

ACKNOWLEDGMENTS

I gratefully acknowledge the constant and invaluable academic support received from my supervisor Dr. Subhasis Chattopadhyay. I am really thankful to him for helping me to find my elusive grounding in the research problem and without whose supervision it would have been never possible to complete this thesis.

It is my great pleasure to thank Profs. Sudeb Bhattacharya, Kamalesh Kar, Satyajit Saha, Supratik Mukhopadhyay, Nayana Majumdar, Debasish Majumdar and Ambar Ghosal from Saha Institute of Nuclear Physics for their encouragement and their support during different stages of this thesis work. I am really grateful to Dr. Naba Kumar Mondal, spokesperson of the INO experiment, Dr. D.K.Shrivastava, Head of Physics Group, Dr.Y.P.Viyogi, Head of the Experimental High Energy Physics and Application group and Dr. P. Barat, for their support, encouragement and useful suggestions in various stages during my research work.

I would like to sincerely thank Prof. Bikash Sinha, DAE Homi Bhaba Chair and Dr. R. K. Bhandari, Director, VECC for their continuous support to continue my work.

I am very much grateful to Professor D. Indumathi (IMSc) for her teaching on various subjects during my stay at Institute of Mathematical Science (IMSc). I would also like to thank Professor Goubinda Majumdar and Dr. Abhijit Samanta for their collaboration and useful discussions. I would like to thank Sanjib Kumar Agarwalla (IFIC), Asmita and Depak from TIFR, Andrews (Glasgow University), Laura (IFIC), Dr. Anselmo Carvera (IFIC), Dr. Ivan Kiesel(GSI), Andrey(GSI), Dr. Rob Veenhof (CERN), Dr. Deborah Harris (Fermi Lab) and Dr. Diego Gonzalez-Diaz (GSI). At this juncture I would like to extend my thanks to them for their help in learning different

computational packages, great friendship and sharing different thoughts for all these years.

I also thank all the Ph.D. students, my seniors and juniors at VECC and the members of the Physics Group for interesting discussions and wonderful explanations, for their enjoyable company and support. My special thanks to my batchmates Sidharth, Mriganka, Arnomitra, Saikat, Jhila, Rupa for their wonderful company in all these years and it is my great pleasure to thank Aparajita di, Mili di, Sukanya, Jamil, Arnab, Partha, Atanu da and Dhruba da. I have really enjoyed by working with them and their company.

I would like to acknowledge the INO Collaboration for providing the funding for this work.

My special thanks to my teachers from different academic institutes where I have studied, for their valuable suggestions, inspiration and encouragement, which help me to reach at this stage.

I would like to thank my wonderful parents Mr. Milan Kumar Ghosh and Mrs. Madhuri Ghosh, my mother-in-law Mrs. Jayanti Banerjee, my brother Manas, my husband Prasun and my relatives for believing in me. Their love, patience, constant support and inspiration help me to pursue my research works during all these years and I am extremely grateful to them. I have no words to acknowledge the sacrifice of my little son during the period of preparing this thesis work.
