plumber, guards, driver, Cook, Maid Servants, and Sweeper).
34. How many staff treats each patient in ICU/ I TU.
35. How many paramedics generally treat a single patient in a ward or cabin?
36. Is there any outsourcing to any department?

Patients' Profile:

37. Generally patients from which socio-eco background come for treatment? Do you notice any change overtime?
38. Do you notice any substantial change in the attitude of patients over time about their preference in private health care services and distrust in public hospitals?
39. Are the patients local? Or they are coming from the distant places? Do you provide any accommodation for the patient party coming from the distant places?
40. Can you provide a ratio of patients paying from pocket or having cashless and mediclaim facilities?

Performance of the Nursing Home/ Hospital

41. What is % of patients admitted on an average in a year in the indoor department?
42. Are all the beds always filled up on an average?
43. How many patients on average come here per day in the OPD
44. What is the % getting completely cured?
45. What is the mortality rate?
46. Can you provide any instance where the patient party is shifting the patient to other place for getting better treatment or dissatisfied with the care or financially weak to afford the treatment?
47. What is the profit you earn in a year on an average? Was there any increase to it over time?
48. Do you give the salary to your staff from the money that you earn from the patients or is there any other fund?
49. Do the patients come here by choice or they are admitted by the suggestion of the doctor ?
50. What type of nursing home or hospital is this?

Patients' Perception about the Private and Public Health Care Sector: The Idea of the Interviewee.

51. In the 1960's, 70's, 80's people used public health care for treatment mostly. Now days the percentage has declined. What is the reason behind this? What is the percentage of population in Kolkata using private health-care?
52. Do you think that mediclaim / insurance or cashless facilities helped the middle-class people to get easy access to private medical care which was expensive compared to the public?
53. Do you think that these facilities hastened the growth of private medical care in Kolkata ?
54. What is the patients perception almost the conditions of the public hospitals?
55. Even in 1960's 70's conditions were better in public hospitals but some people still used private healthcare? Which class was using it then? Now days which class go to public hospitals?
56. Where do the rural masses go for treatment? Do you think that the district hospitals, subcentres, primary health centres are serving properly to the rural patients?
57. Do you think that the public hospitals of Kolkata are over pressurized by the entry of the rural masses for treatment?
58. What is your idea about the conditions of public hospitals in Kolkata ?
59. Do you think that the expansion of big private hospitals in Kolkata in late 90's was due to the gradual degeneration of the services of the public hospital? Was there any other causes? What is the cause behind this expansion?
60. Do you notice any change in the nature or pattern of private health care in the 1960s', 1970s', 1980's, to that of late 1990s' ?
61. Do you think that healthcare in contemporary era has been converted to a lucrative business?

Appendix-III

Narrative of the Nursing Homes and Private Hospitals, which are interviewed.

Nursing Homes in late 1940's-1950's. (I have chosen only five nursing homes and one private hospital to illustrate the nature of growth and the characteristics in these decades)

- **Mother's Home.**
- **East End Nursing Home Pvt. Ltd.**
- **North Kolkata Nursing Home.**
- **Citizen's Nursing Home Pvt. Ltd.**
- **East End Nursing Home.**
- **Woodland Medical Centre**

MOTHER'S HOME¹

Address

53 A, Bhupen Bose Avenue. Kolkata - 4. Telephone Number- 0332555-5186.

Date of Establishment

The exact date of establishment was not known. The nursing home was roughly 60 years old.

History behind the growth of Mother's Home:-

This small nursing was set by Bimal Chakraborty – a renowned gynecologist who after completing his M.B.B.S. went to abroad for further studies.

Sources of Funds: -

Bimal Chakraborty invested his personal money to establish this nursing home. The profit that was incurred was spent for maintaining the staff and for the upliftment of the nursing home.

¹ Interview was given by a nurse of Mother's Home on 31.07.2007.

Services and facilities –

As a small nursing home, the infrastructure was very low. It mostly undertook gynecological cases and sometimes other surgeries like gall bladder, appendix, and hernia were also undertaken. Other services like diagnostic facilities, ambulance, pharmacy etc. were not available here.

Spatial Allocation:

The nursing home is located in a rented house. The building is actually a residential house but a portion of it was rented and restructured to set up a nursing. There are only five rooms, out of which one room is used as operation theatre. The small and narrow corridor is used as the reception and sitting arrangement (only some wooden chairs) were made for the patient party. The rooms are very small with insufficient lights.

Bed strength: -

Mother's Home is a 5 bedded nursing home. There are three rooms with single bed occupancy facility and one double bedded room. There was no increase or decrease in the number beds over the years.

Staffing Pattern:

There are total 8 staffs in the nursing home including one R.M.O. Generally two nurses looked after 5 patients.

Utilization Pattern:

Presently the nursing home hardly gets any patient. But in the early years, when Dr Chakraborti had a roaring practice, the nursing home was always filled up with patients. All the beds were occupied and sometimes-extra beds were also attached to cope with the pressure. Generally the local patients of north and central Kolkata used to visit the nursing home. The women of the affluent families of these areas, preferred a better gynecological treatment and comfort in this nursing home compared to R.G. Kar Medical College and Calcutta Medical College.

Upper middle class and middle class patients of Kolkata in the decades of 50's and 60's formed the clientele of Mother's Home. Mediclaim and cashless facilities were not entertained here.

Rate:

Rates of the cabin are mostly Rs. 500 and that of general bed is Rs. 250. The rates of operation generally ranged from Rs. 1000 to 2000 now. Initially the rates were much less.

Expansion over the years:

There was hardly any expansion of any services or even bed strength of the nursing home over the years.

Opinion of the interviewee:

The interview was given by a sister who refused to disclose her name. According to her opinion, the nursing home is presently suffering from a tremendous set back. After the death of Dr. Chakraborty the nursing home has been in a state of decay. Patients of the lower middle class or in the poverty level now come to the nursing home. The nursing home has lost its glory and prestige. Nowadays almost all the beds are vacant. Presently the nursing home is being run only for the memory of its founder.

My Observation: Mother's Home which was once a very popular nursing home of North Kolkata is now on the verge of collapse. Prior to the death of Dr. Chakraborty, patients frequently used to flock into this place. But for the last ten years it hardly gets any patient. Some times the friends of Dr. Chakraborty rarely come the nursing home for minor surgical cases. Since the successor of Dr. Chakraborty is a non-medical person, therefore, it is difficult for him to run the nursing home without a person having any professional expertise. A shift has taken place in the profile of patients also. For the last 10-15 years, upper middle class or the affluent section of the locality hardly come to the hospital. Due to the mediclaim and cashless facilities, this section preferred private hospitals where variety of facilities are available under one roof at the cost of money. Poor people and the lower middle class that are either refused in public hospitals or did not get the bed, generally come to this kind of small nursing

home. Infusion of capital along with the introduction of modern facilities and other services and further up gradation can only revive the lost glory of Mother's Home.

Date of Interview:

31/07/07

Present Owner: Ms Chandana Chakraborty is the present owner and Dr Rabindra Nath Kundu is the R.MO of the nursing home.

Present Position of the Nursing Home:

Mother's Home is in a decaying state.

Representation in the Clinical Establishment Act:

The serial number of the nursing home in the list of the Clinical Establishment Act is 404; its registration number is CE 95. The column representing the period of renewal of the license and the date of validity is kept blank.

EAST END NURSING HOME PVT LTD.²

Address:

14, Circus Avenue, Kolkata -17. Telephone number -03322471928.

Date of Establishment:

1949

History behind the growth of East and Nursing Home Pvt. Limited:

The Nursing home was established by a group of doctors in the year 1949. From mid 50's., the nursing home was converted from its partnership business to a private limited company and the name was also subsequently changed from East End Nursing Home to East End Nursing Home Pvt. Limited. In 1967, perhaps Dr. Sengupta was

² Interview with Dr G.P. Dutta on 24.07.2006.

made the managing director of the company and he was also the owner of the nursing home.

Source of Funds:

Initially the group of doctors, who were instrumental behind the establishment, gave money from their personal savings. After the transformation to a private limited company, the financial section was looked after by them. Profit that was incurred was spent for the upgradation of the nursing home and also for the salaries of the staff.

Services provided:

The nursing home only provided in patient care. No other facilities are available in this nursing home. The doctors attached to this nursing home are mainly gynecologists and general surgeons. Gynecological cases are mostly undertaken. Other surgeries including gall bladder appendix, hernia, eye etc. are undertaken. But surgeries on heart, kidney and even brain are not entertained. There is no O.P.D but doctors have private chambers for their practice in the nursing home.

Spatial Allocation:

The nursing home is located in a rented house. The rooms are arranged and partitioned to accommodate the set up of the nursing home.

Bed Strength:

Presently the nursing home has 12 beds. There are general beds, one A.C. Cabin with attached bath, one non. a.c. cabin and three cubicles. There is a fairly furnished O.T. and a labor room.

Staffing Pattern:

There is roughly 10-12 staff in the nursing home including one R.M.O. There are also casual staffs that are not included in the pay role.

Utilization Pattern:

East and Nursing Home Pvt. Ltd. is suffering from tremendous setback for the last 8 to 10 yrs. In its early years, the nursing home was over crowded with patients and extra beds were after arranged to meet the rising demand. Generally upper middle

class of South Kolkata, especially from the Ballygunge and Park Circus area were the regular patients of their nursing home. Affluent, educated, middle class women generally got admitted for their delivery cases in this nursing home. The gynecological department of the nursing home was highly renowned in those days. Mention could be made in this context that the daughter of the present Chief Minister of West Bengal, too, was born in East End Nursing Home Pvt. Ltd. But for the last ten years, the percentage of the well-to-do patients in the nursing home has been remarkably reduced. On the contrary, the local, poor, Muslim patients residing in the slum areas of Park Circus, Topsia and in the fringes of Eastern Metropolitan Bypass come to the nursing home. Generally patients are admitted in the nursing home on the basis of doctor's intimation. These doctors usually see the patients in their chambers and depending upon the patients' financial condition refer them to the nursing home which is suitable for them.

Rates:

Rate of General Bed is Rs. 100 including diet, A.C. Cabin is Rs. 450, with attached bath and Non A.C. Cabin is Rs. 300. Cubicle costs Rs. 200. The cost of surgery generally ranges from 1500 to 2000/-. Package system was also entertained and rates are mostly negotiable.

Expansion over the years:

There was no expansion of any services over time. Further, there was reduction in the number of bed strength.

Opinion of the Interviewee:

The interview was given by Dr. Gouri Pada Dutta who is one of the eminent physicians of the city and is attached with the nursing home from the time of its inception. He felt that the small nursing homes, which were established with a mission to give service to the community at nominal costs failed to cope up with the super specialty, sophisticated 'five star hotels' like private hospitals. The private health care sector in the neo-liberalised era converted health care to a commodity and it being now looked from a unifactoral approach. Private health sector thrives by ignoring the social factors like the nutrition, sanitation, environment and hygiene of the community at large.

The idealistic standpoints of these nursing homes were totally dismissed. In the new aura of health care culture the interpersonal relationship between the patient and the doctor was devalued. Dr Dutta recounts that in 60's and 70's East End had a good name and major surgeries were also attended here. Moreover, it has been observed that with the increase in affluence, the demand for more facilities and services from the health care sector have rapidly increased. People demand everything under one roof. Small nursing homes of this category could never cope with the increasing demands of the patients and patient parties.

My observation:

Dr. Dutta's opinion about the health care scenario reveals that the entire sector is in an acute crisis. This crisis threatens the life of the individuals who are, some how or the other kept under the mercy of the medical knowledge imposed upon them by the medical personnel. Transforming health care to an industry reviewed that these small nursing homes had been displaced from their position of prestige. Presently almost all the beds are vacant. Local patients sometimes get admitted for their delivery cases at a nominal cost. Since they still have the faith upon these senior doctors of this nursing home for better care and treatment, which is unavailable in the public hospitals. As the percentage of profit is remarkably low, the nursing home authorities are thinking to close down the nursing home.

Date of Interview:

24/07/06

Present Owner:

Dr Mrs Gauri Dutta is the owner and Dr Keya Sengupta is the RMO of the nursing home.

Present condition of the Nursing Home:

East and Nursing Home Pvt. Ltd. is almost in a state of decay.

Representation in the Clinical Establishment Act:

The serial number of the nursing home in the list of the Clinical Establishment Act is 251 and its registration number is CE 865-2000.

NORTH CALCUTTA NURSING HOME³

Address:

Nothing is represented in the list of Clinical Establishment Act.

Date of Establishment :

22nd September 1950.

History behind the growth of North Calcutta Nursing Home:

Late Dr. Asru Kumar Roy and Dr. A. N. Dhole established the nursing home in the year 1948. It was registered under the Clinical Establishment Act in the year 1950. Dr. Dhole was junior to Dr. Roy and they studied in R.G. Kar Medical College. After completing M.B.B.S., Dr. Roy got an opportunity to open a nursing home in the close proximity of R.G. Kar Medical College. One of the owners of the house, where the nursing home is located, got admitted in R.G.Kar under the care of Dr. Roy. Being pleased by the treatment of Dr. Roy, she offered him to open a nursing home in her own residence. She gave one portion of her house to these two young doctors for setting up a nursing home, fully under their supervision. However, Dr. Roy and Dr. Dhole went to London for further studies and after their return in 1951, the nursing home had started its functioning. North Calcutta Nursing Home was commonly called '*Dholeder Nursing Home*' (nursing home of Dr. Dhole). The house belonged to Mohanlal Mitra and Madan Chand Dutta.

Source of Funds:

Since the Mitra family provided the house, Dr. Dhole and Dr. Ray invested their personal money to set up the nursing home. Both the doctors initially gave Rs. 5000 each to start the nursing home. Mention should be made that the property owner was

³ Interview with Dr Kalyan Ray on 21.08.2007.

kind enough to give the building unconditionally. He had taken the rent of the house, only after the admission of patients gained momentum. Gradually the nursing home upgraded itself by the profit incurred in each year.

Services and facilities:

The nursing home was initially a maternity centre. Gynecological cases were mostly attended. Diagnostic services and other facilities were not available here. It only provided in patient care. From mid 80's onward, along with the maternity cases, the nursing home started catering to other surgical cases like orthopedic, eye, E.N.T., and medical cases. Sometimes surgeons from other nursing homes often used the operation theatre of the North Calcutta Nursing Home.

Spatial Allocation:

The nursing home is situated in an old house of North Calcutta at the congested area near the five point crossing of Shyambazaar. The house was built in the colonial period and it is an excellent example of British architecture with marble flooring, dancing hall, wide staircases, long balcony and spacious portico. Since it was a residential house, some alterations were made to accommodate the set-up of a nursing home. The huge dancing hall was partitioned to accommodate 9 beds and it was made the general ward. Initially there were two chambers where two beds were accommodated. Residential quarter of both the doctors was attached to the nursing home and the doctors stayed there with their family members.

Bed strength:

There are 14 beds in the nursing home. There are cabin and special cabin.

Staffing Pattern:

There are 18 staffs in the nursing home. Visiting doctors, who are attached to the nursing home, admit their patients here.

Utilization Pattern:

In the early 1950's and 1960's upper middle class, middle class used this nursing home. The main reason behind this was that at a reasonable rate of patients could get admitted in North Calcutta Nursing home under the supervision of doctors who had

foreign degrees. Patients were generally admitted on the reference of doctors who were associated with the nursing home. Interestingly it has been observed that since the patients had immense faith upon these two renowned gynecologists, therefore, most of the time three generations of patients from the same family used this nursing home. Father, Children even the grand children were born in this nursing home. In spite of increasing affordability and easy opportunity to get access in private hospitals, many patients prefer the treatment and care of this nursing home even today. Generation wise faith upon the doctor is still prevalent. Upper middle classes are still using the nursing home for its good name and availability of efficient doctors.

Moreover, major shift in the profile of patients is not seen in the North Calcutta nursing home. Actually the nursing home is still maintaining its standard in the field of service to the mankind; therefore, the middle class and even upper middle class still use this nursing home for generations.

Rates:

Initially the individual fees of Dr. Ray and Dr. Dhole were between Rs. 8-10. The present rate chart is as follows:-

Cubicle – Rs. 250/-

Cabin - Rs. 275/-

Special Cabin – Type A – Rs. 375/-

Special Cabin - Type B – Rs. 650/-

Baby Cot Charges – Rs. 85/-

Operation Theatre Charges – Rs. 1200/- to 1200/- (major) – Rs. 900/- (semi major)

Minor - Rs. 250/- Rs. 600/-

Expansion Over the years:

Bed numbers were increased over time. Nursing Home initially catered to gynecological but from mid 90's onwards it also undertook other surgical cases on eye, ear, gall bladder, appendix, hernia and even kidney. O.T. was also modernized.

