ACKNOWLEDGEMENTS

This thesis is the end of my journey in obtaining a PhD. It arose in parts out of years of work I have done since I entered Dr. Kunal Ray's lab. This dissertation would not have been possible without the guidance and the help of several individuals who in one way or another contributed and extended their valuable assistance in the preparation and completion of this study.

I express my sincere gratitude to my supervisor Dr. Kunal Ray for giving me the opportunity to pursue my Ph.D. career in the fascinating and challenging world of Human Genetics. He gave me the required liberty to think and pursue my interest, taught me the intricacies of research with great patience and guided me to enter a successful and exciting field of research. He has been the true architect in inspiring me to the exciting field of human genetic disorders. He provided me the inspiration and support to enhance my confidence. His way of thinking and working has helped me mature as a person, imbibing qualities that will help me in times to come.

I would like to take this opportunity to thank Dr. Susanta Roychoudhury for his selfless support, critical comments and valuable suggestions throughout this work. I am also grateful to Dr. Keya Chaudhuri for her selfless help and suggestions whenever needed. I am also thankful to Dr Jharna Ray for her help and suggestion throughout the work.

A special note of thanks goes to Dr. Kunal Ray, Dr. Susanta Roychoudhury and Dr. Keya Chaudhuri, for maintaining a common laboratory setup. It just provides immense pleasure and is an incredible experience of working in a joint family, supervision and guidance of three PIs and of course, lots of friends.

I thank Prof. Siddhartha Roy, the director of this institute, for granting me the privilege to continue my work in this esteemed institute.
Acknowledgements

My special thanks to the faculty members of our institute; Dr. Rukhsana Chowdhury, Dr. Samit Adhaya, Dr. Chitra Datta, Dr. Saikat Chakraborty, Dr. Nahid Ali, Dr. Ashok Giri, Dr. Sumantra Das and Dr. Mrinal Kanti Ghosh for allowing me to use their laboratory facilities whenever needed.

I must take this opportunity to thank our clinician collaborator Dr. Abhijit Sen and Dr. Keya Sen. They also taught me some of the basics regarding the pathophysiology and diagnosis criteria of the disease POAG, which is the topic of this dissertation.

It gives me immense pleasure to express regards to my seniors who guided me with their valuable experiences. Among them, first and foremost, I express my heartfelt thanks to my seniors Dr. Antara Banerjee, Dr. Mainak Sengupta, Dr. Gautami Das, Dr. Shruti Dutta, Dr. Atreyee Saha, Dr. Pritha Ghosh, Dr. Moumita Chaki, Dr. Arunava Bandhopadhaya, Dr. Rajdeep Chowdhury, Dr. Taraswi Banerjee, Dr. Chaithali Mitra, Dr. Swati Bajaj, Dr. Dipanjana Dutta De, Dr. Somsuvra Nath for guiding me through the lab benches during the initial years. Dr. Antara Banerjee & Dr. Mainak Sengupta deserve a special mention. I started working for the thesis in this lab under their guidance, and developed a relationship which I will cherish throughout my life.

I consider myself very lucky for getting the company of very supportive co workers in my project; Dr. Antara Banerjee, Dr. Sudhashil Mookherjee, Dr. Deblina Banerjee who helped me mature my scientific thinking and taught me the experimental intricacies; Dr. Antara Banerjee, whose help I would look forward to, also in years to come for her expertise in experimental designing: The newest member of our group, Dr. Gautami Das and my junior Mansi Vishal, have extended all possible helps whenever required.

I have been blessed with some very special friends during this tenure; Maitreyee Mondal, Mansi Vishal, Sharmistha Sinha, Shashwata Mukherjee. They have been with me whenever I needed and helped me in all possible manners. Dr. Mainak Sengupta, senior most member of our lab was just like an elder brother, who has always stood selflessly by my side and provided any sort of help needed. Dr. Antara Banerjee, I am really thankful to her for her critical comment in experimental

designing. Dr. Somsuvra Nath, Sumana Bhattacharjya and Abhishek Chowdhury also deserve special mention for being such great companions.

I would also like to thank my co-workers Pinaki, Tania, Kumar, Sangeeta for providing convenient situation for running the sequencing machine at weird hours. I also thank Siddhartha, Kaushik, Shaoi, Kayum, Arindam, Abhirupa, Sanjitda, Udayanda, Mayukh da, Tapasidi, Somnath, Nandana, Debmita, Pallashri, Debashree, Barnita, Samir, Atul, Sanjibda, Ruma di, Damayanti di, Debrup for maintaining a positive lab environment. I also thank all the assistants and technicians of our laboratory, specially, Sudipto Da, Suryakanta, and Arun Da.

I take this opportunity to sincerely acknowledge the Council of Scientific and Industrial Research (CSIR), Government of India, for providing financial assistance in the form of Fellowship which buttressed me to perform my work comfortably.

This list is incomplete without acknowledging my college teachers Dr. Ashok Kr. Das, Dr. Suvasish Panda who have been the source of inspiration for me in my early days and who taught me many things. I am also thankful to Mr. Suparno Kanti Karati, Mr. Suva D. Ban, Dr. Mohit Kr Sinha, Dr. Reyazul Rouf Mir, Dr. Hira Das, Dr. Sumana Banerjee, Dr. Niladri Topdar, Dr. Amrita De and Dr. Moumita Das.

I also want to thank my friends from IICB: Sumit Bag, Santu Bag, Sudarshan Bhattacharya, Manidip Sashmal, Bipsheek Chakraborty, Suman Mullick, Rinku Baishya, Deepak Nayek, Indranil Banerjee, Abhijit Chakraborty, Seeman Bhattacharya, Tapashi Mondal, Arijit Bhowmik, Anirban Chatterjee, Feroz Ahmed, Indranil Paul and many others.

Words are insufficient to express my deepest regards to my parents and my brother who have provided me with all the freedom, guidance and emotional support during my entire academic career, particularly during the tough times in my research studies. Their immense sacrifice and hard work has made me the person I am today. My thesis work is entirely dedicated to them and probably the most precious gift I can give them in my lifetime. I also extend my sincere gratitude to all my family members and friends for their support and good wishes.
Acknowledgements

Finally, I sincerely thank all the, glaucoma patients and controls those who have provided me with the biological specimens, without which this dissertation will not take its present shape. I hope I have been able to benefit them with my small work on Glaucoma.
