

LIST OF FIGURES

S.No	TITLE	PAGE NO
3.1	A diagrammatic summary of proposed mechanisms by which ROS and oxidative stress could contribute to the process of ageing.	16
3.2	<i>Bacopa monnieri</i>	24
3.3	<i>Dioscoreae bulbifera</i>	29
3.4	<i>Hippophae rhamnoides</i>	32
3.5	Structures of Bacoside, Quercetin and Rutin	36
4.1	HPLC Chromatogram of Quercetin and Rutin Mixture	49
4.2	HPLC Chromatogram of Bacoside	50
5.1	Free radical scavenging activity of polyherbal formulation	56
5.2	Concentration dependent effect of polyherbal formulation on Human neural cell line- IMR32.	57
5.3	Neuroprotective effect of polyherbal formulation H ₂ O ₂ induced cell cytotoxicity MTT & PI staining assay	57
5.4	Effect of polyherbal formulation sample on intracellular ROS production	58
6.1	Effect of polyherbal formulation on neurotransmitter levels in the cortex of young aged and treated rats	67
6.2	Effect of polyherbal formulation on Antioxidant levels in the cortex of young aged and treated rats	68
6.3	Effect of polyherbal formulation on AchE enzyme activity in the cortex of young aged and treated rats	69
6.4	Concentration of lipofuscin content in the cortex of young aged and treated rats	70