Opinion of the interviewee:

Dr. Kalyan Roy the proprietor of the nursing home is the son of Dr. Roy. Dr K Roy was born here. He felt that with the increase in the overall standard of living, demand of the patients for luxury and comfort also increased for the last 10-15 years. Due to mediclaim and reimbursement facilities, patients prefer to stay in A.C. rooms. This old fashioned nursing home fails to meet this demand. Construction of bathroom, air-conditioned rooms and even more cabins are not possible due to the building plan of this house. In order to expand the entire infra-structure, man power is required for various works. But increase in the man power, on the other hand creates financial strain. He believes that compared to other old nursing homes of Kolkata, North Calcutta nursing home is in a much better position. But at the same time, the pressure of patient reduced drastically for the last 10-15 yrs. During the time of Dr. Day and Dr. Dhole the nursing home was over crowded with patients Extra beds were arranged even in the balcony and corridors. Actually now a days small nursing homes are struggling hard to survive. The private hospitals had displaced these old nursing homes and captured their market. Added to this factor, was the insurance facilities that enabled middle class to get easy access to the expensive treatment provided by the private hospitals. Moreover, according to Dr. Ray the strict regulations of the Clinical Establishment Act, imposed by the Government of West Bengal are also a threat for the functioning of the small nursing homes. Various taxes for biomedical waste, corporation tax, increase in the trade license tax, heavily pressurize these category of nursing homes where the percentage of profit incurred is minimum.

My observation: -

North Calcutta Nursing home is now in a comparatively better position, because the nursing home is now looked upon by a doctor who was the successor of Dr. A. Ray. Along with the sentimental value of his father's memory associated with the nursing home, Dr. Roy also has the good intention to serve the poor and needy patients at nominal costs. Since the nursing home is still functioning by its name and also by the name of the two renowned doctors. Dr. K. Ray also has the utmost desire to continue this nursing home with its previous prestige and glory.

Date of interview –

21/08/07

Present Owner –

Present condition of the Nursing Home:

North Calcutta nursing home is functioning at a low pace.

Representation in the clinical Establishment Act:

There is no mention of the North Calcutta Nursing Home in the list of the Clinical Establishment Act.

CITIZEN NURSING HOME PRIVATE LTD⁴

Address : 57/1, Garcha Road. Kolkata 19

Date of Establishment –

1952.

History behind the growth of Citizen Nursing Home Private Limited.

Primarily late Dr S.K.Mitra in the year 1952 founded the nursing home .Later in 1955 a group of doctors –Dr Amiya Bose, Dr Naba Pal, Dr P.N. Chatterji set up a private limited company, and the nursing home was brought under this company. All these doctors had their personal shares in this private limited company and the nursing home was run on a partnership basis. From 1988 a new group of doctors –Dr N. Saha Mondal, Dr S.Bhowmick, Dr Paramita Chowdhury and others had undertaken the proprietorship of the nursing home and presently Dr S Bhowmick is the proprietor.

Source of Funds:

Initially Dr Mitra had invested from his personal money to the nursing home. After the handover to the private limited company, each shareholder had his or her individual contribution to the nursing home.

⁴ Interview with Dr Swapan Bhowmick on 14.11.2007.

Services and Facilities:

At the time of inception, the nursing home mostly served as a maternity home. From 1988 onwards all types of cases are attended. Common operations like appendix, gall bladder, hernia etc were undertaken. Even Cancer patients are admitted for chemotherapy treatment.

Spatial Allocation:

Citizen Nursing Home is situated in a rented house. However for the last few years owners of the house are pressurizing the nursing home authorities to vacate the house. In the year 1988, the rent was Rs 250. Presently it has increased to Rs 2000.

Bed Strength:

In the time of the establishment, the nursing had 7 beds only. There are 3 cabins and the two rooms which were partitioned into 3 cubicles.

Staffing Pattern:

Total number of staff in the nursing home including casual and permanent is 10.

Utilization Pattern:

The nursing home was established with a mission to help the lower middle class of the society. However, both the middle class and upper middle class come to the nursing home for treatment. Patients mostly come here from their previous experience. During the time of Dr Bose upper middle class patients from the surrounding areas of Hazra Road, Ballygaunge, Gariahat, Dover Lane and the posh locale of south Kolkata used to get admitted in Citizen Nursing Home. Previously all the beds were filled up but now the nursing home gets not more than 5-6 patients at a time. In recent years however there has been a shift in the patient profile. Nowadays patients from the lower income group mostly flock to the nursing home. Sometimes local slum patients also come here for minimum treatment at nominal costs. Patients are always admitted with some references of the doctors. Package systems are also entertained in the nursing home.

Rates:

The rates of the cubicles are Rs 250 per day and the cabins with attached bath are Rs 400. The charges for major O.T vary from Rs 600 to Rs 800 and minor O.T. is Rs 250 - Rs 300. Rates are negotiable in the nursing home.

Expansion over the Years:

The number of beds in the nursing home at the time of establishment was 7. From 1988 onwards the number had increased to 9. Moreover in the initial years of the nursing home, gynecological cases were mostly entertained but over the years other ailments were also treated in Citizen Nursing home.

Opinion of the interviewee:

Dr Swapan Bhowmick, the present proprietor of the nursing home feels that from 60's onwards the services of the public hospitals deteriorated and from 70's the nursing home started to flourish in Kolkata. Presently with the advent of cashless and mediclaim facilities middle class are getting easy access to the corporate hospitals. Because of which small nursing homes are suffering a set back. Moreover, he is of the opinion that sometimes as the senior doctors grew old without having a suitable successor in the medical field, the nursing homes do not get the proper financial support for up- gradation. It fails to attract the young doctors of the new generation and the patients, who particularly demand more comfort, luxury and facilities from the health care institutions. It has been also pointed by Dr S Bhowmick that patients nowadays generally think that staying in corporate hospital for superspeciality treatment is a mark of social status. The commitment on behalf of the medical personnel and of the paramedical staff has also degenerated rapidly.

My Observations:

The nursing home is now in a very bad condition. It seems that at least for the last 15 years the nursing home is very poorly maintained. Actually, it is still struggling hard in the midst of financial constraints to serve the poor people of the society.

Date of Interview:

14.11.2007.

Present owner:

No information available.

Present condition of the Nursing Home:

Citizen Nursing Home is now almost in a state of decay.

Representation in the Clinical Establishment Act:

The name of Citizen Nursing Home Pvt Ltd is not listed under the Clinical Establishment Act.

EAST END NURSING HOME⁵

Address: P-21, New CIT Road, Scheme -52, Kolkata 14. Telephone Number - 0332244-7850.

Date of Establishment:

1959

History behind the growth of East End Nursing Home:

Dr S.K. Sur Ray a renowned gynecologist of Kolkata established this nursing home. Since Dr S.K.Sur Ray worked in the public sector, so the nursing home was set up in the name of his son Dr .Deepak Sur Ray. The motive behind the setting up of nursing home was to develop his extensive practice and also to serve the community at large.

Sources of Funds:

Dr S.K.Sur Ray invested from his personal funds to establish this nursing home.

Services and Facilities:

All kinds of Obstetrics and Gynecological cases were attended in this nursing home. Emergency cases related to Obstetrics and Gynecological were also entertained.

⁵ The interview is given by Dr D.K. Sur Ray on 20.06.2007.

Spatial Allocation:

The nursing home is located in a rental house from the time of its inception. Rooms were partitioned to accommodate the set up of a nursing home. There are rooms as well as cubicles.

Bed Strength:

The nursing home has total number of 5 beds. There are three beds in a single room with attached bath facilities and there 2 cubicles.

Staffing Pattern:

Presently the nursing home has only 7 staffs.

Utilization Pattern:

The middle class and the upper middle class of Kolkata utilized the nursing home. Patients used to flock to East End Nursing Home mostly due to the reputation of Dr S.K.Sur Ray. In earlier periods, patients had a preference about the doctor but nowadays patients are keener about the name of the hospital or the nursing home and the facilities provided by them. For the last 15 years lower middle class of the surrounding areas generally come to the nursing home. This section of the society also had the feeling that the services in the government hospitals had deteriorated rapidly. So they prefer small nursing homes where they can afford and a get better treatment. Earlier, when Kolkata had not witnessed the growth of corporate hospitals, the affluent section of the society used this nursing home. In those days using private nursing home was a mark of status. Mention may be made in this context that the two children of Tushar Talukdar, the ex police commissioner of Kolkata was born here. More over the owner of the reputed shop Adi Dhakeshwari Bastralaya in Gariahat also used this nursing home for his wife's delivery. Patients are mostly admitted under the reference of the doctors who are attached to this nursing home.

Rates:

The rates for single occupancy with attached bath are Rs 380 and cubicle is Rs 310. Doctors rates are negotiable and the rate of Operation Theatre varies depending upon the nature of the operation.

Expansion over the years: There has been no expansion in any of the services of the nursing home. On the contrary the nursing home is now in a losing condition.

Opinion of the Interviewee:

According to Dr D.K.SurRay, due to the introduction of standardized and specialized treatment, the preference for the general physicians has mostly reduced. Moreover the interpersonal relation between the doctor and the patient had deteriorated rapidly. The utilization of the nursing home by the affluent section of the society in earlier periods was also a mark of social status. Similarly nowadays, utilizing corporate and big private hospitals for treatment is also a symbol of social status. He thinks that the introduction of mediclaim and insurance facilities provided the middle class an easy access to corporate hospitals. As a result, the affluent section has totally lost their interest from the smaller nursing homes which were once institutes for providing quality care. Good surgeons of Kolkata regularly used East End Nursing Home for admitting their patients. Dr Baidyanath Chakraborty had regularly admitted his patients here. The nursing home is now totally under the mercy of the economically challenged section of the society. These people rarely come to the nursing home. Thus the profit incurred in a year is not more than Rs 7000- Rs 8000. This amount is not satisfactory to maintain a nursing home with all its infra structure. Moreover the taxes and regulations imposed by the Clinical Establishment Act made impossible for small nursing homes to survive. The financial constraints heavily challenged the functioning of the nursing home. Patients hardly come here for treatment. Dr.D.K.SurRay has decided to close down the nursing home and he never thinks to invite any business group to take over the place for further up gradation of the nursing home, converting it to a commercial place for selling health care services. He is waiting for his son, who is also a doctor to return from abroad to take decision about the nursing home.

My Observation:

The East End Nursing Home has lost all its prestige and glory. All the beds are vacant and it is in an almost decaying condition. Since the nursing home was once a reputed place for gynecological cases, therefore if capital is invested for its up gradation and maintenance it will regain its previous status.

Date of Interview:

20.06.2007.

Present Owner:

Ms Anuradha SurRay.

Present Condition of the Nursing Home:

The nursing home is almost in a state of decay.

Representation in the Clinical Establishment Act:

The serial number in the list is 252 and the registration number is CE 129. Anuradha SurRay is the present proprietor and Dr D.K. SurRay is the medical officer of the nursing home according to the registration list. The last date for the renewal of license was 19.08.2007.

Along with narrating the history of these small nursing homes, it is important to trace the history of the first corporate hospital in Kolkata, since it also originated in this era. This attempt will also help to distinguish the characteristic differences between these small nursing homes and a corporate hospital which developed in a period when the idea of a 'corporate' hospital was almost in a nascent stage.

WOODLAND MEDICAL CENTRE- (WOODLANDS NURSING HOME)⁶

Address:

8/5 Alipore Road. Kolkata 27. Telephone Number 033 24567075-89.

Year of Establishment:

18th May 1944.

⁶ Interview with Mr Sanjay Tripathy (Head of Finance and Company Secretary) at Wood lands Medical Centre on 11.8.2008.

History behind the Growth of Woodland Medical Centre:

This premiere health care institute started its long journey in late British Period. It was started as Riordans Nursing Home under the syndicate of English merchants on 18th May, 1944 in Elgin Road, Kolkata. On 23rd October, 1946, Riordans Nursing Home was renamed as East India Clinic. Five companies supported the East India Clinic.

They are:

1. Andrew Yule
2. Gilander Arbuthnot and Company
3. ICI Banks
4. James Finley and company (presently Tata Tea)
5. Mc Lyod and company (old Kolkata based British Company)

These companies took the charges of the nursing home and Mr. L.P.S. Bourne was made the first chairman of the nursing home.

Source of Funds:

While the funding of the entire project is concerned, it has been stated that the donations by the corporate members were primarily the source of financial support. The building was initially started by the financial contribution of 600 members. Later due to shortage of funds, debentures were raised.

Services and Facilities:

Woodlands Medical Centre provided a range of health care services. It provided specialized care in the following departments.

- Obstetrics and Gynecology
- E.N.T.
- Ophthalmology
- Neurology
- Urology
- Neurosurgery
- Orthopedic
- General Surgery
- Cardiology
- Oncology

Super specialized departments like urology, neurology, ophthalmology and cardiology were much later additions.

Along with the inpatient department Woodlands also has O.P.D. where around 120 patients visit regularly. Doctor's fee in the O.P.D. is Rs 400 and there is no card system available for the treatment in O.P.D. Emergency service is not being provided in Woodlands but they provide 24 hrs critical care emergency. Moreover, road traffic accidents are also attended. Package systems are regularly practiced in Woodlands and they are commonly used in case of General Surgery, Bypass Surgery, Ophthalmology and Orthopaedic surgery, etc. Moreover except MRI, all kinds of diagnostic services are available in Woodland. In case of MRI, patients are referred to CMRI. Woodlands have the first Cardiac cath lab in the city.

Spatial Allocation:

On 27th October, 1950, the land, where the Woodlands Medical Centre presently stands was bought from the Koch Bihar Maharaja and the Nursing Home was formally named as Woodlands Nursing Home. On 8th January, 1958, the foundation stone was laid by Dr. B.C. Roy and subsequently the construction work of the nursing home was started.

The Nursing Home was officially opened on 17th August for public use.

Bed Strength:

Initially, the nursing home had 75 beds but the number rapidly multiplied to 198 in 1959. In October 2007 the no. of beds rose to 230. In case of ITU & ICCU, there are 50 beds (largest in the city).

Staffing Pattern:

Presently there is more than 125 staff out of which, 75% are only nursing staff. As far as the cases of medical personnel are concerned, it has been stated that most of the consultants are visiting doctors of the Nursing Home.

Utilization Pattern:

What has been gathered from the long discussion revealed that Woodland, from the time of its inception provided health services mostly to the upwardly mobile section of the populace. In contemporary days, medical insurance facilities have widened the accessibility of patients in corporate hospitals, irrespective of their financial position. But Woodlands being the first corporate hospital in Kolkata was established at a time when the usages of insurance facilities were not very common. During that period, idea of private health care sector as a whole did not take a concrete shape in the mindset of the people. Private health care sector was generally identical with small nursing homes which were again limited in number. Corporate hospital was really an exception and the nature of Woodland was not in tune with the other private nursing homes of that time. Since the cost of treatment in Woodland was high all along, therefore the affluent section can only afford to treat their patients here. This was indeed the trend in utilization pattern of Woodland over the years. But interestingly a change is noticeable in the profile of patients for the last 3-4 years. Maximum usage of medical insurances made easier for the 'middle class' to get easy access in corporate hospitals. Presently 15% patients have insurance coverage. Out of this 15%, 80 % belong to the upper middle class category. Initially prior to the influx of the insurance patients, the ratio of huge clientele in Woodlands was 40:60 where 40 % was corporate patients (treated as cashless) and the rest 60% is pocket payers. Woodland receives 40% corporate patients as many big companies are like T.C.S,C.T.S,TISCO,BATA, B.P.C.L etc are all attached with Woodlands .Along with this, P.S.U,s are also sending their patients in Woodland. Mention should be made that apart from this trend, patients also come here by choice or the doctor who is treating the patient either in the nursing home O.P.D or in his private chamber used to refer the patient's treatment in Woodland depending upon the patient's financial condition in case of planned critical care.

Rates:

Bed charges: Rs 3800 (Single Occupancy)

Rs 1100 (Economy)

Rs 4000 (Super Deluxe)

Rs 5000 (Suite)

Minimum rate for package is Rs 21000 and this was charged mainly against minor surgeries like gall bladder, appendix and eye surgeries. The minimum cost of open heart and bypass surgeries is Rs 1.25 lakhs.

