Acknowledgement

This work was carried out in the Department of Physiology, Presidency College, Kolkata.

I would like to express my sincere gratitude and regards to my supervisor, Professor Chandan Mitra, Former Head, Department of Physiology, Presidency College, Kolkata for his constant guidance and untiring support throughout this study period.

I would also like to thank my project co-worker, Mr. Asankur Sekhar Das, for his selfless assistance in every aspect throughout this study. Thanks are also due to all my senior lab mates Dr. Dolan Das and Dr. Maitrayee Banerjee (nee' Mukherjee), and other lab mates Anasuya Maiti, Sangita Majumdar, Subhra Karmakar, Monalisa Choudhury and Aniruddha Ghosh.

Thanks are also due to Mr. Nirban Chandra Payne of the Department of Physiology, Presidency College, Kolkata for his selfless assistance.

Thanks are also due to Dr. D. Sen, Mr. A.K. Syamal and Dr. S. Mukherjee for their kind cooperation during the field study.

Dr. B. Banerjee, Advisor, National Tea Research Foundation (NTRF), Government of India, deserves special mention for his constant encouragement during this study.

Words are not sufficient to express my deepest sense of respect to Late Amitava Palchoudhuri, Former Director, Mr. Smarajit Palchoudhuri and Ms Nayantara Palchoudhuri, the Present Directors of the Washabarie Tea Estate, Duars, West Bengal, India for providing all administrative and field study assistance during the entire period of this study (2004-2008).

Thanks are also due to the senior and junior managers as well as the participating pluckers and factory workers of Washabarie Tea Estate, Duars, West Bengal, India for their kind support during this study.

I would also like to thankfully acknowledge National Tea Research Foundation (NTRF), Government of India, for funding this research work.

Place: Kolkata
