Acknowledgements

It is a great opportunity to convey my gratitude to those individuals who have been involved at any phase of the present study and besides rendering their help, they also provided unending encouragement and moral support that led to the successful accomplishment of the work.

This thesis would not have been possible without the guidance and the help of several individuals who in one way or another contributed and extended their valuable assistance in the preparation and completion of this study.

First and foremost, I would like to convey my utmost gratitude to my study participants for their participation and unhesitating cooperation by providing necessary information to complete the study, at the cost of their valuable time and in conveniences.

I really feel honored and fortunate to express my sincere and profound gratitude to Professor Barun Mukhopadhayay for his continuous support, patience, motivation, enthusiasm, immense knowledge, exemplary guidance and monitoring throughout the course of this study and research. His guidance helped me in all the time of research and writing of this thesis.

I am also feeling honored to express my gratitude to Dr. Susmita Mukhopadhyay for her consistent encouragement, insightful comments and continuous support at every step of this work. Without her active participation in the major events of the study, this thesis would never have come into existence.

I would like to express my deep gratitude and respect to Prof. Ranjan Gupta whose advice and insight was invaluably helped to shape interests and ideas of my thesis. I owe my deepest gratitude to Professor Premananda Bharati, Dr. Subrata Roy, Dr. T.S. Vasulu for their benevolent help and numerous valuable suggestions in many stages of the study.