Expansion over the years:

Apart from the increase in the no. of beds, Woodland has expanded and diversified its services rapidly over the years. Along with the introduction of diagnostic facilities (which was an earlier addition), Woodland Nursing School was set up fifteen years back. Spatial expansion also surfaced which is evident from the substantial construction work that has come up after the completion of the first building. Two separate wings have been constructed, one of which is used to serve as the residential quarters and the other one is used for hospital purposes where new operation theatres and critical care unit were set up. In 1994, a lounge was set up and a cafeteria was also introduced in the ground floor. This was developed keeping in mind the need and comfort required for the patient parties. Nevertheless, staff canteen also caters food to the patient parties. Woodland also started a blood bank for the last five years.

Opinion of the Interviewee:

Mr. Tripathi believes that Public Health Care in West Bengal is almost in a decaying state. He thinks that the condition of public hospitals in Kolkata was much better even fifteen years back. Misappropriation of funds in public health care sector is the main cause behind the degeneration of this sector. Tripathy also feels that in West Bengal the entire primary health care sector has crumbled up. It is beyond doubt that, as far as the question of infrastructure is concerned, the private sector can never compete with the public hospitals. The quality care at an affordable price is always available in the state funded hospitals. However, shortage of work force, lack of willingness to work, predominance of the unions in the workplace and disparity between the supply and demand brought about the degeneration of the public hospitals. He is of the opinion that though the most sophisticated and up to date instruments are procured by the public hospitals, but the scarcity of efficient technicians for operating those instruments, make its usage and application inaccessible to the patients. Moreover, the misappropriation of funds and concentration on tertiary health care sector on behalf of the government damaged the primary and secondary health care. As a result, too

much pressure of patients on the tertiary hospitals failed to provide proper treatment and care to the patients.

As far as the question of private health care is concerned, Mr. Tripathy opined that this sector is meant for delivering health care only to a particular section of the society. He believes that good, hygienic and sanitized quality care is only available at the cost of money. Moreover, different kinds of services under one roof, air-conditioned lounge for the patient parties, super deluxe suites for the patients, proper canteen facilities and other elements of comforts are available in this corporate hospital. Tripathy believes that the patients and his anxious patient parties should feel relaxed and 'at home' in the medicalised atmosphere of the hospital. This is only possible for those who can afford to avail these kinds of services. He finds that health care should no longer be treated as service to the humanity at large. With the increasing price of commodities in almost all the spheres, health care can never remain an inexpensive item. He thinks that too much subsidies in health care sector reduces the quality of treatment. According to his opinion, Woodlands' aim is not to do charity to the population and this institute is open only for the affluent section of the society.

My Observation:

Woodlands stands as an exception in the domain of private health care sector that was chiefly identified with the small nursing homes in the decades of 1950's. Therefore situating Woodlands in this era bring forward certain glaring differences with the other nursing homes of that time.

However, keeping aside these differences, it can be pointed out that Woodlands had a different kind of clientele whose socio-economic profiles do not match with the patients of the small nursing homes. The corporatised and professional atmospheres of the nursing home are common phenomena in the new genre of private health care culture. Since, presently Kolkata has also witnessed the emergence of other corporate hospitals. The present researcher's perception about Kolkata's first corporate hospital is that, it denied service to the economically challenged section of the society and its authorities think that value for money should always be taken into consideration.

Date of Interview:

11.08 2008.

Present Owner: Proper Data not available.

Present Condition of the Nursing Home: The nursing home is running successfully for more than 100 years.

Representation in the Clinical Establishment Act: In the clinical establishment act Woodlands is represented as Wood lands Nursing Home instead of Woodland Medical Centre. Its serial number is 721 and the registration number is CE 226. Present proprietor is Lt (Gen) Retired HRS Kalkat. No information is available about Medical Officer and the last date of renewal of the registration.

Nursing Homes in the 1960's.⁷

- **Calcutta Maternity and Nursing Home.**
- **Northland Nursing Home.**
- **Park Site Nursing Home.**

⁷ Nursing homes in the decades of 1960's were covered in the survey are SOUTHERN NURSING HOME (established in 1962) and BELLEVUE CLINIC (estd 1967). These two institutes also exhibited two different phenomenon. Southern N.H. was established in 1962 at 86, Monohar pukur road, by Dr. S.P. Ghosh. This nursing home was started in the residential building of Dr. Ghosh. It was a 12 bedded nursing home, dealing with gynecological cases. Not much information is however gathered about this Nursing.Home. Suvomoy Ghosh one of the Director of Relief Health Care & Research Pvt. Ltd., the business group which is now the present owner says that the nursing home was under severe crisis for last 2¹/₂ years. It was closed for 1 year. Recently in August 2006 this business house which generally invests in health care has taken over the N.H. and revived it from its crisis. This group has entirely restructured all services of the N.H. & employed new staff for its functioning No. of beds increased up to 26 with 4 ICCU beds. Diagnostic and ambulance service were introduced and other department like Nephrology, Neurology, Oncology, and Orthopedic started. Presently the N.H. is in a very good condition attracting wide range of clientele from different parts of the city. It is also able to compete with the modern sophisticated Pvt. Hospitals of metropolis. Bellevue clinic established in 1967 by late MP Birala and his wife Priyambada Birla, was the first super specialty health care institute of Kolkata. It has all types of departments which are modern and equipped with state of the art technologies. In 1971 it has introduced ICCU for the first time in Private Health Care Centre of Kolkata. Actually establishment of big Pvt. hospitals with multiple facilities under one roof was not a trend in 1960's. Mentioned should be made that Bellevue exclusively attracted the business magnates and the so called upper class patients of Kolkata. As there was no insurance and Cash less facilities the middle class did not have access to this clinic. It was for the first time non medical professional especially businessman invested on health care in post 1947.

CALCUTTA MATERNITY AND NURSING HOME⁸

Address :

140, Bidhan Sarani. Kolkata 700004. Telephone Number-03325553094.

Date of Establishment :-

1963

History Behind The Growth Of The Nursing Home :

Mr. Bishnupada Banerjee established the nursing home in the year 1963. Lack of adequate information about him proved to be a hurdle in establishing whether he was a doctor or a non-medical person. This nursing home started its journey with very limited infrastructure but it never closed down. On the contrary, it managed to swim with the tide of commercialization of health services. However, at present, the nursing home has been leased out by Mr. Banerjee who was suffering from acute cardiac problems. Due to poor health conditions, he could no longer take charge of the nursing home and it was leased out to three young doctors – Dr. Ghoshal, Dr. Debashish Dutta and Dr. Joydeep Chakraborty in January 2006. These three doctors are private practitioners and are not attached to any Government hospital.

Sources of Funds :-

Adequate information is not available.

Services Provided:-

This nursing home mainly served as a maternity Clinic. Minor surgeries especially Gynaecological cases are undertaken.

⁸ The interview was given by an attendant of the nursing home and he refused to disclose his name.

Spatial Allocation :-

The nursing home is located in an old house in north Kolkata. It is a rented house situated on top of a cinema hall (Radha Cinema) in one of the most congested areas of Bidhan Sarani. The total area of the nursing home comprises of three or four rooms which is way too small. Bigger rooms are partitioned to provide space for the cabins. In all probability, a residential flat was converted to a nursing home.

Bed Strength :-

There are 6 beds in the nursing home.

Staffing Pattern :-

Total number of staff, working in the nursing home, is 7

Utilization Pattern :-

From the limited information available, it can be opined that local patients as well as patients from the distant areas (especially from the districts of West Bengal) come here for treatment. Generally, the patients of the lower income group often visit the nursing home. Sometimes patient parties also negotiate with the nursing home authorities regarding the charges. Patients are admitted based on the doctors' advice.

Rates :-

Nominal information was available regarding the rates. Rs. 200 is charged for general bed and Rs. 300 for cabin. Charges are inclusive of food.

Expansion Over The Years :-

The nursing home has not expanded at all from the time of inception.

Opinion of the Interviewee :-

The person interviewed was an attendant of the nursing home and he was working there for the last one and a half year. He was unwilling to disclose his identity as he was skeptical about my position. However, as per his opinion, the nursing home is now engaged in a battle for survival. The last one and a half year has seen a radical decrease in the inflow of patients. The occupancy rate is highly unsatisfactory and two or three beds are only occupied on an average per week. The employees of the nursing

homes are also agitated since their payments are now irregular. The attendant expressed his grievances against the nursing home authorities on behalf of other employees.

My Observation :-

It was extremely surprising to find a nursing home in such a location. This six bedded nursing home was situated in the second floor of an old building in North Kolkata. The staircase which led to the nursing home was dark with minimum light. In the first floor of the building, there were a number of garments shop and in the ground floor, there was a Cinema Hall. The main entrance of the nursing home was not at all prominent and there was none to restrict the entry of an unknown investigator. After waiting for five to six minutes in front of the reception table (without a receptionist) this attendant made his appearance. Since he was unsure about the researcher's intention, he had declined to give any information about the nursing home without the permission of the higher authorities. However, after repeated requests, he had provided some scattered information. The description of this nursing home is thus plagued with inadequate data. On the day of my visit, there was hardly any patient. Paramedical staff, Residential Medical Officers and even other employees were not visible. Presently the nursing home hardly gets any patient and is almost on the verge of collapse. Sign of decay is visible almost everywhere.

Date of Interview :-

21/08/2007.

Present Owner :-

Mr. Bishnupada Banerjee.

Present Condition of the Nursing Home :-

The nursing home is in a decaying state.

Representation in the Clinical Establishment Act :-

In the Clinical Establishment Act, the serial number of Calcutta Maternity and Nursing Home is 153. Its registration number is CE 41-95. Dr Biman Kumar Banerjee is the Medical Officer and the registration was last renewed on 02.11.1984.

NORTHLAND NURSING HOME⁹

Address :-

133, Bidhan Sarani : Kolkata.: 700004. Telephone Number: 2555 4602/ 25556802 / 2554 6398

Date of establishment :-

November, 1964.

History Behind the Growth of the Nursing Home :-

Brigadier Dr. S.K. Roy in the year 1964, (November), founded the nursing home which was initially located in Milk Colony, Belgachhia.. The nursing home was shifted to the present location after 1974. Dr. S. K. Roy was a General Physician and a Cardiologist as well.

Source of Funds :-

Dr. S. K. Roy's personal fund was used to build the nursing home.

Services Provided:-

Generally all types of surgeries are undertaken in this nursing home. Initially, cardiac and ophthalmologic surgeries were performed but presently patients in need of cardiac and eye surgeries are not admitted. The nursing home provides O.P.D (out patient department). Apart from this, ICCU and ITU have also been running since the last 15 years. Though diagnostic services and Blood Bank are not provided by the nursing home, it has ambulance and emergency services.

Spatial Allocation :-

The nursing home is located in a spacious building in rent near the five point crossing of Shyambazar in north Kolkata. Until 1974, the nursing home was in milk colony in Belgachia. The entire building is utilized for the nursing home purpose.

⁹. The interview was given by a nurse Ms S Bhattacharya.

Bed Strength :-

The nursing home presently has 14 beds including 5 in the ICCU/ITU's. These are all single beds situated either in the cabins or in the cubicles.

Staffing Pattern :-

There are around 40 staff in the nursing home Patient to nurse ratio is 10:2

Utilization Pattern :-

Patients are generally admitted in the nursing home by the reference of the doctor. The socio-economic profile of the patients is same since the beginning. Patients from both high income group and middle class background come here for treatment. The percentage of patients from the economically challenged section is generally low. Northland Nursing home receives patients from local as well as distant places. Patients come from Sunderban and other distant areas of West Bengal. A large section of patients comes from Bangladesh. The patients and the patient parties visit this nursing home mainly because of the name of the doctor. Many public sectors as well as private companies are attached to this nursing home. Upon admission, the employees of these organizations could avail the benefits of cashless treatment. With the introduction of ITU and ICCU's from 1999, the mortality rates have increased. Moreover, the new generation of doctors engaged in the nursing home failed to attract huge number of patients. The inflow of patients has diminished considerably in the recent years.

Rates :

Charges in A.C cabin with attached bath facilities are Rs. 800 and 1000. For non A.C cabin with common toilet, Rs. 500 is charged. The rates for surgeries and treatment are fixed but proper information about the actual rates was not disclosed. Package systems, on part of the doctors, are available in the nursing home. Bed charges are inclusive of food.(4 times a day).

Expansion Over The Years:-

There was no substantial expansion (in terms of constructions) in the nursing home. 5 beds were included in ICU/ITTU's in 1999. .

Opinion of the Interviewee :

The interviewee, a senior matron, thinks that the success rate of the nursing home has declined over the years. Since she has seen the glorious days of the nursing home, she feels that in recent time the doctor-patient relationship has deteriorated drastically. Both the doctors and the patients' mentality have become commercial which has affected the quality of treatment. The faith on the doctors has reduced. She opines that the patient parties are fault finders and have a tendency to blame the doctors in case of the patient's death. She sympathizes with the helplessness of the doctors in the case of deterioration of the condition of critically ill patients. According to her there are manifold reasons for the reduction in the inflow of patients in the nursing home, the primary being that with the increasing affordability, the desire for multiple services under one roof has increased rapidly. Small nursing homes do not have the infrastructure for providing other services. She further believes that the services in the public hospitals have worsened over the last three decades. The poorer sections of the society, who have no other option, go to public hospitals for treatment. She is a little biased in emphasizing the fact that small nursing homes do provide quality treatment and proper care at affordable rates.

My Observation :-

Northland Nursing home was an exception compared to the other small nursing homes of that period. It was the first nursing home that had undertaken general surgeries, apart from gynecological and obstetrics cases. Nursing homes that mushroomed in the decades of 1940's 50's and 60's were mostly maternity centers. However in course of time, they have upgraded themselves and introduced other services. But Northland had initiated all types of critical surgeries (eg, heart) from the time of its inception. As a sign of improvement and upgradation, the nursing home has introduced ICU/ITU's. This also signifies that almost all the beds are filled up on an average annually. Though the previous glory was lost, nevertheless, the nursing home is running successfully with proper maintenance and there is no sign of decay. Interviewee's attitude towards the investigator was decent and cordial.

Date of Interview :-

31.07.2007

Present Owner :

Brig(Dr) Satyajit Kr. Dey.

Present Condition of the Nursing Home:

Though the initial glory has faded, but still, it is running successfully. This particular organization has an intention to compete with the changing scenario of private hospitals which are emerging in recent times.

Representation in The Clinical Establishment Act.

The serial number in the Clinical Establishment Act is 471 and the registration number is Ce 614-00. Dr Soumitra Deb is the Residential Medical Officer. There is no mention of the renewal of licence.

PARK SITE NURSING HOME¹⁰

Address : -

70A, Purna Das Road : Kolkata:700029. Telephone Number:0332466 1229

Year of Establishment :-

January 1968

History Behind The Growth Of The Nursing Home :-

The nursing home was established by five partners – two doctors and their wives and one doctor's son. Presently there are only two partners – a doctor and his wife. The motive behind establishing the nursing home was to enhance business and to serve the community at large.

Source of Funds:-

Personal investments of the five partners were the main source of funds behind the establishment of the Park Site Nursing Home.

¹⁰ The interview was given by Dr Debasish Maitra and Dr. Amitabha Chakraborty.

Services Provided :-

Park Site nursing home used to undertake gynecological and obstetric surgeries only in the initial years. But in course of time general surgeries were also undertaken. The nursing home does not have diagnostic centre, emergency, ambulance, Blood Bank and O.P.D Service.

Spatial Allocation :-

The nursing home is located in a rented house in the southern fringes of Kolkata near Deshapriya Park. The house belongs to Mr. Bibhupada Sapui who wanted to rent the first and ground floors for nursing home purposes. Therefore the residential house has been converted to a nursing home which has only five rooms. Bigger rooms are partitioned to accommodate more beds. Even the corridor was not spared.

Bed Strength :-

Initially the nursing home had 10 beds which increased upto 19 in course of time. Presently there was a reduction in bed strength but the exact number was not known.

Staffing Pattern :-

There are roughly 10 employees in the nursing home. Electrician, Plumber and sweeper work on a contractual basis. Patient to nurse ratio is 10:2.

