Acknowledgement

This thesis is an outcome of assistance, support and guidance of numerous people. I, therefore, offer my thanks to all of them.

First of all, I would like to express my sincere gratitude to my esteemed supervisor Prof. Jagdish Narayan, Department of Economics, University of Allahabad. A teacher, a friend and a guardian; I am indebted for his patience and encouragement. His immense knowledge and thoughtful guidance helped me throughout to complete this thesis.

Dr. Alka Agarwal, former Professor, Department of Economics, University of Allahabad, I am grateful for her guidance and support during the early days of my D.Phil. for writing synopsis; and specially for she gave me the opportunity to meet Dr. Jean Drèze.

I am deeply thankful to Dr. Jean Drèze, the person who conceptualized the initial draft of National Rural Employment Guarantee Act, for his valuable suggestions on the D.Phil. synopsis. At whatever point I asked for his help during this work, he generously responded.

I am grateful to Dr. Kunal Keshri, Assistant Professor, G.B. Pant Social Science Institute, Jhunsi, for equipping us with the soft skills. His ready availability and friendly approach has helped a lot during the data analysis.

Prof. S. Madheswaran (Professor and Head, Centre for Economic Studies and Policy, Institute for Social and Economic Change, Bengaluru) delivered only a couple of lectures in the pre-D.Phil. coursework program that changed the way I use to perceive my research work. I am grateful to him for his lucid way of explaining concepts with practical usage on statistical software.

I am grateful to Prof. Manmohan Krishna, Head, Department of Economics and Prof. Prahlad Kumar, Dean, Faculty of Commerce, University of Allahabad, for their generous support. I would also like to thank Dr. Javed Akhtar, Department of
Economics, for his comments and suggestions on the Pre-DPhil. paper. Throughout this journey, the Department of Economics turned out to be my second home and I am deeply thankful to each and every member of this family.

I am thankful to all my friends and colleagues; with a special mention to Garima Maurya, Archana Mishra, Suraj Sharma, Tarun Kumar Upadhyay, Anupam Kumar, Vivek Kumar Jayasawal, Rahul Kumar Rai, Sneha Shukla, Ms. Niharika Srivastava, Prashant Kumar Pandey and Surendra Singh.

I owe it all to my parents Mrs. Seema Ganguly and Mr. Kishore Kumar Ganguly, and my beloved sibling Deepu Ganguly. Without their love, support and encouragement, it would not have been possible to complete this work.

And finally, I want to express my gratitude to the God Almighty for granting me the opportunity and capability to proceed successfully.

Allahabad

November, 2017

(Nidhi Ganguly)
Content

Chapter-1
Introduction.................................................................................................................1
1.1 Workfare or Welfare ......................................................................................... 1
1.2 Workfare Programme across Countries......................................................... 3
1.3 Genesis of MGNREGA .................................................................................. 4
1.4 The Act .......................................................................................................... 5
1.4.1 A Paradigm Shift ....................................................................................... 6
1.4.2 The phased implementation .................................................................. 6
1.4.3 Main Provisions ......................................................................................... 7
1.4.4 Governance Structure ............................................................................. 7
1.5 Aim and scope of the study .......................................................................... 8

Chapter-2
Review of Literature................................................................................................10
2.1 Poverty alleviation and employment generation ......................................... 11
2.2 Female labourforce participation .................................................................. 23
2.2.1 Theoretical background ......................................................................... 23
2.2.2 Female participation in MGNREGA ....................................................... 27
2.3 Targeting errors and corruption in MGNREGA ......................................... 33
2.3.1 The Aadhaar system and targeting efficiency ....................................... 36
2.4 Research gaps ................................................................................................ 37
2.5 Relevance of the study .................................................................................. 38

