Acknowledgments

Right from the commencement of this project, it became quite clear to me that a researcher cannot complete a Ph.D. thesis alone. It gives me immense pleasure to acknowledge my indebtedness, sincere gratefulness and profound sense of gratitude to those without whom this thesis would not have been possible. Although the list of individuals I wish to thank extends beyond the limits of this format, I would like to thank the following persons for their help, dedication, prayer and support.

My esteemed guide, Dr. K.S. Kahlon, a personage of striking insight has played a pivotal role in my life as a researcher. I am deeply indebted to him for his critical wisdom and passionate involvement in this thesis work. Working under a man of unimpeachable integrity and uncompromising principles was indeed a matter of pride for me. He is always a courage for me in my up and down during this thesis.

My sincere thanks are due to Dr. Hardeep Singh and Dr. Gurvinder Singh, Department of Computer Science & Engineering, GNDU for their unconditional help and invaluable guidance throughout the thesis. I am deeply indebted to them for their constructive and healthy criticism and perpetual encouragement.

I take this opportunity to thank Dr. Jitender Chhabra Head, Department of Computer Engineering, NIT, Kurukshetra and Dr. Hardeep Singh Head, Department of ECE, BBSBEC for all the feedback, ideas, and for his time & ever cheerful support and encouragement. I am beholden to Dr. T.S. Kamal for extending generous support while finalising the thesis.

It is my privilege to gratefully thanks the Front End Art Ltd. Hungry for their unconditional working with their tool Colombus Frame work. My special thanks goes to Mr. Peter Sikiet of Front End Art Ltd. for his instant help to work with their tool.
I would also like to thanks Dr. (Mrs.) Arvinder Kaur Kahlon for her refreshing cups of tea and kind assuring words during my often visits.

I would also like to thanks my dearest school friend Dr. Manmeet Pal Singh who has been with me through the hardest times and has made these times also the happiest. I would also like to thanks him for his critics comments which helps me lot during my writing.

My acknowledgement would be incomplete if I do not mention the unconditional support of Prof. Gurleen Sidhu for editing my thesis report and without whom I could not have made it very far in my thesis and publications. I would also like to thank my colleagues Prof. Baljit Singh, Prof. K.S. Dhindsa, Prof. Jatinder Singh and Prof. Birinder Singh for their much friendship and cheerful motivation during my experimental work.

I can not express my gratitude to my beloved parents Sardar Balbir Singh and Sardarni Parmjit Kaur and my sister Manpreet Kaur who have filled my life with love, care and support from the very beginning. My life has truly been so much more joyful due to their presence around me.

I would also like to thanks my wife Gupreet Kaur and my son Anhad for their patience, love and encouragement especially in those days and nights when I spent more time with my computer and in the lab than with them. Their smiles and daily naughty episodes removes my day long tiredness when I return home from the lab.

Last but not the least, I owe my reverence to the almighty, by whose grace I have been able to complete my research work successfully. I always feel HIS presence during my hard days. HE blessed me many gifts when I deserve them during the period of my thesis work.

Satwinder Singh
