ACKNOWLEDGMENTS

It is a pleasure to thank everybody who have helped me at different stages of my research carrier and my stay at the University of Hyderabad.

First of all, I should thank my supervisor Dr. D. Narayana Rao for his guidance and constant encouragement. His dedication and developmental skills have inspired me beyond words.

I thank the Dean, School of Physics, for providing the necessary facilities. This gives me an opportunity to thank all the faculty members of the school for their motivating research atmosphere and the non-teaching staff for their cooperation.

Financial assistance during my research tenure from the University Grants Commission, India is greatly acknowledged.

I must acknowledge the help of Mr. C.S. Murthy, CIL for his help in building some electronic circuits and R.K. Swamy, M/S Welltech Engineers for the development of optical hardware essential for the experiments.

My lab mates and colleagues Venu, Siva, Ram Mohan, Chandrasekar, Raji and Geeta have always helped me at all stages of my work, sometimes even sparing their working hours.

Friends like Gautam, Ashoka, Chandan, Harsha, Sarief, Satish, Jolly, Soma and lots of others have been of support at all times. Old pals, Drs P.K. Rajan, S. Arun Kumar, M. Ramachandran have really made my stay a memorable one. Their acquaintance have made me feel that there is always a lot to learn.

It feels great to have people like Prof. M. Ramanan and his family to keep ones niceties intact.

Special thanks to Dr. N. Ramesh and Sripriya for inspiring me into a research career and Mr. Ramakrishna, U Mass., Boston, for the crucial help during final stages of thesis writing.
With a deep sense of gratitude I must acknowledge my family. Without the support and encouragement from my parents and brother, this dream of mine would have remained so. I should thank also my in-laws for their cordiality. And finally, the patience, understanding and care my wife, Kavita could download from thousands of miles is simply my asset.