Utilization Pattern :-

Since the nursing home is located in one of the posh localities of south Kolkata, the patients generally used to come from the higher income category. But this trend did not continue for long. Presently local patients, especially the urban poor who are not satisfied with the Government hospitals, but have nominal money for better treatment, flock to this nursing home. Patients from different places like the district of south 24 parganas, also get admitted for the reputation of good and efficient doctors in Park Site nursing home.. Moreover the nursing home also admits street children and pavement dwellers at free of costs. Free beds are also allotted for certain N.G.Os (Pariwar, Hope, and Kolkata Rescue) which are offered to needy patients admitted through the NGO.

Rates :-

Charges of non AC bed are Rs. 275 and Rs. 550 is charged for A.C. beds Cashless facilities are not available but patients having mediclaims are admitted. However the rates for surgeries and other treatments are negotiable. Package system is also not entertained in Park Site Nursing Home. Charges are inclusive of Food.

Expansion over the years :-

The numbers of beds had increased from 10 to 19 with the rising pressure of the patients, though the number has reduced at present.

Opinion of Interviewee :-

According to Dr. Debashish Maitra, the changing demand of the patients led to the decline of these small nursing homes in the city. He recollects that in the 70's and 80's the huge pressure of the patients forced the nursing home authorities to accommodate extra beds in the corridors and sometimes even in the balcony. The doctors and the paramedical staff were unable to cope with the continuous influx of patients. But from mid 90's onwards, the scenario started changing rapidly. The rate of admission had decreased resulting to the reduction in the number of beds in the nursing home. In post independence era, apart from Woodlands and Belle Vue there was no other big private hospital. The entire city was dotted with numerous small nursing homes which provided quality care at affordable prices. He thinks that the entry of big business houses and corporate sector in health care changed the concept of health care culture converting it to a commodity. Simultaneous to this development was the increasing affordability of a certain section of social class. This upwardly mobile section no longer found the treatment in smaller nursing homes commensurate to their needs. The insurance facilities have further provided the easy access to the corporate hospital. The patient parties who are willing to pay huge amounts for proper treatment mostly demand five star facilities and all kinds of services under one roof. Their insatiable demands gradually took them away from these nursing homes.

My Observation :-

Park site nursing home was established with a mission to serve the community at large. Though it was a private health care organization, but profit seeking was not the sole intention. The nursing home is still surviving by serving the patients coming from

the lower economic strata. It is interesting to point out that members of three generations have been admitted in Park Site for their delivery. This is only because of the reputation of proper care and treatment. Moreover it was clear that in the homely atmosphere of the Park site Nursing home patients generally develop a close relationship of faith on the doctors and the nurses. The services in the nursing home have not yet commercialized.

Date of Interview :-

17/07/2007

Present Owner :-

Dr Debashish Maitra.

Present Condition of the Nursing Home :-

The nursing home is surviving in a break-even condition at present.

Representation in the Clinical Establishment Act :-

The serial number is 504 and the registration number is CE 976-02. Medical officer is Dr Debashish Maitra.

EVELAND NURSING HOME & INFERTILITY CLINIC ¹¹

Address :-

6, Southern Avenue. Kolkata : 700026 .Telephone Number:033 466 4950

Date of Establishment :-

1969

History Behind the Growth of Eveland :-

Gynecologist and ex lecturer of National Medical College Dr. Rathin Ghosh founded a small one bedded nursing home in 2, Southern Avenue in the Year 1969.

¹¹ Dr Ranjit Ghosh was interviewed in Eveland Nursing Home and Infertility Clinic.

Source of Funds :-

The professional income of Dr. Rathin Ghosh along with loan was used to set up the nursing home.

Services Provided :-

The nursing home provides multiple services, apart from the in-patient department. It has a polyclinic where the doctors do their private practice. The nursing home has pathology and radiology departments (Ultra Sound, Transvaginal sonography, X-Ray etc). Along with this, 24 hrs emergency services are also provided. The nursing home houses a Canteen which serves not only the employers, but also the patient parties.

Spatial Allocation :-

The nursing home was initially started in a rented house in, 2, Southern Avenue with only one bed. Gradually the bed strength increased to 9. In early 1980s, the present house which was initially a two storied building with a pond was bought and the reconstructions started four years later.. A multi-storied building was constructed for setting up the nursing home.

Bed Stength :-

Initially the nursing home had only one bed. The number increased to 9 in subsequent years. Presently Eveland has 24 beds. Most of the rooms are single bedded. There are only a few double bedded and A.C. rooms.

Staffing Pattern :-

There are over 100 employees in the nursing home, including eight to nine R. M. Os.

Utilization Pattern :-

As far as the utilization pattern of the Eveland nursing home is concerned, it has been deduced from the interview that in the initial years, patients from the higher income level used to come in Eveland for treatment. Presently, a drastic change is noticed in the socio-economic profile of the patient. Lower middle class and even patients from the economically challenged sections flock to Eveland. The percentage of patients from upwardly mobile section has reduced. It is important to mention that renowned actress Mousumi Chatterjee used to come to Eveland for treatment. Older patients

(not in terms of age) having connection with Dr. Ghosh residing in this locality for years, could never think of nursing homes other than Eveland. But the new inhabitants of the locality, or the new generation, attracted by the hotel like facade of huge building, serving as 'five star' health care institutes cannot think of treatment in this old fashioned nursing home. Moreover patients from Bihar, Agartala and the distant districts of West Bengal come to Eveland for the better treatment and for the reputation of Dr. Ghosh. In the beginning the bed occupancy rate was more than 60% but there has been a sharp decline in this percentage which reduced to 20% in recent years. Patients are admitted under the advice of the doctors. Sometimes they also come by choice.

Rates :-

Bed charges range from Rs. 550 to Rs. 600, depending upon the occupancy criteria. For A.C. rooms extra Rs. 15 is charged per hour. The charges for O.T also range from Rs. 500 to Rs. 2500. Cashless and mediclaim facilities are also entertained in Eveland. Presently 50% of patients are taking the benefit of cashless service. Employees of some companies like ONGC etc. are admitted under cashless scheme. Discounts are offered to the relatives of the Eveland employees. Rates are always negotiable and sympathetic and compassionate view is taken in the case of poor patients.

Expansion Over the Years :-

Substantial expansion has taken place in the Eveland nursing home since the time of its inception. The nursing home had started with one bed in the year 1969. Presently the number has increased to 24. A multistoried building was constructed to provide adequate space for the nursing home in the year 1984. Initially Eveland started its journey as a maternity home, but in course of time it has upgraded itself by appointing good surgeons from other disciplines. As a result, general surgeries like appendix, hernia, gall bladder, piles etc were undertaken. Pathology and radiology departments were also opened. Polyclinic has started since 2004.

Opinion of the Interviewee :-

According to Dr. Ranajit Ghosh, son of Dr. Rathin Ghosh, the private health care organizations had undergone a radical transformation. In the decades of 60's, 70's,

80's and early 90's the private healthcare was identified with small nursing homes. But the entry of industrialist capital in healthcare displaced these nursing homes. With the degeneration of Government Hospitals, from the mid 60's onwards, the private nursing homes were the only option to the population at large. People from the higher income group including the middle class used these small nursing homes. The services in the public hospitals were not up to their standard. Another category of patients utilized the charitable or missionary hospital like Ramakrishna Mission Seva Pratisthan and Matri Bhavan. Getting admitted in a private nursing home was also a mark of social status in those days. However, Dr. Ghosh feels that a shift has taken place in the entire utilization pattern. The upwardly mobile section now prefers corporate hospitals, while those who used to flock in charitable institutions come to these small nursing homes . These nursing homes are also being used by the lower middle class and the urban poor. Profit is the keyword in private hospitals that sprang up from mid 90's onwards. Service to the mankind is not their ultimate motive.

My Observation :-

Eveland has failed to retain its past glory. Almost all the beds are vacant and the employees, especially the nurses are sitting idle without any work. Gradually it is becoming difficult for the nursing home authority to maintain the huge infrastructure and the employees. Nominal profit has resulted in the last one year.

Date of Interview :-

26/05/2007

Present Owner :-

Dr Rathin Ghosh

Present Condition of the Nursing Home.

Eveland is in a decaying state.

Representation in the Clinical Establishment Act :-

The serial number is 248 and the registration number is CE 18-95. Dr R.N Ghosh is the Medical Officer. There is no mention of the renewal of the registration.

DR. B. N. BOSE MEMORIAL CLINIC, APOLLO NURSING HOME ¹²

Address :-

34 B Jatin Das Road : Kolkata :700029.Telephone Number: 033 466 6582

Date of Establishment :-

1969

History Behind the Growth of Apollo Nursing Home :-

Dr. Tapas Kumar Bose, settled in U. K. for the last years, established this nursing home in his own house after completing his M. B. B. S.

Source of Funds :-

Personal investments of Dr. Bose and his ancestral inheritances are the chief sources of funds.

Services Provided :-

The nursing home has an inpatient department where patients are admitted for general surgeries, orthopedic cases, general medicine cases, gynecological and paediatric cases. Psychiatric patients are also treated. The nursing home has HDD (high Dependency units) and ambulance services. Doctors make their private chambers in Apollo Nursing Home.

Spatial Allocation :-

The nursing home was started in Dr. Bose's own house with only 4 beds. In the preliminary days the nursing home started its venture in an amateurish way. The residential house was re-arranged to meet the set up of a nursing home. Fifteen rooms are being used for the nursing home purpose. The interior of the house was remodeled to upgrade the nursing home.

¹² Dr Soumyendranath Mitra was interviewed.

Bed Strength :-

Presently Apollo Nursing Home has 30 beds. With the increasing demand of patients, bed strength has gradually increased from 4 to 15, then to 23 and finally to 30. There are general beds, twin sharing ones and A.C suits as well to meet the choice of the patient from different socio – economic strata.

Staffing Pattern :-

More than 40 employees including 7/8 R. M. O.'s are attached with Apollo Nursing Home. Apart from this a trustee was formed to look after the administration and management of the nursing home. The ratio of patient to nurse is 10:1

Utilization Pattern :-

Middle case, lower middle class and patients from the lowest economic strata come to this nursing home for treatment. In the early 70's and 80's the affluent section also used to visit this nursing home. But this percentage has declined, since this section has a preference for corporate hospitals. CESC is attached with this nursing home and the employees of this organization can avail the cashless facilities. Local patients, residing at the peripheral areas of Kolkata are mostly admitted by the reference of the doctor, attached to the nursing home.

Rates :-

Bed charges in Apollo Nursing home varies from Rs. 350 to Rs. 1500. Rs. 350 is charged for general bed and Rs. 1500 is the cost of an A.C. Suite. Minimum charges for minor O.T. for 1 hr are Rs. 1200. Separate charges are fixed for anesthesia, medicine and instruments if required.

Expansion Over the Years :-

As far as the bed strength is concerned, the number had multiplied over the years. Initially the nursing home was started with 4 beds. Presently the total number of beds is 30. Moreover, ambulance service and private chambers for the doctors were introduced in subsequent years. Nevertheless, a trustee was formed to revamp the functioning of the nursing home which suffered a setback from 1998 – 2003 due to shortage of funds.

Opinion of the Interviewee :-

Dr. Soumyendranath Mitra, the anesthetist of Apollo Nursing Home, thinks that the decline of the family physician's concept devalued the ethics of health care. The personal bondage with family physicians in one hand (who was a general practitioner) and his own nursing home on the other was considered as the best place for treatment. Healthcare has been now considered as one of the most important consumable products. The survival of small nursing home depends upon the source of capital. If the son is also in the medical profession and if he has the sentimental linkage with his father's nursing home, then it will survive. Infusion of capital, needed for modernization and upgradation can only improve the conditions of these category health care organizations. Tough competitions with the super specialty corporate hospitals often displace the small nursing homes. He is of the opinion that the entry of new generation of Marwaris in health care has converted it into a profit making industry.

Apollo Nursing Home had once passed through a very bad phase (1998-2003) due to financial constraints when it was on the verge of collapse. However in 2005, a trustee board was formed comprising of non-medical persons. These members provided the capital for the survival of the nursing home. Dr. Bose had a philanthropic attitude and his motive was to provide quality care to middle class patients at an affordable price. He had never taken any money from the nursing home.

My Observation :-

Presently the Apollo Nursing Home is running successfully. It has recovered from its period of crisis. This revival has only been possible due to the infusion of capital which has helped in the expansion (in terms of bed strength), remodeling and infra-structural changes in the nursing home. This upgradation has enabled the organization to compete with the new generation of nursing homes and private hospitals.

Date of Interview :

10.07.2007

Present Owner:

Shampa Basu.

Present Condition of the Nursing Home:

The nursing home is doing well at present.

Representation in the Clinical Establishment Act :-

The serial number of the nursing home is 200 and the registration number is CE 489-96. Dr. S Chattopadhyay, Dr A K Ghosh, Dr K Chakrabarty are the RMO'S. There is no reference of the renewal of registration.

Nursing Homes In The 1970'S¹³

- **Lake View Nursing Home.**
- **Dreamland.**

LIONS' ORTHOPAEDIC HOSPITAL & RESEARCH CENTRE¹⁴

Address:

141, Regent Park: Kolkata: 700040. Telephone Number: 03324710076/0210.

¹³ The other three nursing homes of this decade are REPOSE CLINIC & RESEARCH CENTRE PVT.LTD (estd 1975), BRIGHT NURSING HOME(estd 1975) and UNTED NURSING HOME (estd roughly around late 1970's). Out of these three nursing homes, Repose is in a better position. Established by Dr Mayarani Ghosh, (working in a public hospital) this nursing home at the time of inception had only 4 beds. Presently the numbers of beds have increased to 60. Nevertheless , in course of time Repose has upgraded itself by introducing various services like ITU, diagnostics, 24 hrs emergencies and specialized departments treating critical cases on oncology, cardiology, dermatology ,hematology etc. For spatial expansion, the building was bought and renovation was made to attract patients. Along with providing service the commercial side was also given equal importance. On the other hand, Bright Nursing Home and United Nursing Home were on the verge of collapse. Both the nursing homes were founded by the doctors. In case of Bright Nursing Home (established by Dr Mrs Priti Chakraborty) ,Dr S N Roy said that the small nursing homes suffered a tremendous setback due to the strict rules and regulations of the Clinical Establishment Act. Moreover presently, patients having mediclaim and cashless facilities prefer to go to private hospitals rather than treating themselves in small nursing homes. Withdrawal of patients, led to financial crisis which directly ruined the nursing home. United Nursing Home established by Dr.J. Chaudhury was one of the reputed health care institutes of Beliaghata region. It has 34 beds at time of inception and it also had diagnostic services. But after the death of Dr Chaudhuri and his contemporary doctors, the nursing home started to loose its previous glory. The financial as well as ownership problem ruined the nursing home.

¹⁴ Mr Ashok Kr Bannerji- the manager of the hospital was interviewed.

Date of Establishment:

1970.

History behind the growth of Lion's Orthopedic Hospital & Research Centre:-

Lion's Orthopedic Hospital & Research Centre is a part of the International Federation of Lion's Club. The house and the adjacent land where the hospital is located belonged to the Murarka family. They donated their entire property to the Lions who has set up the hospital.

Sources of Funds:-

Large donations by the Murarka family and funds from the other sources provided the fund for the Lions Hospital.

Services Provided :-

Lions Hospital houses both out patient and in patient departments. It has separate radiology (X-ray, E.C.G, and Ultra Sonography) and pathology departments. Physiotherapy is also available here. General surgeries (E. N.T., orthopedic, dental, ophthalmologic and medical) are undertaken in this hospital. The hospital has its own ambulance and medical store to serve the patients. Card system is available for O.P.D. patients.

Spatial Allocation :-

The Lions Hospital is located in an old fashioned garden house in the Tollygaunge area of south Kolkata. The house is remodeled and structural changes were effected over time to facilitate the set up of a health care institute.

Bed Strength :-

The hospital has 20 beds in the in patient department. (I.P.D).

Staffing Pattern :-

There are 30 employees in the hospital. As far as the patient to nurse ratio is concerned it has been told that in the daytime there are four paramedical staff in the ward including two sisters, one male nurse and one attendant. In the night, there are three paramedical staff including one sister, one male nurse and one attendant.

Utilization Pattern :-

This hospital generally provides healthcare to the downtrodden and poverty- stricken people. The urban poor patients residing in the districts of South 24 Parganas generally come here for treatment. Subsequent changes in the profile of patients have not been observed over the years. From the time of its inception, Lions received patients from the economically challenged section. Cataract patients mostly come from the district where regular eye camp is being organized by Lions.