Chapter-3
Research Design and Methodology.......................................................................40
3.1 Objectives of the study .................................................................................. 40
3.2 Hypotheses ..................................................................................................... 40
3.3 Data ............................................................................................................... 41
3.3.1 Secondary data ........................................................................................ 41
3.3.1.1 Weights .............................................................................................. 42
3.3.2 Primary data .............................................................................................. 42
3.3.2.1 Geographical area covered ............................................................... 42
3.3.2.2 Sample size ....................................................................................... 45
3.3.2.3 Selection of respondents and schedule drafting. ......................... 45
3.3.2.4 Estimation of Consumption Expenditure ......................................... 46
3.3.2.5 Reference period .............................................................................. 47
3.3.2.6 Zero expenditure responses .............................................................. 47
3.4 Econometric tools and methods ................................................................. 48
  3.4.1 Cross-sectional data analysis ............................................................... 48
    3.4.1.1 Linear regression ........................................................................... 48
    3.4.1.2 Linear regression with interactions ............................................... 49
    3.4.1.3 Logistic regression ......................................................................... 50
    3.4.1.4 Coefficient of Determination (R-squared) ...................................... 51
  3.4.2 Panel data analysis .............................................................................. 51
    3.4.2.1 Random Effects Logistic Regression .............................................. 51
    3.4.2.2 Hausman Specification Test ......................................................... 52
    3.4.2.3 Difference-in-Differences with covariates ...................................... 52

Chapter-4
Impact of MGNREGA on Consumption Expenditure Pattern of Rural
Poor and Non-Poor Households: The Macro Picture ......................... 54

  4.1 Introduction .............................................................................................. 54
  4.2 MGNREGA and Consumption Expenditure Pattern ............................... 55
  4.3 Employment generated under MGNREGA between the two rounds of IHDS (2005-2012) ................................................................. 56
  4.4 Data ........................................................................................................ 57
  4.5 Descriptive Statistics ............................................................................ 57
  4.6 Variables ................................................................................................ 62
  4.7 Econometric specification ..................................................................... 64
  4.8 Results and discussion ......................................................................... 65
  4.9 Concluding remarks ............................................................................ 73

Chapter-5
Impact of MGNREGA on the Consumption Expenditure Pattern of
Rural Households: A Study of Allahabad District ............................... 75

  5.1 Introduction .............................................................................................. 75
    5.1.1 Functioning of the scheme in study area .......................................... 75
  5.2 Socio-economic characteristics of households ......................................... 77
    5.2.1 Household size ................................................................................. 77
    5.2.2 Caste category .................................................................................. 78
    5.2.3 Land and livestock ownership ......................................................... 80
    5.2.4 Household income ........................................................................... 80
    5.2.5 Household consumption expenditure pattern .................................. 81
  5.3 Empirical framework ............................................................................. 83
    5.3.1 Variables ......................................................................................... 83
    5.3.2 Indicators of Food security ............................................................... 85
    5.3.3 The Model ....................................................................................... 85
  5.4 Results and Discussion ......................................................................... 86
Chapter 6
Impact of MGNREGA on Rural Female Workforce Participation ....100

6.1 Introduction ............................................................................................................ 100
6.2 Theoretical Background ....................................................................................... 101
  6.2.1 The U-shaped trend ......................................................................................... 101
  6.2.2 Education effect, Income effect and Substitution effect ................................. 101
  6.2.3 Female Labourforce Marginalization .............................................................. 102
6.3 Rural Female Labourforce Participation in India ................................................ 103
  6.3.1 Unpaid work and Time Use Survey (TUS) in India ........................................ 103
  6.3.2 Female participation MGNREGA .................................................................... 104
6.4 Empirical Framework ............................................................................................ 105
  6.4.1 Variables ......................................................................................................... 105
  6.4.2 Econometric specification .............................................................................. 106
6.5 Results and Discussion .......................................................................................... 108
  6.5.1 Occupational Pattern ...................................................................................... 109
  6.5.2 Education effect ............................................................................................... 113
  6.5.3 Income effect ................................................................................................... 114
  6.5.4 Caste ................................................................................................................ 114
  6.5.5 Differences in days worked under MGNREGA ............................................. 115
    6.5.5.1 Main occupation ......................................................................................... 116
    6.5.5.2 Education .................................................................................................. 117
    6.5.5.3 Caste .......................................................................................................... 117
6.6. Concluding Remarks ............................................................................................ 117

