ACKNOWLEDGEMENTS

Pursuing a Ph.D. project is a both painful and enjoyable experience. It’s just like climbing a high peak step by step, accomplished with bitterness, hardships, frustration, encouragement and trust with so many people’s help. Though it will not be enough to express my gratitude in words to all those people who helped me, I would still like to give my thanks to all these people.

My first debt of gratitude must go to my supervisor-I Dr. Sanat Agrawal, Associate Professor, Department of Mechanical Engineering, JUET, Guna. He offered me so much advice, patiently supervising me, and always guiding me in the right direction. His understanding, encouraging and personal guidance have provided a good basis for the present thesis. I’ve learned a lot from him. His wide knowledge and his logical way of thinking have been of great value for me. He provided the vision, encouragement and advice necessary for me to proceed through the doctoral program and complete my dissertation.

I am deeply grateful to my supervisor-II Dr. A. K. Dubey, Associate Professor, Department of Mechanical Engineering, MNNIT, Allahabad, for his detailed and constructive comments, and for his important support throughout this work. I’ve learned a lot from him.

I also thank Jai Prakash Seva Sansthan for allowing me to be part of a great professional community. I am very grateful to Dr. Y. Medury, Chief Operating Officer, Jaypee Education System, for the cooperative spirit and providing excellent working environment. I am deeply grateful to Professor N.J. Rao, Vice Chancellor, JUET, Guna, for the cooperative spirit and providing moral and financial support, his excellent guidance and encouragement.
I express my special thanks to Professor K. K. Jain, Dean Academic and Professor D. S. Hooda, Dean Research, JUET, Guna, for their consistent help and encouragement.

I wish to express my warm and sincere thanks to Professor J. N. Dube, Head Mechanical Engineering Department, JUET, Guna, who gave me important guidance. His ideas and concepts have had a remarkable influence on my work. I would also like to thank Dr. Amit Mishra, Assistant Professor (SG), Electronics Engineering Department, JUET, Guna for their valuable advice and friendly help. Their extremely valuable experiences, extensive discussions around my work and interesting explorations have been very helpful for this study.

I owe my most sincere gratitude to Dr. M. M. Dwivedi, Engineer in National Centre of Experimental Mineralogy and Petrology (NCEMP), Allahabad (U.P.) for providing all the necessary facilities in the lab for taking measurement.

I warmly thank Dr. Arun Kumar Pandey, Asst. Professor (SG), Department of Mechanical Engineering, JUET, Guna for their valuable advice and friendly help. Their extremely valuable experiences, extensive discussions around my work and interesting explorations have been very helpful for this study. Their detailed review, constructive criticism and excellent advice during the preparation of this thesis were very helpful.

My special gratitude is due to my parents and my father in-law for their unending support. Their love provided me inspiration and was my driving force. Last but not the least I owe my loving thanks to my wife Jyoti Norkey, my daughters Anshika, Manya and my son Master Moulik Norkey without their encouragement and understanding it would have been impossible for me to finish this work.

(GAVERDRA NORKEY)