Rates :-

Rates are mostly subsidized in Lions. In the diagnostic department prices are reasonably low. Rs. 200 is charged for minor surgeries, lenses and spectacles are provided at subsidized cost in the hospital. Card system (Rs. 20) and donation coupon are offered for treatment in the O. P. D.

Expansion Over the Years :-

Initially the Lions Hospital commenced its journey with its Outpatient Department only. However, in course of time, the vacant land lying behind the main building was acquired and other services were introduced.

Opinion of the Interviewee :-

The sole motive of the Lions Hospital (which is a part of the International Foundation of Lions Club) is to serve the community at large. Though it is a private, profit making organization, and the name is registered under the Clinical Establishment Act, but it is in no way a profit seeking hospital. The house was denoted to the Lions Club by the Murarka family in the late 1960's. The hospital serves the poorer section of the society and the authorities are unwilling to increase the rates of any service of the hospital. According to Mr. Banerjee, today the entire health care sector is being guided by the market forces. Tremendous Competition among the private, corporate hospitals displaced the smaller nursing homes which do not have the adequate capital to upgrade or modernize themselves. "Inflow of Capital" and "Profit" determine the success of any business whether it is health care or any other marketable commodity. Mr. Banerjee also thinks that with the increase in affordability, life has become more comfortable and people are moved by the façade or the 'get up' of any building. Since Lions Hospital is located in an old fashioned building and much attention was not

paid on beautification, it never attracted the upper middle class. It is generally believed that the Lions Hospital is a philanthropic organization which provides healthcare at free of cost to the needy people. But in Lions, nothing is free, though the rates are reasonable and quality services are provided to the patients.

My Observation :-

Lion's hospital is running successfully over the years since it is providing healthcare to a particular segment of the society from the time of its inception, Therefore there was no noticeable shift in the profile of the clientele. The emergence of corporate hospitals in Kolkata hardly affected the services of the Lions Hospital. Though it is not a philanthropic organization, but all the employees have a pious mission of serving the poor.

Date of Interview :-

17/05/2007

Present Owner :-

Subhash Murarka.

Present Condition of the Hospital :-

The Hospital is running successfully.

Representation in the Clinical Establishment Act :-

The serial number of Lions Hospital is 388 and the registration number is CE 880-02. Dr V S Bhutoria is the RMO. There is no reference of the renewal of the registration.

SRI AUROBINDO SEVA KENDRA (SASK).¹⁵

Address:-

501/A, Jodhpur Park. Kolka :700068 . Telephone Number : -0332472 6479 / 6485

¹⁵ The interview was given by Dr A.Dutta And Dr Kamalkali Laha.

Date of Establishment:-

1971

History behind the growth of Aurobindo Seva Kendra :-

Sadhan Dutta, the managing director of Development Consultation of India founded the nursing home in 1971.

Source of Funds :-

Economic Entrepreneurship Development Foundation, - a company investing on health, agriculture and engineering farms provided the capital for the foundation of Sri Aurobindo Seva Kendra (EEDF). The members of this company were all non medical persons (engineers) who were interested in investing on healthcare.

Services Provided :-

This premier health care institute offers wide range of service and facilities ranging from pathology, radiology, OPD, IPD ambulance, pharmacy and even cafeteria. This organization have also introduced ICCU / ITUS in recent years. Patients with almost all types of diseases and even those in need of surgeries are treated here

Spatial Allocation :-

Presently, it is located in the above mentioned address. This stretch of land, where the nursing home stands, was given by K. M. C. in 1971 but the building was constructed in 1990. Initially the nursing home was situated in 71 and 73 Jodhpur Park with minimum infra structure.

Bed Strength :-

The nursing home has 150 beds. But at the time of inception, it had only 9 beds.

Staffing Pattern :-

The exact number of employees working in SASK is not properly known. However, as the ratio of a patient to paramedical staff and doctor is concerned, rough information was gathered. In a general ward there are three doctors and a nurse who look after 10/12 patients at a time in one shift. Consultant and specialist visit often. In case of ICCU / ITU, one patient is looked after by 2/3 nurses and 4 doctors.

Utilization Pattern :-

99% patients come here by choice. Since the hospital has employed a number of doctors (Consultants and specialists) in OPD. from various disciplines of medical services, therefore SASK has a huge pressure of OPD. patients from different corners of Kolkata. It receives patients from other districts of West Bengal and also from neighboring states (Orissa, Bihar, Jharkhand). 500 patients come on an average in SASK's outpatient department. The turnover of patient in O. P. D. in the date of interview was 327. Occupancy rates in the in patient department are also high. Beds are always filled up. Adequate information was not gathered on the changing profile of patients utilizing SASK. Presently, upper middle class, middle class and lower middle class flock to SASK for treatment.

Rates :-

Adequate information on the rates of different service in SASK could not be obtained. The charges of O. P. D. card are as follows:-

For new card to a consultant in O. P. D.	– Rs. 75
For revisit to a Consultant in O. P. D.	– Rs. 55
For new card to a Medical officer with M. B. B. S. in O. P. D.	– Rs. 50
For revisit to a Medical officer with M. B. B. S. in O. P. D.	– Rs. 30
In case of referral by a doctor of O. P. D. to another doctor	– Rs. 55

Mediclaim and Cashless facilities are entertained.

Expansion Over the Years:-

Subsequent expansion has taken place in SASK since the time of its inception. Initially the organization was named EEDF (Economic Entrepreneurship Department Foundation). It was started in two rented houses – 71 Jodhpur Park and 73 Jodhpur Park as a clinic with only out patient department. Around 1973, - Pathology and radiology (only X- ray) were started along with O. P. D. In the same year, in patient department was introduced with 9 beds. Though it was a general nursing home but gynecological and obstetric cases were mostly undertaken.

In 1971, a huge area of land near Anwar Shah Road was given by K. M. C. The construction started in 1990 and entire O. P. D. was shifted to the new block in the

subsequent years. From 1993, onwards, the inpatient Department was started with 150 beds; specialized departments were opened up after recruiting renowned consultants in these departments. Radiology and Pathology Departments were also upgraded. In 1996, ITU / ICCU were inaugurated. The name Sri Aurobindo Seva Kendra was given after the shift to the present address.

Opinion of the Interviewees :-

Infusion of capital revamps the growth of any sick organization. The idea that healthcare is a 'Service' to the community at large, has acted as a negative catalyst in degenerating its quality. Too much subsidies have devalued its quality. The notion of 'free healthcare' has damaged the healthcare culture in our country. Nominal rates should be paid for any kind of service. The interviewees are of the opinion that the corporatization of health services marginalized the vulnerable section of the society to the mercy of the treatment provided by the public hospitals. But hospitals like SASK and some others of this category provides quality care at reasonable price. This organization is also sympathetic towards the poorer section and often considers their case.

My Observation :-

It is surprising to notice that SASK flourished at the expense of government's direct supports. The land where the present building stands was being provided by Kolkata Metropolitan Corporation. Moreover it has been interesting to notice that, SASK is a health care organization which was started by a non – medical person and funds are being provided by a group of engineers. Doctors who were attached here just served as employees. Personal sentiments were not present even in the initial years. So the doctor – entrepreneur concept started to erode from 1970's onwards in Kolkata. SASK (EEDF) is thus the first of its kind where a small nursing home expanded into a multispecialty hospital.

Date of Interview :-

05/05/2007

Present Owner of the Hospital :-

Dr N P Mukherjee: AVSM.

Present Condition of the Hospital :-

The condition of the hospital is quite sound at present.

Representation in the Clinical establishment Act:-

The serial number is 585 and the registration number is CE 148-95. There is no mention of the RMO'S and the renewal of the licence.

ST.MARY'S NURSING HOME (P) LTD.¹⁶

Address :-

2/1, HoChiMinhSarani:Kolkata:700071. TelephoneNumber: 033 2282 3768/4079

Date of Establishment :-

1974

History behind the growth of St. Mary's Nursing Home :-

St. Mary's nursing home was enlisted in Kolkata from late 1950's under the supervision of the missionaries. In 1974, Dr. Achintya Krishna Deb, who was an anaesthetist, bought the nursing home and renamed it as St. Mary's Nursing Home. His main motive behind the establishment of the nursing home was to expand his fracture. From 1981 till 2007, the nursing home was leased out.

Source of Funds :-

Personal Savings of Dr. A. K. Deb was invested on the foundation of the hospital.

Services Provided :-

St. Mary's is a general nursing home where all types of surgical cases (orthopedic, gynaecological, E. N. T, ophthalmology, plastic surgery and maxillo facial) were undertaken. Other facilities like inhouse diagnostic facilities, blood bank ambulance etc. were not available. Initially there was a pharmacy but it has ceased to exist.

¹⁶ Dr Soumyendranath Mitra was interviewed.

Spatial Allocation :-

The nursing home is located in a hundred year old residential house of the colonial period. The family of Dr. A. K. Deb resided here from 1974 – 2007. After the death of Dr. Deb in June 2007 his son sold the nursing home to a business house. But the nursing home was in a rented house. Presently it is under subjudice.

Bed Strength :-

At the time of its inception St. Mary's had 35 beds. Presently the number has reduced to 25. All the beds are single sharing and there are two deluxe rooms.

Staffing Patterns :-

Adequate information was not available on the staffing pattern of the hospital. However the nurse to patient ratio is 1:5 and in complicated cases, it is 1:3, ward sisters and private sisters also attend the patients in the ward.

Utilization Pattern :-

St. Mary's Nursing Home was one of the leading nursing homes of South Kolkata in the decade of 70's. The nursing home had a fixed clientele who were mostly upwardly mobile section of the society. Since the infrastructure of the nursing home was unparalleled during those days, all the stalwart surgeons of Kolkata had a preference for St. Mary's. Similarly due to its reasonable price and quality of care and treatment, the pressure of the upper middle class as well as the middle class patients was high. It did not have any flying patients. Patients were admitted on doctors' reference. Many families utilized St. Mary's for any kind of surgeries over generations. Patients were also admitted by choice. But presently it has lost its glory. In the 70's, 80's and even mid 90's there was 100% occupancy rate. For the last 3-4 years there has been a transformation in this picture. There was only 40% - 50% occupancy rate and for the last six months (after the death of Dr. A. K. Deb, occupancy rate is not more than 10%). 80% of the patients were paying from their pockets while remaining 20% have the mediclaim -cashless facilities.

Rates :-

Rates in St. Mary's were nominal compared to the locality and the facilities it provided. Bed charges ranged from Rs. 350 – 800, which was inclusive of food.

Moreover the rates of surgeries were always negotiable. Mediclaim and cashless facilities were entertained.

Expansion over the Years :-

There was no expansion in the nursing home for the last three decades.

Opinion of the Interviewee :-

Dr. S. Mitra who is attached to St. Mary's as an anesthetist, thinks that the dull phase of the nursing home had started from 2000 onwards. But Dr. A. K. Deb refused to sell it out for sentimental reasons. Due to lack of upgradation in the infrastructure of the nursing home, stalwart doctors like Bimolendu Mukherjee, Biswanath Das, Amit Ganguly, Bhabesh Lahiri, Jayanta Sen, refused to admit patients in this nursing home. Dr. Mitra opined that the emergence of the corporate hospital drifted away a huge number of patients who belonged to the upper middle class. The mediclaim and the insurance facilities on the other hand, provided access to the middle class in the corporate hospital. This gradual withdrawal of the bulk of patients, played a pivotal role in displacing the small nursing homes of Kolkata. St. Mary's also suffered the same fate. Since the son of Dr. A. K. Deb, was a non- medical person therefore, after the death of his father, he immediately sold out the nursing home to a businessman. Dr. Mitra recollects that, St. Mary's had some unique features which were not available to any other nursing homes of that time. As the RMO's used to stay for 24 hrs within the nursing home, the junior doctors had the immense opportunity to learn from them. A homely atmosphere always prevailed in the nursing home and there was a family bondage among the employees.

My Observation :-

The old fashioned house which was once thronged by patients and their relatives was now as deserted as a haunted house. On the day of the interview, there was hardly any patient admitted. Signs of decay was visible in every corners of the nursing home. From the interview it was inferred that the entire building (which is a magnificent British architecture) would be demolished by the promoters who had the intention of building a highrise in its place. When the profit was at its peak, patients' pressure was maximum. But in its declining phase, patients from the lower economic strata come here for treatment.

Date of Interview :-

05/10/2007

Present Owner :-

Dr Achintya Krishna Deb.

Present Condition of the Nursing Home :-

The condition of St. Mary's Nursing Home has almost declined and it is in no position to recover from the crisis.

Representation in the Clinical Establishment Act :-

The serial number is 627 and the registration number is CE 106-00. Dr Kausik Roy is the RMO and there is no mention of the renewal of the registration.

LAKE VIEW NURSING HOME¹⁷

Address :-

16/2, Lake View Road : Kolkata:700029. There was no telephone number in the list.

Date of Establishment :-

1975, (on the day of Saraswati Puja)

History Behind the growth of Lake View Nursing Home :-

In the year 1975, on the day of Saraswati Puja, the nursing home was inaugurated by Dr. N. N. Roy Chowdhury in the ground floor of the present building. Dr. Roy Chowdhury had a desire to expand his practices.

Source of Funds :-

Personal investments of Dr. Roy Chowdhury were spent for establishing the nursing home.

¹⁷ Interview was given by Smt Anjali Biswas (nurse) and Khokan Majumdar (manager).

Services Provided:-

Lake View is a general nursing home where patient are admitted for general surgeries. Gynecological, orthopaedic, general medicine and ophthalmologic cases are generally attended. Patients suffering from critical cases are not admitted in Lakeveiw. Though there is no O.P.D., but the doctors make their private chambers in this nursing home.

Spatial Allocation :-

The nursing home is located in Dr. Roy Chowdhury's own house in South Kolkata. The ground floor and the third floor of the building were being utilized for nursing home purposes. There are A.C. & non A.C rooms and also dormitory. A.C. rooms and non A.C rooms are single bedded while the dormitory has the provision for 4 beds.

Bed Strength :-

Initially the nursing home had 8 to 10 beds. In the year, 1983, 10 more beds were added in the third floor. But presently the third floor is entirely closed and the nursing home has only 8 beds.

Staffing Pattern :-

The nursing home has total 15 employees. Attendants are all casual staff. The ratio of patient to paramedical staff is 10:2. However RMO's, sisters and attendant always give rounds in the cabins and dormitories. Special care towards surgery patients are always taken.

Utilization Pattern :-

For upper middle class and middle class patients residing in the peripheral areas of Southern Avenue, Lake View was their first choice for any kind of in patient treatment. The fame of Dr. Roy Chowdhury for gynecological and obstetrics case was unparalleled. Patients from the districts also flocked to the nursing home for treatment. But presently, a drastic change has been observed in the profile of patients. For the last five to six years local patients from the upwardly mobile section hardly come to Lakeview. It is now catering services to the rural poor, who were not satisfied with the public health care services in their districts. These patients who do not get a bed in the public hospitals of Kolkata generally come here for treatment. Moreover the relatives of the sisters, attendants and other employees of the nursing home come

here for better treatment at reasonable prices. Presently, the nursing home receives patients who were refused by the government hospitals for lack of beds.

Rates :-

Lakeview Nursing Home is one of the cheapest health care institutes in South Kolkata. A. C. room with attached bath cost Rs. 1200 and Rs. 800 is charged for A.C. rooms without attached bath. The charges of beds in the dormitory are Rs. 400. All the rates are inclusive of food. Cashless and Mediclaim patients are also entertained. However the rates for surgeries and in- patient treatment are negotiable.

Expansion Over the Years :-

Expansion has taken place only in terms of bed strength. In the inaugural year, there were 8 to 10 beds in the nursing home. In 1983, 10 more beds were attached in the third floor of the building. But from April, 2006 the number of beds had been reduced to only 8.

