

## Acknowledgements

First of all, I would like to express my deep felt gratitude to my supervisor Prof. J. K. Dattagupta for introducing me to the problem and for his inspiring guidance, constructive criticisms and constant encouragement during the course of my work. When I decided to pursue the molecular biology work alone in crystallography laboratory, he extended his full support not only in academic level but also inspired me in every step of my work to keep my enthusiasm intact.

My very special regards and thanks are for Prof. Aloka Poddar and Prof. Chandana Chakrabarti for their appreciation and encouragement in different stages of my work.

I wish to express my affection and thanks to Dr. Udayaditya Sen who has helped me a lot in learning the basics and details of crystallization, refinement and structure analysis. Apart from that, I have received his immense help in pursuing the molecular biology and protein purification experiments in our crystallography laboratory. His piercing advice, valuable suggestions and constant encouragement have helped me to gain confidence. The support extended by him can never be compensated.

I wish to acknowledge Dr. Partha Saha who helped me a lot in learning the techniques of molecular biology in the early days of my research career.

My sincere thanks are due to our collaborators Dr. M. Singh and Dr. S. Ghosh of IICB, Kolkata for providing two mutant proteins, N14K and N14D.

I would like to take this opportunity to acknowledge the help and support I received from my seniors Dr. Debashis Mukhopadhyay, Dr. S. Ravichandran, Dr. Rakhi Dasgupta and Dr. Satyabrata Das. I also acknowledge my juniors specially Susmita, for many beautiful moments I shared with them.

I wish to express my thanks to Prof. Subrata Banerjee, Utpal Basu and Prof. A. Pal of Biophysics Division for many useful suggestions and help. I also thank Sampali and Biswanath for providing help and friendly research environment. I would like to thank Mr. Abhijit Bhattacharyya for his timely help in the crisis related to computers and rotating anode.

I shall always remain indebted to some of my friends like Kakali, Baishakhi and Tanaya for being with me in this period.

It gives me pleasure to thank all the faculty members of our division for their help and advice.

I would like to acknowledge all other members of C&MB Division specially Mr. Bikram Nath and Bipin Basu for their useful help.

I like to express my heartfelt thanks and gratitude to Ma, Baba and Bhutai without whose patience, inspiration and cooperation, this work would not have been possible.

Finally, I thank Pro. B. C. Sinha, Director, Saha Institute of Nuclear Physics and Prof. J. K. Dattagupta, Head, Crystallography and Molecular Biology Division for providing me with all the laboratory facilities to complete this work.

Jhimli Dasgupta
