Chapter 1

**Introduction**

Chapter 2

**Cooking Smoke and Acute Respiratory Infections: An Overview of Literature**

2.1 Introduction to ARI and air pollution
2.2 A brief discussion of mechanisms
2.3 Indoor Air Pollution
2.4 Epidemiology
2.5 The Status of IAP in India and its Effect
2.6 Status of Household Fuel Use in India
2.7 Important Air-Pollution-Related Diseases and Their Relative Risks
2.8 An overview of the findings

Chapter 3

**Morbidity Pattern with Special Reference to Acute Respiratory Infections**

3.1 Background idea of health and morbidity in slums
3.2 Empirical evidences of health and morbidity in the sample slums from all types of diseases
3.3 Morbidity profile constructed for all diseases
3.4 Empirical evidences morbidity in the sample slums with particular reference to ARI.
   3.4. i Forms of illness
   3.4. ii Morbidity profile for women and Children
3.5 Inferences drawn from the analysis

Chapter 4

Linkages between Cooking Smoke and Acute Respiratory Infections 110-155

4.1 General Characteristics of the variables
4.2 Linkages between Cooking Smoke and ARI
4.3 Statistical Modelling
4.4 Conclusion

Chapter 5

A Critique of Government Policies in the Context of Energy and Health 156-204

5.1 Cost – Benefit analysis of shifting to LPG
5.2 Concept of the Burden of Illness on the Household
5.3 Shift to clean fuel (LPG)
5.5 Recommendations

Chapter 6

Summary of Conclusions 205-215

References 216-228