Opinion of the Interviewees :-

Smt. Anjali Biswas (senior nurse) and Sri Khokan Majumder who gave the interviews think that there are various causes behind the decline of Lake view Nursing Home. With the drifting away of patients to corporate hospitals like N. G. Medicare and Wockhardt in the adjacent areas, new funds eroded. The nursing home was suffering from acute financial crisis since the last five to six years. Due to shortage of funds infrastructural upgradation became impossible. Moreover, modern instruments and technologies were not purchased for attracting doctors of young generations. Most of the contemporary doctors of Roy Chowdhury's era had either given up practice due to old age or ill health. According to Smt. Biswas and Sri Majumder, now-a-days both the surgeons and the patients prefer micro surgeries. But in Lake View equipments required for micro surgeries are not available, so doctors do not prefer to admit their patients here. If the patient parties could not afford to pay the tariff in other private hospitals, it is only then the doctors refer Lakeview. But in earlier days, Lakeview was popular for its modernized and well equipped O. T. and personal care by the sisters. Doctors like D. P. Ghosh, Arunabha Chowdhury, Mahamaya Sarker and many other renowned surgeons preferred Lakeview than any other private nursing home. Throughout the year there was the tremendous pressure of the patients and the doctors

who had their private chambers used to admit their patients in Lakeview. But in recent times this situation has changed. Dr. Iyer, inspite of having a private chamber here, never refers the patient for admission in Lakeview. Iyer's patients are not well-suited for getting admitted in an old fashioned nursing home with limited infrastructure. The nominal elements of luxury and comfort in Lakeview can never satisfy their desire. These patients generally flock to Bhagirathi Neotea or Bellevue. If the family members of Dr. Roy Chowdhury had taken interest to revive the nursing home internally and paid attention for its beautification, then Lakeview would have survived its lost glory. Mr. Majumder also feels that the cashless facilities are detrimental for the survival of small nursing homes. This is because the insurance company initially sanctioned a certain amount of money to the nursing home authority, claimed for a specific treatment. The nursing home on its behalf pays the money and later gets it back from the insurance company. But continuous paying the money for several cases and getting it back after a great delay from the company, brings about a huge monetary loss to these small nursing homes. As a result, nursing homes of these category suffer a financial crunch due to the over use of mediclaim facilities by the patients.

My Observation :-

Financial crisis had deteriorated the condition of Lakeview. Actually the inflow of capital is the major factor for smooth functioning of any organization. To cope and to compete with the changing pattern of healthcare culture, the nursing homes of earlier decades should be upgraded and modernized. Body of entrepreneurs along with the professional medical personnel could combine together to transform the situation of degeneration of Lakeview Nursing Home.

Date of Interview :-

04/04/2007

Present Owner :-

There was no information.

Present Condition of the nursing home :-

Lake View Nursing home had almost degenerated.

Representation in the Clinical Establishment Act. :-

The serial number is 380 and the registration number is CE 17-00.No other information was available in the list.

DREAMLAND¹⁸

Address :-

2 Nayaratna Lane : Kolkata :700004. There was no mention of the telephone number in the Clinical Establishment Act.

Date of establishment :-

1976

History behind the growth of Dreamland :-

Dr. Sudhir Ghosh who was E.S.I doctor of medicine founded the nursing home in 1976. In 1997, he leased out the nursing home to Mr. Ganesh Ghosh (a non medical person) and Dr. Pal. Though, Dr. Ghosh is the present owner but, as he was growing old he was unwilling to take the pressure of the nursing home. Instead of selling it out, he took the option of leasing out the nursing home. However, there was only a change in the management of the organization from 2000 onwards.

Source of Funds :-

The personal funds of Dr. Ghosh have been invested in establishing the nursing home.

Services Provided:-

Along with the I. P. D. (In patient Department), the nursing home has ITU / ICCU, polyclinic, pathology, and Radiology (U.S.G) departments. Ambulance, pharmacy 24 hrs emergency, and Canteen are also available in the Dreamland. Sine Dreamland is a general nursing home patients suffering from any kind of disease (medicine, gynecological, orthopedic E.N. T. Dental and Ophthalmologic) are admitted here.

¹⁸ Dr Kaustav Ray was interviewed.

Spatial Allocation :-

The building belongs to the nursing home authority. There are 22 rooms in the nursing home. Renovation work is undertaken for further expansion.

Bed Strength :-

Presently the nursing home has 60 beds. Initially there were 30 beds. In ICCU and ITU there are 10 and 7 beds respectively. There are A.C. rooms and non- A.C. rooms. Generally 6 beds are attached in the dormitory.

Staffing Pattern :-

110 employees are working in the Dreamland nursing home. In the ICU and ITTU section, patient and sister ratio is 2:1.

Utilization Pattern :-

Patients are admitted mostly under the reference of doctor. 25% patients come here by choice also. Upper middle class and middle class patients of Central Kolkata flock to Dreamland nursing home. When Dr. Ghose was active in the nursing home, the pressure of the patients was enormous. Dreamland, popularly called Sudhir Ghosh's nursing home once had a good reputation in Central Kolkata. Rural Patients, refused by the R. G. Kar and Kolkata Medical College also come to Dreamland. Both upwardly mobile section and patients from the lower economic strata come to Dreamland for treatment. Substantial changes in the socio – economic profile of the patients were not discernible. Bed occupancy rate is 50-70% throughout the year.

Rates :-

The nursing home has provided a rate chart. The bed charges and rates of other services are as follows.

<u>Bed Category</u>	<u>Bed Charges</u>
General A.C. Bed	Rs. 400
A.C. Twin Cabin	Rs. 600
Cabin Non A.C.	Rs. 600
General Non A.C.	Rs. 1200

A.C dormitory	Rs. 300
O.T. Chares	Rs. 500
Minor	Rs. 400
Major	Rs. 600
Charges for ICCU and ITV is	Rs. 10000

Rates of the nursing home are fixed but the doctors' fees are always negotiable. Medclaim and cashless facilities are entertained. Several companies like Reserve Bank of India, State Bank of India, Larsen Toubro, O.N.G.C. and Shipping Corporation of India are empanelled for cashless treatment of their employees.

Expansion Over the Years :-

Subsequent expansion had taken place in Dreamland over the years. Bed strength had increased from 30 to 60, and ICCU, ITU were introduced. U. S. G., ambulance and 24hrs emergency had started to provide multiple services to the patient parties under one roof. Dreamland has now transformed into a multi speciality nursing home.

Opinion of the Interviewee :-

Dreamland nursing home has expanded its service over the years. The change of management brought about a change in the overall administration of the nursing home. In order to survive successfully in the competitive world of corporate healthcare culture, upgradation and modernization are extremely important. Since the affordability of the patients has increased, they are ready to pay for quality care and services. Only capital investment in the nursing home can give desired results and satisfy the needs of the patients. However, Dr. Kaustav Roy thinks that presently the doctors have lost the place of respect and faith which they used to enjoy once in the society. Businessmindedness and the entry of corporate capital in health care deteriorated the ethical part of healthcare culture.

My Observation :-

Since the nursing home had undergone transformation in terms of expanding bed strength and services, it has never suffered from any kinds of crises. The nursing

home authorities have coped with the changes as and when required to upgrade the infrastructure of Dreamland.

Date of Interview :-

31.07.2007.

Present Owner :-

No information is available.

Present Condition of the Nursing Home :-

The nursing home is running successfully.

Representation in the Clinical establishment Act :-

The serial number of the nursing home is 202. The validity of the registration is 1.02.04.

Nursing Homes in the 1980's :-¹⁹

- **Prince Nursing Home.**
- **Swiss Park Nursing Home.**
- **South Calcutta Clinic.**
- **Udayan Nursing Home & Investugation Complex.**
- **Dr Mina Mazumdar Seba Mandir Pvt Ltd**

PRINCE NURSING HOME.²⁰

Address :-

37/1B, Hindustan Road : Kolkata:700029. Telephone Number: 0332464 1266/1146

¹⁹ In the decades of 1980's there were ORCHID NURSING HOME (estd 1985) and GOOD HOPE NURSING HOME (estd early 1980's). Orchid Nursing Home is in the verge of collapse. It was established by Dr Bimalendu Chaudhuri , who has leased out the nursing home in 1996, for his old age and ill health. Presently the nursing home just exists in name. Good Hope established by Dr Rakhi Basu , with 5 beds has increased its bed numbers to 10 in the subsequent years. Diagnostic services, ambulance and 24 hrs emergency has been started. The nursing home is running successfully over the years.

²⁰ Mrs Rina Dasgupta manager and administrative officer was interviewed.

Date of establishment :-

1982 / 83

History Behind the Growth of the Nursing Home :-

Arup Das Gupta M.D. (anesthetist) and Mr. Debasish DasGupta owner of Prince Bakery founded the nursing home in the year 1982.

Source of Funds :-

Apart from the personal savings, bank loan was taken to establish the nursing home.

Services Provided:-

It is a general nursing home with only in patient department. Laparoscopic surgeries, hysterectomy, gall bladder, hernia and other general surgeries are undertaken here.

Spatial Allocation:-

Situated in a rented residential house which has been converted to accommodate the infra structure of a nursing home.

Bed Strength :-

It is a 9 bedded nursing home. Initially it had only 3 beds. There are A.C. as well as Non A.C. beds.

Staffing Pattern :-

There are total 16 employees in the nursing home.

Utilization Pattern :-

Patients are admitted in Prince Nursing Home generally under the reference of the doctor. At one point of time, in the 1980's and early 1990's both upper middle class and middle class patients of South Kolkata used to come in Prince. But things have changed with time. Since other facilities like the diagnostic services, ambulance and emergency are not available here, affluent & even middle class patients prefer utilizing private hospitals which provide multiple services under one roof. The bed occupancy rate has also declined since the last 3-4 years.

Rates :-

Bed charges range from Rs. 250 to Rs. 850. The charge of single A.C. Cabin is Rs. 850. Doctor's fees are negotiable. Charge of major O.T. is Rs. 2000, intermediate O.T. is Rs. 1800 and minor O.T. is Rs. 600. Mediclaim and cashless facilities are entertained here.

Expansion Over the Years :-

Barring the increase in the number of bed strength, from 3 to 9, nothing had expanded in Prince Nursing Home from the time of inception.

Opinion of the Interviewee :-

Mrs. Rina Dasgupta (manager cum administrative officer) thinks that the gradual degeneration of the public hospitals facilitated the growth of small nursing homes in Kolkata from the late 50's . From mid 90's onwards, the emergence of regional business group in health care and the rise of corporate hospitals acted as negative forces to the popularity of small nursing homes. Though there is a decline in the profit, the nursing home is still surviving in a break-even state. She says that the bed charges remained the same for the last five years because with higher prices, the patient party will demand more facilities.

My observation :-

The condition of Prince Nursing Home is very gloomy. On the day of the interview, the bed occupancy was almost negligible. It is now being utilized mostly by the poorer section of the society who are aware of the substandard treatment of the public hospitals.

Date of Interview :-

23.08.2007

Present Owner :-

Dr Arup Dasgupta

Present Condition of the nursing home :-

The nursing home is running without any profit over the last one and a half years.

Representation in the Clinical Establishment :-

The serial number of the nursing home is 509. But there is no registration number and the date of renewal of the license is also not mentioned. Dr Arup Dasgupta is the medical officer.

SWISS PARK NURSING HOME²¹

Address :-

48/4, Swiss Park: Kolkata: 700033 .Telephone Number: 03324242216,1884

Date of Establishment :-

1984.

History behind the Growth of Swiss Park Nursing Home :-

Dr. Mrs. Swapna Chatterjee and her husband Mr. B.B. Chatterjee who is a businessman started the Swiss Park Nursing Home. Dr. S. Chatterjee had an ambition to set up a nursing home with an intention of a more flourishing practice.

Source of Funds :-

The personal savings of the couple have been utilized to establish the nursing home.

Services Provided:-

Swiss park Nursing Home has only In Patient Department. Other facilities – ITU, ICCU, diagnostic services, 24 hrs emergencies are not provided by this nursing home. But the nursing home has an ambulance of its own. General surgeries, (gynaecological orthopedic, dental, ophthalmologic, E.N.T and minor heart surgeries) are undertaken here. Road traffic accident cases are also attended in this nursing home. Doctors who are attached to Swiss Park have their private chambers here.

²¹ Mr B.B.Chatterji , was interviewd.

Spatial Allocation :-

The nursing home is located in the ground floor and first floor of a four-storied building where the Chatterjees live. These two floors are transformed to accommodate the infrastructure of a nursing home. The front portion of the house was renovated 5 years back for nursing home purposes. For the last 20 years, there was not much change in the socio – economic profile of the patients.)

Bed strength :-

Swiss Park Nursing Home has 15 beds which includes 6 single-bedded A.C. rooms. Generally there are two beds in the non-A.C. rooms.

Staffing Pattern :-

The nursing home has nearly 50 employees including two R.M.O's.

Utilization Pattern :-

Upper middle class and middle class patients get admitted in Swiss Park Nursing Home. Patients are admitted under the doctors' referral and sometimes they come here by choice. Swiss Park also gets patients from districts like Sonarpur, Joka, Laxmikantapur.

Rates :-

Adequate information was not available regarding the rates. However according to the interviewee, the bed charges are moderate and negotiable. Medclaim and cashless facilities are entertained.

Expansion Over the Years :-

Ambulance service and a small canteen (only tea and coffee) for the patient parties were introduced in the nursing home. Air- Condition arrangements in the Cabins were also a later addition.

Opinion of the interviewee :-

Mr. B. B. Chatterjee believes that the Swiss Park Nursing Home has a good reputation for better treatment and personal care taken for the patients. The senior matron of the nursing home always gives round in the wards and cabins. Though the nursing home

has no ICCU and ITU, but the limited infrastructure which it has is modern and up-to-date. The operation theatre is well equipped with all modern and hi-tech instruments. According to Mr. Chatterjee, small nursing homes can survive and compete with the private and corporate hospital if it is properly upgraded. He thinks that in present day situation, a doctor should always be supported by an entrepreneur who will look after the “business” side of the nursing home. This equation, according to Mr. Banerjee will bring about profit and generate surplus. He is of the opinion that the conditions in the public hospital were better only in the times of Late Dr. Bidhan Chandra Roy. After his death the degeneration had started and private nursing homes mushroomed to meet the demands of the patients.

My Observation :-

Though the nursing home has a limited infrastructure but it is running successfully from the time of inception. The occupancy rate is more than 70%. The nursing home authority is satisfied with the performance of their employees and they are trying to expand their services in future.

Date of interview :-

26.04.2007

Present Owner :-

Bonabehari Chatterjee.

Present Condition of the Nursing Home :-

Nursing Home is in a well-run state.

Representation in the Clinical Establishment Act :-

The serial number is 586 and Dr Swapna Chatterji is the medical officer. Other information was not available.

SOUTH KOLKATA CLINIC²²

Address :-

19A, Hindusthan Road : Kolkata:700029 .Telephone Number:033 2464 2139 / 3191

Date of Establishment :-

1984, November.

History behind the Growth of South Kolkata Clinic :-

The founder of the nursing home was Late Dr. J. N. Nandy. This nursing home is a part of the family business looked after by the Nandy brothers. Among them, Dr. Ashesh Nandi, Dr. Asish Nandy and Dr. Debasish Nandy are physicians and others – Mr. Krishnendu Nandy. Mr. Ashim Nandy and Mr. Alope Nandy are non medical personnels. Nandys had a tendency to do clarity for the people. This nursing home was the outcome of some social commitments.

Source of funds :-

Since the South Kolkata Clinic is a joint business, therefore the fund was provided by all the partners.

Services Provided:-

South Kolkata Clinic is a general Nursing Home where patients are admitted suffering from any kind of diseases. Critical cases like, bypass, heart operation and renal failure are not attended here. Orthopedic, gynecological, plastic surgery and surgeries on nephrological problems are undertaken in South Kolkata Clinic. Along with the in patient departments, pathology, radiology, pharmacy and 24 hrs emergency services are available here.

Spatial Allocation :-

The nursing home is located in a posh locality of south Kolkata. It is situated in a multi storied building where most of the owners of the nursing home stay. The land was purchased in 1963 when there was a nursery school in place of the clinic. The

²² Mr Alope Nandi, manager and one of the partners was interviewed.

nursing home came up in 1984 and the entire construction was over by 1988. The entire part of the building (except the two top floors) is being utilized for the nursing home purpose.

Bed Strength :-

The total number of beds in the nursing home is 50. Out of which 8 beds are in the ICCU section. However in the initial years, there were only 10 beds in the nursing home. In a general ward there are 3 or 4 beds in a single room. Apart from this there are A.C. and Non A.C. Cabins.

Staffing Pattern :-

There are 62 permanent employees in the nursing home. Proper information was not available on the patient nurse ratio.

