# TABLE OF CONTENTS

## CHAPTER 1: INTRODUCTION 1-31

The noncovalent forces that contribute to the conformational stability of proteins 5-13
- Hydrogen Bonding 5
- Electrostatic Interactions 8
- van der Waals Interactions 10
- The Hydrophobic Effect 11

Techniques for stabilizing proteins 13-19
- Adding disulfide bonds 14
- Adding cation and anion binding sites 15
- Protein engineering 15
- Solvent engineering 17

Techniques for measuring protein stability 19-26
- Spectroscopy 20
- Differential Scanning Calorimetry 21

Outline of the present research problem 26-31

## CHAPTER 2: MATERIALS AND METHODS 32-56

Materials 33

Methods 33-37
- Preparation of solutions and buffers 33
- Differential Scanning Calorimetry 34
- Circular Dichroism studies 35
- Activity Measurements 35
- Surface Tension Measurements 36

Instrumentation and method of analysis 38-48
- Differential Scanning Calorimeter 39
General description 39
Control module 40
MC-2 DSC cell 44
General precautions 45
Sample preparation 46
Cell loading 46
Cell cleaning 47
Temperature calibration 47

Method of Analysis of Calorimetric Data 49-56
Theory 49
2-State equilibrium model 49
Multistate equilibrium 51
Kinetic analysis of DSC thermograms 52
The two state irreversible model 52
Analysis by ORIGIN™ Software 54

CHAPTER 3: pH DEPENDENCE OF DOMAIN TRANSITIONS IN YEAST HEXOKINASE A 57-67
Introduction 58
Results 59-65
Differential Scanning Calorimetry 59
Circular Dichroism Spectroscopy 63
Activity Measurements 64
Discussion 65-67

CHAPTER 4: THERMAL STABILITY OF YEAST HEXOKINASE A IN AQUEOUS POLYOL SOLUTIONS 68-84
Introduction 69
Results 70-79
Differential Scanning Calorimetry 70
Circular Dichroism Spectroscopy 74
CHAPTER 5: THERMAL STABILITY OF YEAST HEXOKINASE A IN AQUEOUS SOLUTIONS OF GLYCINE AND ITS METHYL DERIVATIVES

Introduction 86
Results 88-96
Differential Scanning Calorimetry 88
Activity Measurements 96
Discussion 96-100

CHAPTER 6: THERMAL STABILITY OF YEAST HEXOKINASE A IN AQUEOUS CARBOXYLIC ACID SALT SOLUTIONS

Introduction 102
Results 104-119
Differential Scanning Calorimetry 104
Activity Measurements 117
Discussion 119-123

BIBLIOGRAPHY 124-147
