

ACKNOWLEDGEMENT

I hereby express with great pleasure my heartfelt honor, profound gratitude and deep indebtedness to Prof. T. K. Parya, Professor, Department of Chemical Technology, Calcutta University for his valuable guidance, ceaseless encouragement, tireless supervision and constructive criticisms throughout my research work without which it would have been a dream to complete such prestigious work.

I take this opportunity to convey my sincere gratitude and thanks to Sri Barun Kumar Sanfui, Research Scholar, Department of Chemical Technology, University of Calcutta for his support and co-operation during this investigation.

I would also like to extend sincere thanks to all respected faculty members, staff members and research scholars, Department of Chemical Technology, Calcutta University for their active support, help and full co-operation leading to materialization of the work.

Debjyoti Ray
