1 Introduction	1
Bibliography	22
2 Sub-Barrier Fusion	24
2.1 The Compound Nucleus Formation and Decay	24
2.2 Models of Sub-Barrier Fusion	28
2.2.1 The Sharp Cutoff Model for Fusion (Classical Picture)	33
2.2.2 One Dimensional Barrier Penetration Model (1D-BPM)	34
2.2.3 Geometric Models	38
2.2.4 Energy Dependent Barrier Penetration Model	40
2.2.5 Stelson Model	40
2.2.6 The Neck Formation Model	41
2.2.7 The Optical Model for Fusion	42
Bibliography	44
3 The Coupled Channels Model for Fusion	46
3.1 The Coupled Channels Formalism	47
3.2 The Simplified Coupled Channels Formalism	49
3.2.1 The Simplified Coupled Channels Code - CCMOD	52
3.3 Exact Coupled Channels Calculations	56

3.3.1	The Exact Coupled Channels Code - CCFULL	58
	Bibliography	62
4	Fusion Barrier Distribution: Concept and Experiments	64
4.1	Representation of the Barrier Distribution	65
4.1.1	$D^f(E)$ from Experimental Data	66
4.2	Barrier Distribution from Scattering Data	68
4.2.1	$D^{qel}(E)$ from Experimental Data	70
4.3	Review of Barrier Distribution Measurements	71
4.3.1	Reactions Involving Rotational Nuclei	72
4.3.2	Reactions Involving Vibrational Nuclei	72
4.3.3	Reactions Involving Transfer Coupling	73
4.3.4	Barrier Distribution from Quasi-Elastic Scattering	74
4.4	Review of Coupled Channels Calculations	75
4.4.1	Effect of Non-Linear Couplings	76
4.4.2	Effect of Anharmonicities of Nuclear Vibrations	77
4.4.3	Effect of High Lying States	77
	Bibliography	79
5	Experimental Details	82
5.1	The Heavy Ion Reaction Analyser	83
5.2	The Detector Setup	85
5.2.1	The Focal Plane Detector System	85
5.2.2	The Four Monitor Detector Arrangement	87
5.3	Other Experimental Details	87
5.3.1	Target	87
5.3.2	Time of Flight Measurement with Pulsed Beam	88
5.3.3	Experimental Setup	89
5.4	Detection Efficiency	91

5.5	Systems Studied	95
5.5.1	$^{16}\text{O} + ^{112,116}\text{Sn}$ Systems	96
5.5.2	$^{16}\text{O} + ^{120}\text{Sn}$ System	97
5.5.3	$^{37}\text{Cl} + ^{116}\text{Sn}$ System	97
5.5.4	$^{32}\text{S} + ^{112,116,120}\text{Sn}$ Systems	98
Bibliography		99
6	Results	100
6.1	Fusion	100
6.1.1	Estimation of the Fusion Cross Section	108
6.1.2	Calculation of Barrier Distribution	110
6.1.3	Results	111
6.2	Quasi-Elastic Scattering	120
6.2.1	Estimation of the Differential Cross Section	120
6.2.2	Calculation of Barrier Distribution	120
6.2.3	Results	121
Bibliography		125
7	Analysis and Discussion	126
7.1	$^{16}\text{O} + ^{112,116}\text{Sn}$ Systems	135
7.2	$^{16}\text{O} + ^{120}\text{Sn}$ System	141
7.3	$^{37}\text{Cl} + ^{116}\text{Sn}$ System	143
7.4	$^{32}\text{S} + ^{112,116,120}\text{Sn}$ Systems	148
Bibliography		161
8	Summary and Outlook	165
A		170
A.1	Tables of Measured Fusion Cross Sections	170
