Acknowledgement

From the beginning it was clear to me......

This is not about me or what I can do,

Rather this is about what God wants me to do and

how He will enable me to do it.

A journey is easier when you travel together. Interdependence is certainly more valuable than independence. This thesis is the result of four years of work where by I have been accompanied and supported by many people. It is a pleasant aspect that I have now the opportunity to express my gratitude for all of them.

I wish to express my indebtedness to my respected guide Dr. M. K. Agarwal (Sci.‘E’) for introducing me to field of great relevance "Studies On Production, Purification And Characterization Of Aflatoxin From Aspergillus Species". The assignment during this work were meticulously designed and splendidly executed under the impeccable guidance of him. His amazing energy and abiding optimism, inspiring presence and infectious enthusiasm, envious knowledge and sincere dedication, deep erudition and disarming frankness and above all an intensely human have left an impression upon me, never seeking to impose his views upon me, he consistently treated me with great kindness and evinced a keen interest in the progress of this work. My humble salutation and reverence to such rare combination of powerful intellect, novel mind and a compassionate heart.

Really fortunate I am, For I got the opportunity to work would Co- guidance of Dr. Sameer S. Bhagyavant (Sr. Lecturer SOS Biotechnology, Jiwaji University, Gwalior). I wish to place on record my indebtedness for his constant inspiration, talented and well versed advice, constructive criticism, kind courtesy and sustained interest in completion of my thesis.
My sincerest regards and gratitude to Dr. Lokendra Singh Director, D.R.D.E., Gwalior, Dr. M.P. Kaushik and Dr. R. Vijayaraghavan, Ex-Director DRDE, Gwalior for his encouragement, unconditional help and support. I enjoyed all the scientific and technical support required for the thesis just because he maintained the congenial environment at the Establishment.

I am deeply grateful to Dr. D.V. Kamboj (Head, Biotechnology Division) and Dr. B.K. Bhattacharya (Ex. Head, Biotechnology Division) for his sublime benevolence, advice and encouragement. This work would have been incomplete without his keen interest throughout the course of this research work.

I extend my sincere thanks to Dr. R.K. Srivastav (Head Technical Coordination and Human Resource Development) for their support and kindness has been of great value during my experimental work.

I feel great pleasure in expressing my deep sense of obligation for the cordial cooperation to Dr. Sushil Kumar Sharma (Sci. “C”) Biotechnology division, throughout the entire tenure of my work.

I am very much Thankful to Dr. R.K. Dhaked, Dr. A.K. Goel, Dr. S.I. Alam, Dr. S. Ponsmariappan, Dr. Sanjay Kumar, Dr. V. Vasudevan, Dr. D.P Nagar, Mr. Arvind Tomar and Ms. Pallavi Gupta for Providing help and their valuable suggestion throughout the work.

I consider it a great privilege to record my deepest sense of gratitude to Dr. Parida (Head, virology division) and Dr. Shashi Sharma (virology division) for providing Hela cell line required for the work and helped me to conduct my experiments despite having lots of commitments in the laboratory.

I am greatful to staff of library of DRDE for allowing me to collect all the literatures for my work.

One needs sincere friends at all major junctures in life to bear strains and fatigue cheerfully. I have been very lucky in this respect. I wish to record my sense of
gratitude to Ritu Das, Poonam Verma, Mr. Ravi, Mr. Virendra, Vinita, Ritu Gaur, Arti, Savita, Megha and Neha mam, for their helpful discussion.

I express my gratitude to Mr. Vivek Srivastava and Gita Prasad for helping me morally support inspite of being far away.

I am also very much thankful to Virendraji, Govindji, Akash, Khemraj and all the non technical staff of DRDE who directly or indirectly help me throughout the course of the work.

This thesis is ultimately a tribute to my Guruji, father, mother, sister Ragini, brother Praveen and my in laws whose untiring efforts and sacrifice made my pursuit of science possible. They supported me in every field with great confidence, faith and munificence. I only wish, I could attain the heights that they have lovingly dreamt for me.

I feel honoured to dedicate this work to my guruji & beloved parents.

Whatever I am and have right now, it all stems from the loving grace and mercy of my Saviour, Friend, Father, Mother, Comforter and Goddess Maa Durga Despite of who I am, She made a way to use me for Her glory. She alone deserves all praises and glory for without Her, I can do nothing......Without Her I am nothing.

Renu K hare