Utilization Pattern :-

Over the years there had been no drastic change in the socio – economic profile of the patients. Upper middle class and middle class patients come here for treatment. But it is beyond doubt that though there was no substantial change in the patient profile, the inflow of patients in the nursing home exhibited a sharp decline. Even in late 1990's patients were refused admission for the lack of beds. But now a days the bed occupancy rate is not more than 50% throughout the year. Patients are admitted here under doctor referral. Patients also come from their earlier experience of good treatment and care in the nursing home.

Rates :-

Maximum bed and O.T. charges are Rs. 450 and Rs. 1000 respectively. Other charges are not disclosed. Rates are however negotiable. Mediclaim and cashless facilities are entertained.

Expansion Over the Years :-

The number of beds had increased from 10 to 50. Apart from this, pathology radiology, pharmacy and 24 hrs emergencies were introduced much later.

Opinion of the Interviewee :-

Mr. Alope Nandy, one of the partners, thinks that the influx of regional business groups, corporate capital and multinational company transformed health care, to a commodity. He believes that the small nursing homes of Kolkata have business interest but it was never their priority. Providing health care service to the community and expanding their practice were their only motive. The main cause behind the reduction of patient influx in South Kolkata Clinic is the emergence of private hospitals (AMRI, N.G. Medicare, Apollo Gleneagles and Worchkardt). Since the nursing home has not incurred substantial profit for the last 3-4 years it is on the verge of collapse. As the owners have other sources of income therefore they have not yet closed down the clinic. He is of the opinion that public hospital had a different category of clientele from the 70s onwards. Prior to that period, middle class and even upper middle class used to visit public hospitals for the treatment. But the entire health care culture in the public hospitals degenerated and the Government remained a silent spectator without initiating any effort to improve the situation.

My Observation :-

South Kolkata Clinic has lost its earlier glory. Signs of decay is visible everywhere. Bed occupancy rate is also very poor. Owners of the nursing home have lost interest to improve the situation. Because, they know that in order to compete with the corporate hospitals, huge amount of capital investment is required. Moreover large scale infrastructural changes are also necessary for upgradations. Since surplus generation is in a negative stage such plans cannot be implemented.

Date of interview :-

25/07/2007

Present Owner :-

Dr Asesh ratan Nandi

Present Condition :-

South Kolkata Clinic is not running with much success.

Representation in the Clinical Establishment Act :-

The serial number of the nursing home is 628 and the registration number is CE 1023-02. Dr D R Kundu is the RMO. There is no reference of the renewal of registration.

UDAYAN NURSING HOME & INVESTIGATION COMPLEX²³

Address :-

200/1, NSC Bose Road : Kolkata: 700047 : Telephone Number:0332471 1475

Date of Establishment :-

1984, 13th September

History behind the growth of Udayan Nursing Home :-

The nursing home started in a rented bungalow, near the present address named Sarajuvilla. It was called South Point Nursing Home where only Gynecological cases were attended. It started with three beds in 1984. The land where the present nursing home stands was bought in 1984 from Dr. Arun Bhattacharjee. The construction was started in 1988 and the building was completed in 1993. Udayan was founded by Dr. Bimal Ghosh who is a renowned gynecologist.

Source of Funds :-

Personal savings of Dr. Bimal Ghosh was invested to build the nursing home. Later bank loan was also taken to complete the entire infrastructure.

Services Provided:-

Udayan nursing home provides multiple services. Apart from the in-patient department where patients are admitted for general surgeries and other general medicine cases, there are pathology, radiology, ICU / ITTU sections. Doctors attached to this nursing home have their private chambers in Udayan Nursing Home.

²³ Dr Bimal Kumar Bose was interviewed.

Spatial Allocation :-

The nursing home is situated in a 4 storied building where the top floor is only used by the family members of the owner. There are 40 rooms in the nursing home and the total area covered by the nursing home is 1400 Sq. ft.

Bed Strength :-

Presently the nursing home had 15 beds. There is a general ward where 5 beds are placed and 2 beds are arranged in cubicles. Along with these arrangements there are four cubicles and one single cabin.

Staffing Pattern :-

There are 20 permanent employees in the nursing home and others are casual staff.

Utilization Pattern :-

Nursing Home is being utilized by the middle class and lower middle class population. Patients are coming from Tollygunge to Baruipur for the good reputation of the nursing home. Doctors who have their chambers is Udayan usually admit their patients. The pressure of patients in the gynecological section is always higher since this department had excelled in its service. Patients refused by the Bangur Hospital, are also admitted in Udayan. Presently the nursing home does not attract any patients. The turn over of patients had reduced drastically over the last 3 years.

Rates :-

Bed charges of the nursing home are as follows

General Bed in a ward is Rs. 250/-

Twin Sharing Cabin is Rs. 350/-

Single Cabin is Rs. 750/-

Information on the O. T. Charges are not available

Expansion Over the Years :-

The nursing home had expanded substantially over the years. The bed strength had increased from 3 to 21. Initially, it was a maternity home, since the founder of the nursing home was gynecologist. But later on other services like - pathology, radiology

ICCU, and doctor's chambers were introduced to provide multiple services under one roof.

Opinion of the interviewee :-

Though the nursing home had expanded substantially, but presently it is under tremendous crisis since the owner has grown old and the management is still under this control. The nursing home only exists in name. All the services were withdrawn. ICCU had been closed for the last two years. Bed strength has reduced from 21 to 15. Due to lack of maintenance, the nursing home suffered a great loss. Doctors' private chambers are also being closed down. Due to low infrastructure, patients hardly come to Udayan for treatment. With the decreasing profit margin the nursing home suffered a tremendous financial crisis.

My Observation :-

Lack of maintenance, poor funds and low infrastructure ruined the Udayan Nursing Home. Due to its locational advantage and good treatment it had once enjoyed the repute of a good private health care institute in south Kolkata.

Date of Interview :-

18/04/2007

Present Owner :-

Dr Bimal Kr. Bose

Present Condition of the Nursing Home :-

The Nursing Home is almost in a decaying state

Representation in the Clinical Establishment Act :-

The serial number is 704 and the validity of the registration is upto 09.06.2004. Other information are not available.

DR MINA MAZUMDAR SEBA MANDIR PVT LTD²⁴

Address :-

6, Raja SC Mullick Road : Kolkata:700032.Telephone Number 0332473 3193

Date of establishment :-

1988

History behind the growth of Dr. Meena Majumdar Seva Mandir :-

Dr. Mina Majumdar who was a PhD in applied mathematics passed away in 1982 at below 50 years of age. She was a kind hearted, generous and dedicated herself to the service of mankind. After 'didmoni's (as she was commonly called) death, her brothers and sisters decided to set up a nursing home in her memory. In 1988, Dr. Meena Majumdar Seva Mandir was established with a mission to serve the community.

Source of Funds :-

Dr Mina Mazumdar Seba Mandir Pvt Ltd to set up the nursing home.

Services Provided:-

It is a general nursing home where patients are admitted for general surgeries like hernia, gall bladder, appendix, E.N.T. and gynecological cases, patients suffering from the general medicine cases like typhoid, abdominal pain high fever, renal problems are admitted here. Apart from this, both open and microsurgeries are undertaken in this nursing home. Cancer patients are admitted for chemotherapy. Road accident cases are also attended to.

Spatial allocation :-

The nursing home was established in the residence of the Majumdar's. The ground floor and the first floor of the building were renovated to accommodate the set up of the nursing home.

²⁴ The interview was given by Ms Banya Majumdar.

Bed Strength :-

There are total 10 beds in the nursing home. But sometimes extra beds are accommodated when there is huge pressure of the patients. There are three categories beds – general beds – (3 beds in a room), twin sharing room (two beds in a room) and single Non A.C. Cabin.

Staffing Pattern :-

There are total 24 permanent staff and 10 casual employees in the nursing home. However the patients admitted here are looked after by 24 hrs ward sister, attendant (for each bed) R. M. O. and the consultant doctor.

Utilization Pattern :-

Middle class and lower middle class patients generally come for treatment in this nursing home. The entry of the upper middle class is generally low. Cashless facilities are not entertained but patients having mediclaim are admitted here. Since the nursing has a good reputation for its service patients come from the distant places like Assam, Tripura and even Bangladesh. Patients from South 24 parganas, and Sundarban frequently come to Dr. Meena Majumdar Seva Mandir.

Rates :-

Bed charges in the nursing home vary from Rs. 250 to Rs. 450. Rates are all inclusive of food. However the O. T. charges depend upon the nature of the surgeries. In case of minor surgeries, nominal rates are charged.

Expansion Over the Years :-

Subsequent expansions have not taken place in nursing home over the years.

Opinion if the Interviewee :-

Ms. Banya Majumdar who is one of the members of the Board of directors thinks that the nursing home had always incurred marginal profit. The organization was set up with a mission to serve the sick people. Charity with nominal profit is the motto of their venture. Since their sister had a dedication to serve for mankind, therefore to respect her vision the nursing home tries to give proper service and personal care to the patients. Patients are highly satisfied with the care and service of the nursing home where they get a homely atmosphere. A personal relationship is being developed

between the patients and the doctors and paramedical staff. Professional attitude toward the patients or even with the patient parties are absent here.

My Observation :-

Dr. Mina Majumdar Seva Mandir , though a profit making organization, serves mostly as a charitable trust. Personal warmth and homely atmosphere is present in the nursing home. Though the nursing home is not in a good condition, but still the Board of Directors are never thinking to close down the organization.

Date of Interview :-

21/03/2007

Present Owner :-

Sunil Kr. Majumdar, Nirmal Kr. Majumdar, Neela Paul .

Present Condition of the Nursing Home :-

It is in a no profit no loss state.

Representation in the Clinical Establishment Act. :-

The serial number of the nursing home is 198 and the registration number is CE 209-95. Dr S K Mukhopadhyay is the RMO. The validity of the registration is upto 15.03.2004.

Nursing Homes in the decades of 1990's.²⁵

²⁵ CARE HOSPITAL(estd 1994), ZENITH POINT(estd 1996),PARAMOUNT NURSING HOME PVT LTD(estd 1996),SHEE MEDICAL CENTRE(estd 1996) and FIVE POINT MICRO SURGERY CENTRE (estd 1998) are the private health care institutes that emerged in 1990's.Care hospital is established in a co operative way where a number of doctors are engaged. This hospital also expanded over time. The bed strength has increased from 10 to 28. Services were there from the beginning. The rates are subsidized, as a result patients from the lower economic strata come here for treatment. Zenith Point was established by gynecologist –Dr Purishattam Pal. Presently it is looked after by his son Prasenjit Pal, who is also a gynecologist.This nursing home is chiefly a maternity clinic where the patients of Dr Pal are mostly admitted. However Zenith Point stands as an exception in contemporary days when the trend of establishing maternity clinic has almost reduced. Paramount Nursing Home was established by Mr Nandy, who is a businessman. This nursing home is a general nursing home having all kinds of modern facilities and services. Since it has the infra structure to cope with the other private hospitals of the metropolis, it is running successfully. Shee Medical Centre, established by Indrajyoti Shee is a general nursing home It started with 10 beds, but presently the bed number has increased to 15.It is only general nursing home having upgraded inpatient department. The nursing home is running successfully. Five Point Nursing Home was established by gynecologist Dr Arati Chakraborty. This nursing home, having 18 beds is a microsurgery centre and has 24 hrs emergency services. It was bought by Dr B.K. Gulgulia from Dr Ms Arati Chakraborty in the year 1998 and remodeled to upgrade the service.

- **Rameswara Nursing Home.**

RAMESWARA NURSING HOME²⁶

Address:-

155 CIT Scheme: VII M: Kolkata: 700054. Telephone Number: 0332355 9863 / 2160 / 2823

Date of Establishment:-

1991.

History behind the growth of Rameswara Nursing Home:-

Rameswara Nursing Home belongs to the Haldiram group in 1991. Mr Rama Avatar, a businessman selling mosquito nets bought the nursing home from the Haldiram group and changed the entire managerial set up in 2003. His intention behind taking over the nursing home was to serve the needy people of the community and to provide cheap health care services with proper facilities.

Source of Funds :-

The profit which was incurred from other businesses was invested by Mr. Avatar for the administration of the nursing home.

Services Provided:-

Rameswara is a general nursing home with in patient department where patients are admitted with multiple diseases. General surgeries (gynaecology and orthopaedic) are also undertaken but ENT, eye, brain, kidney and cancer patients are not admitted here.

²⁶ The interview was given by Mr Tapan Majumdar who was the medical superintendent.

The nursing home provides ICCU and ITU, diagnostic services (radiology and pathology) are also available. Though there is no out patient department but the doctors who are attached here have their private chambers in the nursing home. Along with these facilities, ambulance, pharmacy, 24 hrs emergency and canteen are provided by the Rameswara nursing home.

Spatial Allocation:-

The nursing home is located in one of the congested areas of Kolkata. The four storied building of Mr. Avatar, situated in the Ultodanga crossing is used for nursing home purposes.

Bed Strength:-

There are 32 beds in the nursing home, including 7 (each) ICCU and ITU beds. All the rooms are A.C and single sharing. There are few twin sharing rooms in the nursing home.

Staffing Pattern:-

There are 64 permanent employees in the nursing home and the security section is totally outsourced. The patient: nurse ratio in the ITTU and ICU of Rameswara is 2: 1.

Utilization Pattern:-

The Rameswara nursing home is being utilized by the upper middle class, middle class and also by the patients from the economically challenged section of the society. Normally the patients residing in the Lake Town, Bangur , Baguihati and Saltlake areas, use this nursing home for treatment. Patients from the distant places also come to Rameswara for its reputation of good treatment. Cashless and Mediclaim facilities are entertained, but a huge percentage of patients are paying out of their own pocket. Patients are mostly admitted on the basis of doctor's advice, sometimes they come here by choice.

Rates:-

Adequate information was not available regarding the charges of different services. But the bed charges range from a minimum of Rs 350 upto Rs 900. However rates are not negotiable in the nursing home.

Expansion over the years:-

Substantial expansion had not taken place in Rameswara nursing home. Almost all the services were there from the time of inception.

Opinion of the Interviewee:-

According to the medical superintendent, the nursing home is running successfully over the years. Patients are also highly satisfied with the services and treatments provided here.

My Observation:-

Since the interviewee was confused about the researcher's position, he was not frank in his conversation. However, the nursing home is functioning successfully and it is well maintained and upgraded with all modern amenities. But the attitude of the employees seemed to be highly professional towards their patients and their relatives. A tendency of indifferent behaviour was noticed towards patients and patient parties in the nursing home.

Date of Interview:-

8.08.2007.

Present Owner:-

Vinod Kr. Vidyasaria

Present condition of the nursing home:-

The nursing home is in a good condition.

Representation in the Clinical establishment Act :-

The serial number is 550 and the registration number is CE 980-02. Dr A Bagchi is the RMO.No information is available about the validity of the registration number.

PEERLESS HOSPITAL AND B.K.ROY RESEARCH CENTRE²⁷

Address:-

360, Panchsayar: Kolkata: 700094. Telephone Number: 03324622394/007173/2432
0074

Date of Establishment:-

1993.

History behind the Establishment of Peerless Hospital and B.K. Roy Research

Centre:-

The hospital belongs to the Peerless Group which undertook the venture to expand their business in the field of healthcare. The land was given by the Government of West Bengal in the late 1980's, and the hospital started its journey in the year 1993. However it was told that the land was not given free of cost, but the exact amount of the land price was not disclosed.

Source of Funds:-

Peerless General Finance and Investment Companies is the financier of the hospital.

Services Provided:-

Peerless is a general hospital having multiple facilities ranging from OPD, IPD, 24 hrs emergencies, diagnostics services (except MRI) ,pharmacy, canteen etc.

Patients suffering from any kind of diseases are admitted in Peerless. Complicated cases of heart surgeries, knee replacement, dialysis, brain surgeries, neurosurgeries and even critical orthopedic surgeries are undertaken in Peerless. The hospital also has super neuro intensive treatment unit (SNITU). Peerless also offers wide variety of package systems both on specialized care and on the treatment of general medicine as well as on the routine check up. Mention should be made that road traffic accidents and train accident cases are admitted in Peerless.

²⁷ The interview was given by Mr Dhiman Bannerji.

Spatial Allocation :-

The nursing home is located in the Eastern Metropolitan Bypass of Kolkata. The reason behind its location in the peripheral areas of Kolkata is mainly due to the availability of acres of land at cheap rate. The entire building is used for the hospital purpose and the area surrounding the hospital has been used for gardening and parking. The underground floor of the hospital is utilized for mortuary.

