ACKNOWLEDGEMENTS

It is indeed a difficult task for me to put in words my gratitude for those who helped me in some way or other to complete this work.

I would like to express my gratitude to Dr. Om Singh, my supervisor, for readily accepting the proposal to supervise the project and to guide me. His friendly attitude, patient hearing to any problem presented and coming out with a quick solution and critical and quick analysis of data are simply wonderful.

I express my deep sense of gratitude to Prof. G. P. Talwar, Professor of Eminence, National Institute of Immunology, New Delhi, for providing an opportunity for me to work in this institute, permitting me to enroll for the doctoral program and his constant encouragement and suggestions throughout the course of this project. He has been a source of inspiration for me with bright ideas and vision. I feel honoured and proud to have him as my teacher.

I would like to express my gratitude to Prof. S. N. Wadhwa, Professor and Head, Dept. of Urology, AIIMS, New Delhi, for his valuable suggestions, constant encouragement and making me more and more interested by his genuine concern about the problem as a surgeon and eagerness to have a easy remedial measure. With his friendly manner I never felt uncomfortable in the operation theatre while collecting the samples. I feel proud to be his student.

I would also like to thank Drs. Gupta, Hemal and Dogra of Dept. of Urology, AIIMS, for providing the samples for this study.

My sincere thanks to Dr. Murthy of Forensic Science Deptt., AIIMS, for providing me tissues from accidental death cases.

My sincere thanks to Dr. S. K. Basu, Director, National Institute of Immunology for providing me the necessary facilities.

I am thankful to the members of my doctoral committee, Dr. Chandrima Shaha, Dr. Lalit Garg and Dr. S. N. Upadhaya, for their valuable suggestions.

I would like to express my sincere thanks to Rahul for his critical analysis of data, providing every bit of suggestions for carrying out the experiments and intimating me over phone any additional ideas.

My sincere thanks to Dr. S. M. Totey for making his laboratory accessible any time to carry out culture work apart from his friendly company and help as and when required to do the experiments. Inspite of shifting to new toxicology laboratory I still love to work in Embryo biotechnology lab. because of wonderful association provided by Drs. Totey, Chaitanya, Appa, Manesh, Anita (N) and Anita (P).

I am thankful to Sweety and Sahai-Sahab for helping me in purification.
I would like to thank Ayub and Sarin-Sahab for their help in raising monoclonal antibodies.

I am extremely thankful to Neelaram, Roy, Radhey, Ramesh, Raju, Ram Singh Ji for their timely help. Neelaram in particular was more helpful in immunohistochemical work and taking pain to type this thesis beyond the working hours. Without his help it won't have been possible to submit the thesis in time.

My thanks to Dr. Chandrasekar for taking pain to go through the thesis and making the necessary corrections.

My thanks to Babulal for photocopying and Satish for binding this thesis.

I am thankful to Ashok for helping me grow large number of cells for nude mice experiments. I am also thankful to Dr. Panda for helping me in purification of antibodies.

Special thanks to Vasan Ji and Dharambir for their help in official communications.

I am extremely thankful to Ram, Kumar and Mohan, my brother-in-laws for their immense love and encouragement in every letter and visit to India. Ram in particular deserves special appreciation for keeping my morale high with his every encouraging letter and for his every sincere effort to make me and my wife, Uma happy always.

Last but not the least, I am extremely thankful to my parents, wife and brother for their understanding, love, affection and encouragement. My son ‘PARTHO PRATIM’ missed me a lot and deserves special appreciation for his understanding.
