

ACKNOWLEDGEMENTS

During the course of experimentation and writing of my Doctoral Work, I received a great deal of help from many individuals and I think it prudent to take this opportunity to heartily acknowledge all such help.

At the outset I would like to pay my tribute and express my gratitude and indebtedness to my suiter and mentor, **late Prof. Dr. S.R.C. Trivedi**, the then Head, of the Chemistry Department, Magadh University, Bodh Gaya (Bihar) for not only encouraging and motivating me to do Ph.D., but also for going the extra mile in helping me in so many ways viz., introducing me to many Scientists of erstwhile Central Fuel Research Institute (now Central Institute of Mining and Fuel Research (CIMFR),- Digwajdih Campus Dhanbad (Jharkhand) and ISM University, Dhanbad, and also for arranging through them the collection of coal samples for this work and their analyses too as and when required. But for Prof. Trivedi, it would not have been possible for me to do the present Doctoral work.

In equal – if not more, measures, I wish to thank profusely and heartily my Supervisor, **Dr. D.P. Pandey**, Assot. Prof., Department of Chemistry, Satish Chandra College, Ballia for his constant encouragement, able guidance and valuable suggestions from time-to-time during the course of the present research work and writing of the thesis. Only through the guidance and blessings of my Guru has it been possible for me to submit the thesis in its present form. In the same strain, I also take the opportunity to place on record my gratitude and thankfulness to **Dr. K.N. Chaubey**, the Principal, S.C. College, Ballia, for encouragement and providing the available facilities and a conducive environment in the College or carrying out my research work. Likewise, my gratitude flows strong also to **Dr. Vinay Upadhyay**, Head, Chemistry Department, S.C. College, Ballia for providing the required laboratory facilities for the experimental work and also other help in the completion of my work.

To **Drs. C.B. Pandey, H.K. Pandey, A.K. Pandey, Dr. Ranbeer Singh** and all other colleagues of the Chemistry Department, of S.C. College. I owe my hearty thanks and sincerest appreciation for their constant encouragement, moral support and ungrudging help whenever required. They ideally qualify for the maxim "*Friends in need are friends indeed*".

I shall be failing in my bounden duty if I donot heartily acknowledge, with reverence, the sacrifices made by my father **Shri Jai Shanker Mishra**, who, keeping his other priorities in abeyance and even putting himself in difficulty, unhesitantly provided financial help required by me, and was never tired of encouraging me and showering onto me his parental love and affection in my difficult times. I am deeply overwhelmed and words fail me to express my sentiments and show my gratitude to him. All I can say at the moment is : I love and adore you dear Dad from the deep bottom of my heart.

I also thanks to my family member's Smt. Manju Mishra (Mother), Suman Mishra, Sweta Mishra.

It would be inept on my part not to thank and express my gratitude to my younger brothers – **Dr. Animesh K. Mishra, Devesh Mishra, sister-Priyanka Mishra (W/o Rakesh Dhar Upadhyay)** and friends **Er. Shri Dhiresk Kumar, Dr. Akhilesh Gupta, Shankarjee (Srishti Computer, Ballia)** who provided all time help and assistance of different sorts during the course of the preparation of this thesis.

I heartily thanks to Mr. Sahid Sir (Director, DPCS, Ballia), Jitendra Mishra, Birendra Tiwari, Kamal Sir, Faiyaz Sir, Sahid Parvej & Bhuwan Yadav.

As mentioned in the very beginning, I received a great deal of help and invaluable support from several Scientists and individuals of the Analytical, RQA, and Environmental Management Divisions of erstwhile CFRI (Dhanbad),; CGCRI (Kolkata), and erstwhile RRL (Jammu), in the collection of coal samples from different places and their Chemical and Instrumental analyses (XRD, DTA/TGA, SEM,). While heartily acknowledging all such help and expressing my indebtedness to all of them I have absolutely no hesitation in openly admitting that without their whole-hearted and ungrudging help, the thesis would probably not have seen the light of the day. And for their this help,, I shall ever remain grateful to all the concerned Scientist and the authorities of the respective Institutes.

Lastly, but never in the least, I would like to place on record my deep sense of appreciation and thankfulness to the Librarians and other staff of the Libraries of erstwhile CFRI and Indian School of Mines , Dhanbad, who freely allowed me to use their Libraries and consult the Journals, Books, and other materials, and wherever required allowed me to xerox the relevant papers. The invaluable help received from the former Head Geology Division of CFRI (Dr. A.K. Mukherjee) in the interpretation of correlational aspects of mineralogy of Wardha Valley and Jammu coals with their geological formation is gratefully acknowledged.

Finally, if it has slipped from my memory to mention the name(s) of any individual who extended help to me in any form during the course of experimentation and preparation of the thesis, the unintentional omission and commission is mine – and mine alone and while thanking them heartily, I beg their forgiveness.

Place : Ballia