Bed strength:-

There are 300 beds in the hospital, including 30 beds in the ITTU/ ICU. All the beds are A.C and in the general ward six beds are accommodated. There are AC cabins and AC suites where the patient parties can stay with the patient.

Staffing Pattern:-

There are 2000 employees in the hospital. Canteen and the security section have been out sourced. The ratio of patient to nurse in the ICCU/ITU section is 1:1. The information on pattern of the distribution of the paramedical staff in the general ward and even in the cabin is not provided by the hospital authority.

Utilization Pattern:-

The hospital is mostly utilized by the upwardly mobile section of the society. Entry of middle class patients had increased for the last 5-6 years due to the benefit of the cashless facilities. Patients are admitted under doctor's referral and sometimes they also come by choice. Peerless receives a huge bulk of upper middle class patients from the adjacent areas which are now dotted with residential high-rises. A wide range of multinational as well as PSU companies is attached with Peerless for the treatment of their employees under the cashless schemes. Hospital receives patients both from the local as well as distant places. Since it is located adjacent to the Baghajatin Railway Station, connecting the district of south 24 pargans, a large number of patients from Canning, Diamond Harbour and even Sundarban regions use Peerless Hospital for treatment. But it has been observed that the patients from the lower income level most of the time shift their patients either to public hospital or to some small nursing home as they cannot cope with the expensive treatment of the Peerless hospital. Bed occupancy rate is almost above 80% throughout the year.

Rates:-

Rate chart was not provided by the hospital authority in spite of several requests. It was only mentioned that in the OPD there is Card System and Rs 100 is charged for general MBBS doctors while Rs 300 is charged for Specialists.

Expansion over the years:-

Substantial expansion has taken place in Peerlaess Hospital over time.

Opinion of the Interviewee:-

Peerless is a multispeciality private hospital and patients who have the ability to pay for quality care generally come to this hospital. Mr. Banerjee is of the opinion that there is a general perception in human psyche that if any organization invests in health care, it ought to do charity for mankind. But like any other service, healthcare should no longer be treated as a free service. He is highly pragmatic in confessing that those who cannot afford to pay for a quality treatment in a private hospital should never dream of admitting their dear ones in the same. State has provided a separate place for their treatment. He further thinks that the grievances and agitation regarding the abnormal billing and exorbitant charges by the private hospitals are generally voiced by these sections of the society.

My Observation:-

Peerless hospital, though a hospital in name is equally a business house which has treated health care as a purchasable commodity only for the financially affluent section of the society. Being a business house selling its commodity, the advertisements of the Peerless hospitals in giant hoardings are also visible in different corners of the city. Moreover their advertisements are also published in many of the lifestyle magazines. The 'five star' hotel- like facade of Peerless hospital treats its patients as commodity for squeezing money in the name of excellent treatment. If the hospital authorities have not paid so much attention on externalities of the hospital building, and concentrated instead on introducing some schemes or plans for the poor patients, then a large section of the population would have been benefited. But their motive of maximizing wealth would not have been fulfilled in that case.

Date of Interview:-

3.10.2007.

Present Owner:-

Dr Nayak

Present Condition of the Hospital:-

The hospital is running successfully.

Representation in the Clinical Establishment Act :-

The serial number is 517 and the registration number is CE 866-2006. Other information is not available in the list.

MICROLAP²⁸

Address:-

24, Bepin Pal Road. Kolkata: 700026. Telephone Number: 0332466 9910 / 2464 0702.

Date of Establishment:-

1996

History behind the Establishment of Microlap:-

Microlap was established by the eminent uro-surgeon Dr Deepak Mukherjee after his return from England in the year 1996. Dr Mukherjee, his wife Dr Mrs Jhamru Mukherjee and others had a partnership firm in Kolkata. Dr Mukherjee was attached to Sishu Mangal before leaving for England. In 1996, when they returned from England, they found that there is a dearth of proper, advanced urological centres in Kolkata. They have introduced a new methodology of laparoscopic urosurgery for the first time in Kolkata.

²⁸ The interview was given by Dr Abalokita Chakrabarty – the CEO of Microlap.

Source of Funds:-

Dr. Mukherjee's own capital and a bank loan were invested in establishing the hospital.

Services Provided:-

Microlap is a 60 bedded hospital with 5 beds in ICCU and 3 day care unit. Doctors have their private chambers in Microlap where the patients come with both medical and surgical problems. As a general hospital, there are several departments ranging from specialized sections like urology, uro-oncology, cardiology, chest and respiratory medicine, ENT, skin, neurology, nephrology, endocrinology, gynecology and general medicine. Microlap also has a separate department called Microlab for pathology and radiology where all kinds of diagnostic services (except MRI, CT scan, angiogram, angioplasty) are provided. For the benefit of the patient party the hospital has also introduced pharmacy and ambulance service. Patients suffering from infertility and menopausal disorders also come here for advanced gynecological treatment. Mention should be made that patients coming from distant places used to stay in the nearby lodge or guest house which is entirely arranged by the hospital authority.

Spatial Allocation:-

The building, where the hospital is located belongs to the hospital authority. Initially the property was purchased for 30 bedded accommodations. But in 2004, another property, adjacent to the hospital was purchased. In both the cases, two residential buildings were converted to facilitate the set up of a hospital. There are approximately 30 rooms allotted for the use of the hospital and the entire building is air conditioned.

Bed Strength:-

There are 60 beds in Microlap, out of which 30% are general beds, 10% are double beds, (twin sharing), 30% are cabin, 10% of the beds are in the ICCU/ITU section, 10% are suites and 10% are day care unit beds. Facilities vary from lower bed category to higher ones. Cabins are equipped with phone, color TV and attached bath. In higher category rooms, the patient to nurse ratio is 1:1.

Staffing Pattern:-

There are 60 permanent employees in the nursing home. The aya (personal attendants) and the security personnel are outsourced. In the ICCU/ ITU section the paramedical staff and patients ratio is 4:1. In the case of general ward, twin sharing beds and deluxe ward, the distribution of paramedical staff depends upon the conditions of the patients. But the number is never less than 2.

Utilization Pattern:-

The hospital is being utilized by the patients belonging to higher income group and middle income group. This section generally comes for the admission in IPD in Microlap, but in the OPD section (the doctors' chambers) there is a huge pressure of patients belonging to the lower income group. Patients flock to Microlap both by choice and also by the reference of the doctor. The facility for package system in case of general laparoscopic surgery, orthopedic and gynecological surgery is available in Microlap. A large number of patients are corporate and from PSU employees attached to various companies like SAIL, TISCO, BHEL, SBI, RBI, Bank of India, ITC, Hindustan Lever etc. Moreover 60% of the patients are local and 40% patients are coming from the distant places. Hospital has 70% to 80% occupancy rate throughout the year.

Rates:-

Adequate information was not available regarding the rates. It was only informed that patients in the lower economic strata, having monthly income less than Rs 7000 per month are generally admitted in the standard ward (general bed) where the bed charge is Rs 450. Mediclaim and cashless facilities are entertained by the hospital. The doctors' visit in their private chambers varies from Rs 200- Rs 500.

Expansion over the Years:-

This healthcare institute has expanded rapidly from the time of its inception. In the year 1996, there were only 15 beds which have increased to 30 and now to 60. For the plan of expansion the hospital authority has also acquired the adjacent house and transformed it to accommodate the infrastructure of a nursing home. Moreover, Microlap was a specialized health care centre for urological and urosurgical cases. But owing to the demand, and also to cope and compete with the changes in the

domain of private health care sector, Microlap has introduced other wings of specialized treatments. Ambulance and pharmacy were also later additions.

Opinion of the Interviewee:-

The chief executive officer of Microlap is of the opinion that more than 60% of the populations in Kolkata utilize private medical care. However in case of in patient treatment, patients are either admitted to private hospitals or to nursing homes, and rarely to government hospitals depending upon the affordability of the patient party. But according to him, the trend in utilizing private health care has increased over the years. Even people in the lower income level try their heart and soul for treating their patients in private health sector. Though the private health care is costly and the rates in Microlap are expensive, still the hospital has undertaken certain measures to provide health care to the poor people. The bed charge in the standard ward is Rs 450 for those whose monthly income is below Rs 7000. The hospital also has a plan for a subsidized clinic for the poor people for Rs 20 only (Once in a month). Dr Chakraborty also feels that the mediclaim and insurance facilities opened the access for the middle class section's entry in the private hospitals. He further mentions that in present day, time and value for money are very important factors in anyone's life; therefore patients coming in private hospitals have high expectations. Microlap on its behalf is trying best to deliver the same.

My Observation:-

The interview session in Microlap was highly satisfactory since this was one of the most fruitful conversations, the researcher had so far experienced. Though Microlap has grown into multispecialty hospital from a small 15 bedded nursing home, but it still has a sympathetic attitude towards the poor patients. The corporatised health care ambiance in Microlap, and the professional attitude towards the patients indicate that securing profit is the sole intention of the hospital authority.

Date of Interview:-

31.8.2007

Present Owner:-

Dr Dipak Kr. Mukherjee

Present Condition of the Hospital:-

Microlap has a high success rate as a health care institute.

Representation in the Clinical establishment Act :-

The serial number of the nursing home is 402 and the registration number is CE 383. Information about the RMO and the validity of the registration number is not available.

ADVANCED MEDICARE RESEARCH INSTITUTE (AMRI)²⁹

Address:-

P4&5, CIT Scheme-LXXII, Block:A, Gariahat Road: Kolkata:700029. Telephone Number: 24404102/2440 4803

Date of Establishment:-

1996.

History behind the foundation of AMRI:-

AMRI came up in the place of Niramoy polyclinic which was a nursing home cum clinic, under Government of West Bengal. As it was not functioning well, it was on the verge of collapse. The then chief minister Jyoti Basu asked Dr Mani Chhetri to open a 160 bedded hospital in the heart of south Kolkata. Mr Todi and Dr Chhetri jointly undertook the task of opening a 160 bedded hospital. The government share is 25% while 75% of the share is occupied by the Todi group (Emaami and Shrachi).

Source of Funds:-

Government provided the building and the capital was invested by the Todis.

Services Provided:-

The activities of the AMRI can be divided into two sections.

- Treating Patients
- Teaching and Research Section.

²⁹ The interview was given by Brigadier Dr S. B. Purakayasthya.

AMRI is a superspeciality hospital having OPD, IPD, diagnostic services, (including MRI, and CT scan) ambulance, pharmacy, 24 hrs emergencies, cafeteria and almost all the specialized departments (Cardiology, cardio-thoracic, neurology, orthopedic, oncology, nephrology, urology, uro-oncology, gynecology, pediatrics, dentistry, gastroenterology, general medicine, general surgery and life style medicine) . Except infectious diseases , all kinds of diseases are treated here.

As far as the activities of the teaching and research section are concerned, it was informed that nursing courses and DNB courses are offered. Fellowships for research are also provided by AMRI.

Spatial Allocation:-

The building of Niramoy Polyclinic has been utilized for AMRI. It is located in one of the convenient areas of south Kolkata.

Bed Strength:-

There are 160 beds in AMRI.

Staffing Pattern:-

Adequate information was not available.

Utilization Pattern:-

Patients come to AMRI by the name of the hospital. Majority of the patients are admitted in AMRI under the reference of the doctor. The pressure of patients having mediclaim and cashless facilities is maximum in this hospital. However 50% of the patients are still paying by cash. In the initial years people did not come here by choice. But for the last 3-4 years there has been a quantum jump and people are also coming from the neighborhood areas. Patients come to AMRI from distant places and also from other states of India. TISCO, Indian Oil, BPCL and many private as well as public sector companies are attached to AMRI. Employees of these companies can avail the cashless treatment here.

Rates:-

Adequate information was not available.

Expansion over the Years:-

AMRI has expanded substantially over the years. The land behind the main building was acquired and construction of another building was started to accommodate more beds and other departments. AMRI authorities had a plan to shift all the specialized departments in the new block. Moreover other buildings in the adjacent areas were acquired to introduce multiple services and to expand the research section.

Opinion of the Interviewee:-

AMRI hospital in Kolkata has introduced the broad concept of health care. Prior to them it was initiated by Belle Vue and Woodlands. AMRI, for the first time provided the platform for the entry of the middle class patients in private hospitals by offering reasonable prices. Nevertheless, since the government has a share in AMRI, the hospital is compelled to offer free treatment to certain percentage of patients who financially weak. Brigadier Dr S B Purakayashtya thinks that over the years, with the rising reputation of the hospital the inflow of 'flying patients' has increased.

My Observation:-

AMRI is a super speciality private hospital which is in reality providing treatment to the financially privileged section of the society. While waiting in the lounge, before interview, it was observed that most of the patients and their relatives belong to the affluent section of the society, there are hardly any patients or patient parties who come from the financially challenged section. As far as the physical appearance goes, the presence of the patients from the higher income group is more dominant in the waiting lounge. However in the OPD section the picture differs a little. This renowned health care institute is meant for a particular section of patients. Poor people would not be able to afford their treatment in AMRI as it does not have any plan or subsidies for this section. Though AMRI emerged at the expense of public health care sector (as far as the spatial allocation is concerned), it has not provided any service for the poor.

Date of Interview:-

11.12.2006.

Present Owner:-

Dr. Moni Chhetri

Present Condition of the hospital:-

The hospital is at its peak in terms of success rate.

Representation in the Clinical establishment Act :-

The serial number of the hospital is 23 and the registration number is CE 522. Other information was not available.

CURE CENTRE NURSING HOME³⁰

Address:-

377 / 3, Prince Anwar Shah Road: Kolkata: 700068 .Telephone Number 0332472 5962.

Date of Establishment:-

1998

History behind the growth of the nursing home:-

Mr Indrajit Das and late Mr A Mandal (both non medical persons) founded the Cure Centre Nursing Home. One of the founders of the nursing home was a contractor and the other one had a decorator company. They decided to open a nursing home as a part of a side business to increase their income.

Source of Funds:-

It was their personal money that was invested to set up the nursing home.

Services Provided:-

Cure Centre Nursing Home has only an In Patient Department with ICCU and ITU. Patients suffering from all types of diseases (general medicine cases, general surgeries, cardiac cases, and oncology cases, orthopedic and gynecological cases) are admitted in Cure Centre.

³⁰ The interview was given by Mr Tirthankar Barua , the manager of the nursing home.

Spatial Allocation:-

The nursing home is located in a five storied building which belongs to a lawyer. Probably the nursing home authorities bought the house from the lawyer and renovated it to set up the infrastructure of the nursing home.

Bed Strength:-

There are 30 beds in the nursing home including 4 beds in the ICCU/ITU. Most of the beds are in the cabins. There are only two twin sharing rooms and a general ward where two beds are accommodated.

Staffing Pattern:-

There are 70 employees in the nursing home and the security section is outsourced. The ratio of patients to paramedical staff in the nursing home is not fixed. It depends upon the condition of the patients and also on the doctors' advice.

Utilization Pattern:-

The nursing home is being utilized by the middle class mostly. Upper middle class rarely come to this nursing home. The mediclaim and cashless facilities are entertained in Cure Centre. The occupancy rate is almost above 60% throughout the year. Patients are admitted in this nursing home under the reference of the doctors.

Rates:-

Scanty information is gathered regarding the charges of the various services in the nursing home. The bed charges range from Rs 750 to Rs 1600, depending upon the category of occupancy.

Expansion over the Years:-

There has been no substantial expansion in the services or in the infrastructure of the hospital over the years.

Opinion of the Interviewee:-

The manager of the nursing home is of the opinion that investing in health care is a lucrative business. As a result non medical persons are increasingly investing in health care. Like any other business, health care also developed two distinct parts –

professional domain (including doctors and paramedical staff) and the financial domain (including the entrepreneurial part). Society has also accepted the changes in the health care organizations with time. Attitudes of the patients have also drastically changed and they too consider health care as a commodity to be purchased from health care industry.

My Observation:-

Cure Centre nursing home does consider health care as a product which can be accessed in good quality by those who can afford to pay for it. People having no affordability have to remain satisfied with the service provided either by the public hospital or by charitable trust.

Date of Interview:-

15.04.2007

Present Owner:-

No information was available in the list of the Clinical Establishment Act.

Present Condition of the Nursing Home:-

Nursing Home is running successfully.

Representation in the Clinical establishment Act:-

The serial number of the nursing home is 98 and the registration number is CE 1015-98. Other information was not available.
