Acknowledgement

Now the time has come to recollect everything what I did for the last five years and a myriad of faces come to my mind who have helped me make this day come true from a far-away dream.

Being an average Masters student of Biochemistry, I feel fortunate enough to have the privilege of joining the lab of Prof. Chanchal Das Gupta (my Sir), at the Department of Biophysics, Molecular Biology & Genetics, University of Calcutta. Sir, I still remember the very first day when you demonstrated me in the laminar hood how to do ‘bacterial transformation’. I truly found a reason of my life, to love science. Your vision and scientific approach would be my precious guide for the days to come.

I would like to convey thanks to my associate supervisor Dr. Sumita Sengupta of this department for her constant encouragement.

I express my sincere gratitude to other faculty members of this department:

Prof. R.K. Podder, Prof. U. Chowdhury, Prof. U. Das Gupta, Prof. A.S. Chakraborti,

Prof. S. Roy Choudhury, Dr. S. Mukherjee, Dr. S. Ghosh, Dr. A. Lahiri and Dr. S. Kundu.

I am grateful to Prof. Abhijit Chakrabarti of the Saha Institute of Nuclear Physics, Kolkata – to allow me doing mass-spectrometric experiments there as well as helping me with whatever needed for the work. I must acknowledge the help I got from the PhD students of that institute Sutapa Saha and Dipankar Bhattacharya.

I thank Dr. Sankar Adhya and Dr. D.K. Chattoraj of the National Institute of Health, USA, who took special interest in my work and helped me immensely with their inspiring inputs. I express my gratitude to Prof. Mans Ehrenberg, Dr. Suparna Sanyal and Dr. Santanu Dasgupta of the Uppsala University, Sweden for their stimulating discussions and scientific advice.

I convey my special thanks to my senior colleagues Bamada, Aninditadi and Dibyenduda; I used to feel presence of my elder brothers and sister when they were in the lab. They helped me a lot to learn basic laboratory techniques. I would also like to thank Jaydipda and Arunimadi for their encouragement and support. I am grateful to Jayashridi,
Sanchitadi, Sumonadi, Sunipadi, Yasmindi, Taniadi Aftabda, Urmidi, Ushridi, Ananyadi, Anonyada, Doyeldi, Moumitadi, Subhenduda, Gargidi, Priyankadi, Sucharitadi and Kamalinidi of this department. My special thanks to Papai who never hesitated to help me whenever needed. Thanks to Swarnava, Subho, Arpita, Shonima, Dhriti, Amrita, Pritha, Rajarshi, Rajat, Indrajit, Saikat, Srimoyee, Alina, Soumasree, Nirmalya, Amitava, Mandar, Suman, Pratik, Abhisek, Sacrdipita, Subhojit, Chitto, Rahul for their support to provide friendly atmosphere in the department. I would like to thank Bani and Surojit of the St. Xavier's College (Kolkata) for their encouragement and support.

The office staffs of our department helped me in different ways. I would like to mention specially about Ashokda and Niladrida, who were always there to help me. I also thank to Jibonda, Tusharda and Souravda.

Financial assistance provided by the University Grant Commission to me is gratefully acknowledged.

No word seems to be enough to acknowledge my parents, behind all my failures I knew that they would be there with their untiring support. My sister Debotri and my brother in law Amit also encouraged me all the time. Thanks to my uncles and aunts who helped me in different ways.

I sign off by acknowledging all my near and dear ones whom I could not mention due to lack of space. Thank you all.

Debasis Das
