List of Tables

Table 3.1: Results of Estimation of Trend Equation for Major Crop Categories ......................................................... 117

Table 3.1A: Results of Estimation of Trend Equation for Major Crops ................................................................. 118

Table 3.2: Estimation of Dummy Variable Model to find out Shift in Growth Path of Area, Production and Yield of Different Crop – Categories in West Bengal with 1990-91 as the Break Point ............................................. 119

Table 3.2A: Estimation of Dummy Variable Model to Find out Shift in Growth Path of Area, Production and Yield of Different Crops in West Bengal with 1990-91 as the Break Point ................................................. 121

Table 3.3: A Comparison of Growth Rates of the Crop-categories between Pre- and Post- liberalisation Period ......................... 123

Table 3.3A: A Comparison of Growth Rates of the Crops between Pre- and Post- liberalisation Period .......................... 124

Table 3.4: The General Determinants of Yield of Different Crops in West Bengal .......................................................... 125

Table 4.1: Estimated Coefficients of the Major Crop-categories for the Period 1980-81 to 2002-03 with Exogenous Break in Level of the Series at 1990-91 ......................................................... 164

Table 4.2: Estimated Coefficients of the Major Crops for the Period 1980-81 to 2002-03 with Exogenous Break in Level of the Series at 1990-91 ............................................................... 166

Table 4.3: Estimated Coefficients of the Major Crop- categories for the Period 1980-81 to 2002-03 with Exogenous Break in Slope of the Series at 1990-91 ............................................................. 168

Table 4.4: Estimated Coefficients of the Major Crops for the Period 1980-81 to 2002-03 with Exogenous Break in Slope of the Series at 1990-91 ............................................................. 170
Table 4.5: Estimated Coefficients of the Major Crop-categories for the Period 1980-81 to 2002-03 with Exogenous Break in Both Level and Slope of the Series at 1990-91 ................................. 172

Table 4.6: Estimated Coefficients of the Major Crops for the Period 1980-81 to 2002-03 with Exogenous Break in Both Level and Slope of the Series at 1990-91 .................................................. 174

Table 4.7: Summary of Results for the Crop Categories ............................... 176

Table 4.8: Summary of Results for the Crops ............................................. 177

Table 4.9: Estimated Coefficients of the Major Crop-categories for the Period 1980-81 to 2002-03 with the Endogenous Break in the Series .................................................. 179

Table 4.10: Estimated Coefficients of the Major Crops for the Period 1980-81 to 2002-03 with the Endogenous Break in the Series .................................................. 181

Table 4.11: Summary of Results of the Endogenous Analysis for the Crop Categories .................................................. 183

Table 4.12: Summary of Results of the Endogenous Analysis for the Crops .................................................. 184

Table 5.1: Values of the Unit-Root (DF) Tests ............................................. 209

Table 5.2: The $\lambda_{\text{trace}}$ and $\lambda_{\text{max}}$ statistics ............................................. 209

Table 5.3: Cointegrating Vectors Normalized on Area of the Crops .............. 210

Table 5.4: The Estimates of Short-run Elasticities of Different Crops from the Error Correction Model .................................................. 211

Table 6.1: Estimates of Parameters of the Stochastic Frontier Production Function .................................................. 231

Table 6.2: Generalised Likelihood Ratio Tests of Null Hypotheses for Parameter Values in the Estimated Stochastic Frontier Production Function .................................................. 232

Table 6.3: Average Technical Efficiency Estimates for the Crops ................. 233

Table 7.1: The Average Annual Rates of Total Factor Productivity Growth of Different Crops of West Bengal .................................................. 266
Table 7.2: Yearly Average of the Malmquist Productivity Indices and the Productivity Growth Rates ........................................ 267

Table 7.3: The Average Annual Levels and Rates of Technical Change of Different Crops of West Bengal ............................. 268

Table 7.4: The Average Annual Levels and Rates of Efficiency Change of Different Crops of West Bengal ............................. 269

Table 7.5: The Average Annual Rates of Productivity Growth Technical Progress Technical Efficiency Change and Scale efficiency change of Different Crops of West Bengal .......... 270

Table 7.6: Crops Showing Outward Shift in the Production Frontier .......... 271

Table 7.7: Number of Times a Crop has caused an Outward Shift in the Production Frontier .................................................. 272

Table 7.8: Coefficients of the Regression Equation identifying the Factors behind TFPG ......................................................... 273
List of Figures

Fig. A1.1: The Decomposition of TFPG into input growth
technical progress and technical efficiency ......................... 10

Fig. A3.1: Gini coefficient as the ratio of areas on the
Lorenz Curve diagram .................................................. 127

Figure 7.1: Construction of PPS based on the observed
input-output vectors ....................................................... 240

Figure 7.2: Outward shift in the production frontier .................. 250

Figure 7.3: TFPG rate for Aus ............................................. 261

Figure 7.4: TFPG rate for Mustard ....................................... 261

Figure 7.5: TFPG rate for the Average for the Selected Crops ......... 261

Figure 7.6: Advances to the Rural Area from the Scheduled
Commercial Banks for Aus ............................................... 262

Figure 7.7: Advances to the Rural Area from the Scheduled
Commercial Banks for Mustard and the Average ................. 262
