ACKNOWLEDGEMENTS

I have not traveled in a vacuum in this journey. Interdependence is certainly more valuable than independence. There are some people who made this journey easier with words of encouragement and more intellectually satisfying by offering different places to look to expand my theories and ideas. It is a pleasant aspect that I have now the opportunity to express my gratitude for all of them.

The first person I would like to thank is my direct supervisor Dr. Y. Padmanabha Reddy, Principal, Raghavendra Institute of Pharmaceutical Education and Research, Ananthapuramu, who offered his continuous guidance and moral support. I owe him lots of gratitude for having me shown this way of research. Dr. Y. Padmanabha Reddy challenged me to set my benchmark even higher and to look for solutions to problems rather than focus on the problem. I could not have imagined having a better advisor and mentor for my Ph.D, and without his common-sense, knowledge, perceptiveness and cracking-of-the-whip I would never have finished. In addition, he was always accessible and willing to help his students with their research. As a result, research life became smooth and rewarding for me.

I would akin to communicate my genuine thanks to my co–supervisor, Dr. N. Devanna, Professor of Chemistry, Jawaharlal Nehru Technological University Anantapur, Ananthapuramu, for his massively direction, suggestions and encouragement for success of my thesis.

I am deeply indebted to our loved Correspondent Dr. J. Ravindra Reddy, Raghavendra Institute of Pharmaceutical Education and Research, Ananthapuramu, for providing available services of department, encouragement, suggestion and co-operation which really help me in this research work and all teachers for their immense help and support.

I am deeply indebted to Prof. S. V. Satyanarayana, Director, Research and Development, Jawaharlal Nehru Technological University Anantapur, Ananthapuramu,
for his encouragement, suggestions and co-operation which really help me in this research.

I gratefully acknowledge the co-operation extended to me by my friend Dr. C. Sowmya for valuable advice in my work, spending her precious time to read this thesis and giving her valuable suggestions. She was always beside me during the happy and hard moments to push me and motivate me.

I would like to thank Dr. M. Geethavani for her support, encouragement, generous care and personal attention.

It is also a pleasure to express my thanks to my friends and colleagues Dr. M. Kiran Kumar, Dr S. Janardhan, Mr. B. Pradeep, Mr. A. Sudheer, Mr. C. Haranath, Mr. Badri, Mr. K. Vinod, Mr. Arshad, Mr. Bharghav and Rajesh Reddy for their love, care and support.

It’s my pleasure to acknowledge Mr. S. Nagarjuna & Mr. A. Sanjeev Kumar for their constant encouragement, hard questions and moral support.

I express my thanks to Institutional Animal Ethical Committee for giving ethical clearance of animal study for my dissertation.

I would like to express my gratitude to my beloved students Rushi Kumar Reddy and Sathyakeerthi pani for their valuable support during the work.

I also to express my thanks to Mr. Sandeep, Mr Raju and Mr Ramana, Pharmaceutics lab technicians for kind support during the process of dissertation.

Above all I would like to acknowledge the tremendous sacrifices that my family members, my wife Pavithra and my children Pranav & Hasini made to ensure that I had an excellent education. For this and much more, I am forever in their debt. It is to them that I dedicate this thesis.
Last but not least, thanks to God for my life through all tests in the past few years. You have made my life more bountiful. May your name be exalted, honored, and glorified.

In addition, I would like to convey my special thanks to all other teaching and non-teaching staff of Raghavendra Institute of Pharmaceutical Education and Research (RIPER), Ananthapuramu, for their emotional support and help extended during my research work.

Finally, I am thankful to one and all that were involved directly or indirectly in this journey.

Suryaprakash Reddy C
