

LIST OF TABLES

	Page No
1.1 Coefficients Used to Standardise Data for the Original 12 Districts of Punjab	29
2.1 Compound Growth Rate of Net and Gross Irrigated Area and Cropping Intensity in Punjab (1980 – 2005)	47
2.2 District-wise Net Irrigated Area in Punjab by Sources (1980 – 2005)	52
2.3 Percentage of Net Irrigated Area to Net Sown Area	53
2.4 Compound Growth Rates of District-wise Irrigated Area in Punjab by Sources (1980 – 2005)	53
2.5 Regional Variations in Share under Different Sources of Net Irrigated Area with Respect to Punjab	55
2.6 Structure of Irrigation in Punjab	55
2.7 Shifts in Cropping Pattern in Punjab (1966-67 to 2006-07)	57
2.8 District-wise Crop Combinations in Punjab	58
2.9 Classifications of Districts by Status of Crop Specialization (1980-81 and 2005-2006)	59
2.10 Compound Growth Rates of Area under Rice and Wheat in Punjab (1980 - 2005)	65
2.11 District-wise Changing Demand of Irrigation Water in Punjab	74
2.12 Percentage of Gross Irrigated Area to Gross Cropped Area in Punjab by Some Selected Crops	75
3.1 Criteria for Categorisation of Assessment Units	87
3.2 Changing Groundwater Situations in Punjab	91
4.1 Cost of Cultivation of Rice and Wheat across Different Irrigation Systems	101
4.2 Comparison of Electricity Rates in Punjab and Other States of India	103
4.3 Share of Input Cost in Cultivation of Rice and Wheat across Different Irrigation Systems	105
4.4 Net Returns of Wheat and Rice across Different Irrigation Systems	107
4.5 Cost of Cultivation and Net Returns of Different Crop Combinations	110
4.6 Costs of Cultivation of Rice across Different Landholding Size Groups in Different Irrigation Systems	115
4.7 Cost of Cultivation of Wheat across Different Landholding Groups in Different Irrigation Systems	117
4.8 Yield of Rice and Wheat Cross Different Landholding Groups in Different Irrigation Systems	118

4.9 Net Returns to Cultivation of Rice across Different Landholding Groups in Different Irrigation Systems	119
4.10 Returns to Cultivation of Wheat across Different Landholding Groups in Different Irrigation Systems	121
4.11 Ratio of Cost and Returns to Cultivation of Rice and Wheat across Landholding Classes In Different Irrigation Systems	123
5.1 Household Landownership Categories By Different Irrigation Systems	135
5.2 Incidence of Tenancy by Landownership in Different Irrigation Systems	136
5.3 Tube Well Ownership and Area of Influence of Tube Wells across Farm Size Classes in Different Irrigation Systems	146
5.4a Types of Tube Well Ownerships across Farm Size Classes in Different Irrigation Systems	151
5. 4b Types of Tube Well Ownerships across Farm Size Classes in Different Irrigation Systems	152
5.5 Irrigated Area under Various Sources across Different Landholding Classes in Different Irrigation Systems	162
5.6 Cropping Pattern of Different Irrigation Systems According to Landholding Size Classes	165
5.7 Groundwater Accessed Across Landholding Size Classes in Different Irrigation Systems	168
5.8 Cost of Groundwater Used Across Landholding Size Classes in Different Irrigation Systems	171
5.9 Proportional Cost of Groundwater Used Across Landholding Size Classes in Different Irrigation Systems	172
5.10 Return from Cultivation of Rice and Wheat with Market Subsidy across Landholding Size Classes in Different Irrigation Systems	175
5.11 Proportional Share of Market Subsidy across Landholding Size Classes in Different Irrigation Systems	176
5.12 Groundwater Equity for Farm Size Classes in Different Irrigation Systems	178
5.13 Measures of Income Inequality in Different Irrigation Systems	181
6.1 Size Class Classification of Farmers According to Their Role in Groundwater Market	189
6.2 Farm Size Holding and Operational Size Class across Various Forms of Water Markets	192
6.3 Proportion of Households Dependant on Groundwater Purchase	193
6.4 Breadth and Depth of Groundwater Markets in the Sample Villages	194
6.5 Reasons for Participation and Non Participation in Groundwater Market	196
6.6 Distribution of Number and Area of Groundwater Transactions According to Mode of Payment	202

6.7 Crop-Wise Distribution of Total Area under Different Modes of Groundwater Transactions	203
6.8 More Developed and Less Developed Groundwater Markets	211
6.9 Relationship between the Mode of Water Transactions and the Level of Development of Groundwater Markets	213
6.10 Relationship between the Nature and Mode of Water Transactions and the Level of Development of Groundwater Markets	215
6.11 Cropping Pattern in the Study Villages	227
6.12 Productivity of Different Crops in Different Irrigation Systems According to the Role of Farmers in Groundwater Markets	228
6.13 Cost of Cultivation per Acre of Wheat under Different Forms of Water Markets	230
6.14 Cost of Cultivation per Acre of Rice under Different Forms of Water Markets	230
6.15 Net Returns per Acre of Wheat under Different Forms of Water Market	231
6.16 Net Returns per Acre of Rice under Different Forms of Water Market	232
6.17 Determinants of Monopoly of Power Enjoyed By the Water Sellers	238
7.1 Factors Taken into Account in Deciding Current Year's Cropping Pattern across Different Farm Classes in Different Irrigation Systems	242
7.2 Farmers' Response Regarding Efforts Made to Raise Production by Investments across Different Irrigation Systems	245
7.3 Reasons for Farmers to Grow Rice and Wheat Even When the Government Stops Giving Guarantee MSP and Free Agricultural Electricity across Different Irrigation Systems	247
7.4 Farmers' Attitude with Regard to Neighbouring Well-Owners	249
7.5 Farmers' Response Regarding Electricity Supply across Different Irrigation Systems	252
7.6 Characteristics of Farmers According to Their Levels of Satisfaction with Respect to Supply of Electricity in Agriculture	255
7.7 Willingness to Pay User Charges by Farmers in Different Irrigation Systems	256
7.8 Characteristics of Farmers According to Their Willingness to Pay Electricity Tariff	258
7.9 Willingness to Pay User Charges by Farmer Class in Different Irrigation Systems	259
7.10 Coping Strategies Adopted and Will Be Adopted by Farmers	261
7.11 Coping Strategies Adopted and Will Be Adopted by Classes of Farmers in Different Irrigation Systems	262
7.12 Farmers' Response with Regard to Ground Water Regulation	264
8.1 Comparison of Groundwater Irrigation and Electricity Scenario in Punjab and Other States of India	277
