I feel nostalgic to convey my gratitude to my spring years at JNU. Whenever I look back to my laboratory or my ‘lab’, as I call, it is the place where I learnt the meaning of success, disappointment and failures. I savored the bitter sweet taste of success. In my lab, one individual whose identity is inseparable, from my vision of the lab is my supervisor Dr. Arun Kumar Attri. It is very difficult to capture in words to explain his supervision and scientific values. He was always loving and willing to listen and explain. I am equally indebted to my co-supervisor Prof. V.K. Jain.

I am grateful to the Dean (SES), Prof. J.Subba Rao, for readily providing me with adequate research facilities in the school. I owe a deep sense of gratitude to Prof. P.S. Ramakrishnan who had shown me a appropriate place to carry out my research.

The logistic support provided by Prof. V.Subramanian and Dr. K.G. Saxena, by providing the use of the vehicle during field trips is highly appreciated. I am also thankful to Mr. Manoj and Mr. Dyal for their co-operation.

I am specially thankful to my friends Archna, Anita, Anil, Avinash, Bhaveshjee and Jhostna, Paulraj, Peer Jawahar family and Kanti family. Thanks are also due to Dr. Sen and Puran for their valuable help. Also, I am thankful to Suresh for his long distance encouragement.

My deep sense of gratitude goes to Nagendrajee and I also am thankful to late Balamjee.

I feel happy to express my heartiest gratitude to would be better half in my life, Gopi, for his constant encouragement and co-operation through my stay at JNU.
Finally, I bow my head in humble gratitude to Amma, Appa, Deviakka, Maama, Monaakka, Thambi, Anni, Pappu, Podian and Appu. Through these lines, I also express my deep sense of gratitude to my Uncle, Aunty and Sathish, without their blessings this work would have never reached its successful conclusion.

In the end, financial assistance from the University Grants Commission (UGC) is gratefully acknowledged.