Chapter 7
Female Participation in MGNREGA in Allahabad District .................120

7.1 Introduction .......................................................................................................... 120
7.2 Socio-economic characteristics of individuals ................................................. 120
  7.2.1 Demographic profile ....................................................................................... 121
  7.2.2 Occupational distribution .............................................................................. 122
  7.2.3 Education ....................................................................................................... 123
7.3 Empirical Framework ........................................................................................... 124
  7.3.1 Variables ......................................................................................................... 124
  7.3.2 Econometric specification .............................................................................. 126
7.4 Results and Discussion ........................................................................................ 127
  7.4.1 Determinants of MGNREGA participation .................................................. 127
  7.4.2 Impact of MGNREGA on total number of days worked .............................. 130
Chapter 8
The Hit or Miss: Targeting Errors in MGNREGA Implementation ...144

8.1 Introduction .......................................................... 144
8.2 Empirical Framework ............................................. 145
  8.2.1 Variables ....................................................... 145
  8.2.2 Econometric specification .................................. 147
8.3. Results and Discussion ......................................... 148
  8.3.1 Determinants of MGNREGA participation .............. 148
  8.3.2 Per capita benefits from MGNREGA .................... 153
8.4 Inclusion and Exclusion errors: Evidence from IHDS data .. 158
  8.4.1 Participation ................................................ 158
  8.4.2 Job card possession ....................................... 161
8.5 Concluding remarks ............................................. 162

Chapter 9
Conclusions ......................................................................... 164

9.1 Findings and Conclusion ............................................. 164
  9.1.1 Impact of MGNREGA on consumption expenditure pattern .... 164
  9.1.2 Impact of MGNREGA on female workforce participation ....... 166
  9.1.3 Targeting errors .............................................. 168
9.2 Policy suggestions .................................................. 170
9.3 Limitations of the study ............................................ 173
9.4 Scope for further study ............................................. 174

Bibliography ................................................................. 175
Appendices

Appendix I: Descriptive statistics of variables used in consumption expenditure analysis (IHDS data) 193
Appendix II: Descriptive statistics of variables used in consumption expenditure analysis (Primary data) 194
Appendix III (A): Descriptive statistics of variables used in female workforce participation analysis (IHDS data) 195
Appendix III (B): Contrast of Marginal Linear Predictions (Model 1, Table 6.2, Chapter 6) 196
Appendix IV (A): Descriptive statistics of variables used in female workforce participation analysis (Primary data) 197
Appendix IV (B): Contrast of Marginal Linear Predictions of ‘sex # MGNREGA dummy’ (Model 2, Table 7.7, Chapter 7) 198
Appendix V (A): Descriptive statistics of variables used in analysing targeting efficiency (Model 1, Table 8.2, Chapter 8) 198
Appendix V (B): Descriptive statistics of variables used in analysing targeting efficiency (Model 2, Table 8.3, Chapter 8) 199
Appendix VI: Schedule 202
List of Tables

Table 3.1: Administrative division of Allahabad district ................................. 43
Table 3.2: Items and reference periods considered in survey .......................... 47
Table 3.3: Percentage of household reporting zero expenditure ...................... 48
Table 4.1: Performance of MGNREGA between the two rounds of IHDS survey  .................................................................................................................. 56
Table 4.2: Descriptive statistics of households in year 2005 and 2012 ............... 58
Table 4.3: Income of households from MGNREGA and Non-MGNREGA sources in year 2012 .......................................................... 60
Table 4.4: Consumption expenditure of households in the year 2012 .......... 61
Table 4.5: Covariates table (Poor households) .............................................. 66
Table 4.6: Diff-in-Diff estimates for poor households .................................... 68
Table 4.7: Covariates table (Non-poor households) ....................................... 70
Table 4.8: Diff-in-Diff estimates for non-poor households ............................. 72
Table 5.1: Performance of MGNREGA in study area: The official picture .................................................................................................................. 76
Table 5.2: Sample Household size ............................................................... 77
Table 5.3: Number of working members by household size ........................ 78
Table 5.4: Caste category by MGNREGA participation ............................... 78
