ACKNOWLEDGEMENTS

I like to convey thanks to Dr S Shivaji, Scientist, Centre for Cellular and Molecular Biology (CCMB), Hyderabad with gratitude and respect. His careful guidance and constant encouragement have enabled me to venture through this project. I also sincerely acknowledge the kind help and cooperation I have received from my colleagues working in his laboratory.

I am highly appreciative of the support and encouragement I have received from Prof D Balasubramanian, Director, CCMB.

I am sincerely thankful to Dr Ch Mohan Rao, Scientist, CCMB and Dr K Narayanan, CCMB for their help during photoacoustic spectroscopic studies, Dr M Vairamani, Scientist, Indian Institute of Chemical Technology (IICT), Hyderabad for help during mass spectral studies. I am also appreciative of the help I received from Dr M K Chattopadhyay, Scientist, CCMB and also from Dr N J Rao, Scientist, IICT during various stages of the work. I acknowledge the help of Dr A S R Krishna Murthy, Scientist, IICT during NMR spectral studies and of Dr C S Sundaram, Scientist, CCMB during NMR studies.

I thank Dr T Ramakrishna Murti, Scientist, CCMB for showing interest in the progress of my work and for his patient proof reading of my thesis.

I am sincerely appreciative of the encouragement I have received from Dr R Nagaraj and my colleagues in his Group. The service rendered by the Instrumentation Section, Photography Section, Drawing Section and Xerox Section of CCMB is sincerely acknowledged.

I am thankful to Mrs N Rajani for typewriting this thesis and also to the members of my family for giving me constant inspiration.

M. V. Jagannadham
